Fish passage mortality in a tube turbine

by C.P. Ruggles and T.H. Palmeter. Halifax :
Dept. of Fisheries and Oceans, Biological
Sciences Branch, Freshwater and
Anadromous Division, 1989. ix, 58 p. : ill.
Bibliogr. (Canadian technical report of
fisheries and aquatic sciences ; no. 1664)
ISSN 0706-6457
MICROLOG 89-02525 1 fiche

The completion of large hydroelectric projects
and the renewed interest in developing small-
scale hydropower projects will result in more
water flowing through turbines, and thus more
turbine-related mortality of anadromous fishes.
Existing information on turbine-related fish
mortality is primarily derived from studies
undertaken in the Columbia River drainage
basin. In order to document fish passage
mortality in tube-type turbines, to compare fish
mortality of clupeids and salmonids, and to help
identify reasons for the unexpectedly high fish
mortality at the Annapolis tidal power site,
turbine fish passage research was conducted at
a small tube turbine located on the Sissiboo
River, Nova Scotia. Results obtained are
interpreted in the light of turbine design and
operating characteristics, fish species,
experimental design and the types of injuries
observed. A complete bibliography of all

known turbine fish passage research conducted up to 1987 is also included.

Fish population data from Macheewin, Osik, Footprint, and Threepoint Lakes, 1984

by J.A.W. Kirton. Winnipeg : Dept. of Natural Resources, Fisheries Branch. 1987. vii, 78 p. : ill., maps. Bibliogr. (Manuscript report ; no. 87-06)
MICROLOG 89-00711 1 fiche

During the summer of 1984, samples from the fish populations of Threepoint, Footprint, Osik, and Macheewin Lakes were collected and analyzed for the effects of various mesh sizes on the fish species for each lake and the relative abundance of each fish species for each lake. Further analyses involving growth rates and age compositions were carried out on whitefish, walleye, sauger, and northern pike. This report presents a summary of the collected data and ensuing analysis.

Fish study for the National Uranium Tailings Program

by R.D. John and J.L. Dalton. Ottawa : Energy, Mines and Resources Canada, Canada Centre for Mineral and Energy Technology, National Uranium Tailings Program, 1985. ii, 15 p. Bibliogr.
MICROLOG 89-00974 1 fiche

Because of the availability of historical data on fish, the National Uranium Tailings Program decided not to implement a major fish study as part of its research program. However, part of one project, to collect and establish bioaccumulation factors into benthic organisms, did trap fish. Stomach contents were analyzed to establish which zoobenthic organisms they were feeding on. The information was then used to assist in the design of the sampling plan for the zoobenthic organisms themselves.

Fisheries : a policy for Nova Scotia

Nova Scotia. Dept. of Fisheries. Halifax : The Dept., 1989. 24 p. : ill.
MICROLOG 89-01243 1 fiche

The 1980 Nova Scotia Fisheries Policy document marked the first time a government of the province produced a comprehensive public statement on fisheries policy. The evolution of the industry in the intervening years led to this review of policy and program development. The review covers a short history of the fisheries, jurisdiction, general policies and development objectives, departmental structure and duties, marine resources, inland fisheries resources, training services, industrial development, marketing, and the Fisheries Loan Board. Specific items discussed include the implications of the 200-mile Economic Zone, the imposition of sector management, introduction of the Enterprise Allocation concept, settlement of the Georges Bank boundary, growth of the aquaculture sector, and delegation by the federal government to Nova Scotia of the responsibility for trout administration. Maps of the Northwest Atlantic Fisheries Organization Fishing Areas and the general location of fishing ports in the province are included.

A Fisheries inventory of Harrop, Eardley, Weaver and Wrong Lakes, 1978

by I. Hagenson and J.F. O'Connor. Winnipeg : Dept. of Natural Resources, Fisheries Branch, 1981. vii, 68 p. : ill., maps. Bibliogr. (Manuscript report ; no. 81-24)
MICROLOG 89-01577 1 fiche

Study, conducted from July 27-August 24, 1978, to determine the sport fish potential of Harrop, Eardley, Weaver and Wrong Lakes (east of Lake Winnipeg), to provide baseline data to permit recommendations for improving recreational fishing opportunities, and to assess the effects of lodge development on Harrop and Wrong Lakes. All of the study lakes are eutrophic headwater lakes with potential for

high quality recreational fisheries, and currently accessible only by airplane or canoe. Depth-sounding was undertaken; chemical analyses for temperature, dissolved oxygen, conductivity, and pH were conducted; and plankton and benthic samples, as well as small fish specimens, were collected. The sport species (walleye and northern pike) were sampled for fork length, weight, sex, maturity, stomach contents, and age. All other fish species were sampled for fork length and weight only.

Flood Assistance Program throughout Manitoba : final report

Winnipeg : Manitoba Disaster Assistance Board, 1986. iii, 75 p. : ill. MICROLOG 89-00073 1 fiche

The flooding which struck Manitoba in late April and early May of 1986 caused severe hardship to several municipalities and Manitobans. Efforts were made by many of the residents and municipal officials to clean the damages and also repair the homes affected, erosion of farmland, and municipal structures. The Canada and Manitoba Governments announced a Flood Assistance Program to assist financially those individuals and municipalities suffering damages. In this document, the details of this program are outlined as well as the activities and findings of the Manitoba Disaster Assistance Board. MS PR PW

Flood plain planning : a statement of Ontario government policy issued under the authority of Section 3 of the Planning Act, 1983

Flotation of chromite from chromite ore obtained from Bird River, Manitoba

by P.R.A. Andrews. Ottawa : Canada Centre for Mineral and Energy Technology, Mineral Sciences Laboratories, 1988. ii, 15 p. : ill. Bibliogr. (Report, MSL 88-47(IR)) MICROLOG 89-02412 1 fiche

In an earlier study of the beneficiation of this chromite ore, several methods were explored, including ore sorting, heavy-media separation, gravity concentration, and flotation. Flotation was used to recover chromite from the gravity concentration tailings, but due to its high efficiency, very little chromite reported to the gravity concentration tailings. Since flotation was not fully evaluated, a laboratory study was undertaken to determine the optimum parameters of chromite flotation, followed by confirmation at the pilot-plant scale. • CA CM MS NR PS SC

Flue gas spillage status of technology transfer : final project report

Ashton & Associates Ltd. Ottawa : Canada Mortgage and Housing Corporation, 1988. 8 p. MICROLOG 89-04291 1 fiche

Fluidized-bed catalytic cracking (FCC), catalyst fabrication : final report

prepared by the Cambrian Engineering Group Limited ; for Carbovan Inc. Mississauga, Ont. : The Group, 1988. 2 v. : ill. Bibliogr. Contents: Vol. 1 : Final report -- vol. 2 : Appendix II. CANMET contract: 79124-01-SQ. MICROLOG 89-04486 5 fiche

A plant is being constructed in Fort McMurray, Alberta to extract vanadium and other valuable materials from fly ash produced by Suncor. A by-product of the extraction is a leach residue which has been reported to contain as much as 95% of zeolitic material. Preliminary tests in 1986 on the leach residue for catalytic cracking activity indicated that the residue had good potential as a low cost fluidized bed catalytic cracking (FCC) catalyst. This report evaluates the usefulness of the leach residue by-product in a number of applications, and in particular as an FCC catalyst. A literature search on the properties and uses of zeolite was conducted and the leach residue was

characterized. The properties were then compared to specifications of the industrial needed for particle size, surface area, pore diameter and pore volume for use in detergents, catalysts, and microsieves. • AL CA CM PS SC

Fluoride in ambient air, vegetation, and wildlife near an aluminum smelter in Kitimat, B.C., 1977-1986

by D. Remington. Victoria : Ministry of Environment, 1987. 59 p. : ill. Bibliogr. (Environmental Section report ; 87-02) ISSN 0843-4778 ISBN 0-7726-0908-X MICROLOG 89-01758 1 fiche

The Alcan Kitimat smelter produces approximately 270,000 tonnes of aluminum annually and is among the largest aluminum producing facilities in the world. Fluoridation and sulfation plates were operated at various sites throughout the Kitimat Valley from 1976-85 to evaluate ambient levels of fluoride and sulfur dioxide emissions from the smelter. This report is an analysis of the plate data with recommendations for the on-going ambient air monitoring program. A considerable amount of research was conducted on the effects of the emissions on the forest and wildlife of the Kitimat Valley. That research is also summarized. BC EV NR PR SC

Fly ash in concrete : compilation of abstracts of papers from recent international conferences and symposia on fly ash in concrete

by V. Sivasundaram and V.M. Malhotra. Ottawa : Energy, Mines and Resources Canada, Canada Centre for Mineral and Energy Technology, 1986. xi, 70 p. (CANMET special publication ; SP87-6E) ISBN 0-660-13048-3 MICROLOG 89-01610 1 fiche

Compilation of abstracts of papers from recent international conferences and symposia held in Europe and North and South America between 1980 and 1986. Papers were selected on the basis of their direct relevance to the practical application of fly ash to concrete construction. Abstracts are given in chronological order, with keywords for each abstract and an author index. CA CM PS SC

Focus on fees : alternative policies for university tuition fees

by D.A.A. Stager. Toronto : Council of Ontario Universities, 1989. viii, 160 p. Bibliogr. ISBN 088799-239-0 MICROLOG 89-05356 2 fiche

Presents an historical account of the quantitative changes in tuition fees relative to inflation, instructional costs, family incomes, and student aid, both in Ontario and in other jurisdictions. The study also provides an analysis of the private and social returns to university education by program of study; a review of factors affecting access to university education, including the effectiveness of student aid in financing tuition fees; and a discussion of policy options with respect to tuition fees and student aid, including those practised in other jurisdictions, and the implications of their use in Ontario. The focus of this study is on the tuition fees charged to Canadian residents for undergraduate programs in Ontario universities. ED ON PR

Focused interviews

by M. Chow. Ottawa : Public Works Canada, Architectural and Engineering Services, 1988. v, 19, v, 21 p. Bibliogr. (Building performance evaluation series ; Document D22) Bilingual (Entrevues centrées). MICROLOG 89-01919 1 fiche

This building performance evaluation document outlines the procedure to be followed when conducting focused interviews. Factors influencing the quantity and quality of information obtained such as the interviewer's manner, question wording, and sample size are discussed. Methods of data analysis and possible prejudices in the analysis are presented. The focused interviewing process establishes the issues of concern and the routines of both the building occupants and the building management. Sample questions from interviews conducted for building performance are provided.

Forest ecosystem and forest management : physiography as an integral part of forest ecosystems

by D. Burger. S.I. : Natural Environment Research Council, 1986. 7 p. Bibliogr. Presented at the international symposium on Temperate Forest Ecosystem Management and Environmental Protection.
MICROLOG 89-02347 1 fiche

Outline of the principles and relevance of a site classification system or model, in which selected physiographic features of soil and climate provide a framework for the vegetation/land relationships. Significant characteristics of this system are forest succession in relation to physiography, feature continua, normality rather than average as a reference criterion in such continua, and the establishment of classes within continua by concurrent reference to vegetation. The selected features of local climate, soil moisture regime and soil nutrient regime are related to more easily recognizable features of the landscape. The classification comprises 4 inter-related levels, including climatic site or ecoregion based on differing relationships among tree species and position in the landscape, relevant geological material classes in the rooting zone of trees, and site condition comprising the more variable surface soil and ground vegetation.

The Forest industry in the economy of the Yukon

by Colin Heartwell : prepared for Dept. of Renewable Resources, Government of Yukon, Dept. of Economic Development, Mines and Small Business, Government of Yukon, Indian and Northern Affairs Canada, Forestry Canada, Victoria : Forestry Canada, Pacific Forestry Centre, 1988. 100 p. : ill. Bibliogr. ISSN 0840-9781 ISBN 0-662-16672-8
MICROLOG 89-03102 2 fiche

In 1987, a study of the Yukon's small forest industry was undertaken and each of the industry's sectors (logging, sawn lumber, houselogs, fuelwood, and pine seeds) was analysed. Analysis included a variety of socio-economic indicators that described the forest production facilities, their physical and financial capabilities, and the structure of the industry. Forest resources, employment, income, production and capacity, socio-economic impact, and annual revenues and expenditures are assessed in the report. The major impediments and economic benefits of development of the forest resources are discussed and suggestions are made on methods of improving the industry's financial position and viability.

CSI 22189.014. ISSN 0704-7657
MICROLOG 89-00156 1 fiche

Detailed account of the major forest insects and diseases of Newfoundland and Labrador in 1979, with a tabulation of the other noteworthy pests of the region. Collections totalled 987 insect and 150 diseases from 12 ranger districts and from visits and calls to property owners in the urban centres. Forest technicians also monitored, sampled and assessed damage caused by the spruce budworm. Sampling methods used during the summer and the results of monitoring budworm populations are represented. Assessment surveys were conducted from August to November to tabulate tree damage, egg-masses and overwintering larvae of the spruce budworm to forecast damage in 1980. Permanent sample plots on the Avalon Peninsula were remeasured for height and diameter and phenology plots in western and central Newfoundland were measured weekly to monitor spruce budworm

development and tree growth. Shrew trapping was conducted in October to find the population levels of this animal and to monitor any changes during the larch sawfly outbreak. Temperatures and precipitation for the past 8 years are also given.

Forest succession and wildlife abundance following clear-cut logging in west-central Alberta

by J.G. Stelfox. Edmonton : Alberta Forestry, Lands and Wildlife, 1988. vi, 152 p. : ill. MICROLOG 89-04821 2 fiche

A study was initiated in the foothills of west-central Alberta in 1956 to examine the impact of clear-cut logging on wildlife and their habitats within 3 forest types (white spruce, lodgepole pine, and mixed wood). Trends in wildlife numbers, coniferous regeneration, forage production, wildlife habitat ratings, and habitat preferences were compared among mature, logged/scarified, and logged/unscarified treatments in each forest type through a 32-year period. The report presents the results of that study, including details of the methodology and management implications. AL FO PR SC

Forest tent caterpillar in the Prairie Provinces

by V. Hildahl and A.E. Campbell. Edmonton : Government of Canada, Canadian Forestry Service, Northern Forestry Centre, 1975. 11 p. : ill. Bibliogr. (Information report ; NOR-X-135) ISSN 0704-7673 MICROLOG 89-00178 1 fiche

The forest tent caterpillar is an important pest throughout Manitoba, Alberta and Saskatchewan and occurs in outbreaks of 3-6 year duration, stripping trees, shrubs, and forest undergrowth of leaves and flowers. This pamphlet presents information on outbreak history, host trees and shrubs, life stages, life history and habits, injury, and natural and chemical controls. • AL CA FO MS SC

A Forest tenure system for Yukon

by Colin Heartwell ; prepared for Dept. of Renewable Resources, Government of Yukon, Dept. of Economic Development: Mines and Small Business, Government of Yukon, Indian

and Northern Affairs Canada, Forestry Canada, Victoria : Forestry Canada, Pacific Forestry Centre, 1988. 28 p. Bibliogr. ISSN 0840-9781 ISBN 0-662-16673-6 MICROLOG 89-03103 1 fiche

An appropriate system of forestry property rights (tenure arrangements) is one of the most powerful tools that governments have for ensuring effective forest management. This paper discusses the concept of property rights and the role that tenure systems play across Canada and in Alaska, and evaluates the impact of governments' goals and objectives on the tenure system. The paper describes the 9 basic elements that are incorporated into each of the 45 major tenure systems reviewed and groups them into forest management agreements, forest licences, and timber permits. The Yukon's tenure system is outlined and evaluated, and 3 alternate systems are postulated (status quo, timber contracts, and a 3-tiered tenure system), with a discussion of strengths and weaknesses of each option. La Formation à distance dans le système d'éducation : un modèle à développer

avis au Ministre de l'éducation et Ministre de l'enseignement supérieur et de la science ; par le Conseil supérieur de l'éducation. Québec : le Conseil, 1988. 79 p. : ill. Bibliogr. ISBN 2-550-14649-2 MICROLOG 89-02056 1 fiche

Dans cet avis, le Conseil s'interroge sur la formation à distance comme moyen de rejoindre davantage certaines populations et de leur rendre accessibles des services de formation adaptés à leur situation. C'est une perspective d'accessibilité et d'ouverture du système d'éducation et, pour mieux répondre aux besoins d'une population hétérogène, on se penche aussi sur la formation à distance, en tant que voie éducative complémentaire, à tous les ordres d'enseignement. On y trouve donc un inventaire de la situation actuelle de la formation à distance au Québec, cherchant à cerner les acquis importants et les problèmes qui demeurent, des pistes de développement et des voies d'action qui visent à accroître l'accessibilité des services dans un système d'éducation intégré. Fort Témiscamingue : study of the potential use of the collection of archaeological artifacts

by S. Courcy. Ottawa : Environment Canada, Canadian Parks Service, 1989. 15 p. Bibliogr. (Research bulletin ; no. 274) *French ed. (Fort Témiscamingue : étude...)* : 89-03159/1. ISSN 0228-1228
MICROLOG 89-03468 1 fiche

This study examines the archaeological artifacts from Fort Témiscamingue from a site development viewpoint focused on the 2 major themes of interpretation. The condition of the collection, which is comprised largely of highly fragmented objects, is described and the date of the collection, which contains objects deposited during the occupation of the site as a trading post by the Hudson's Bay Company (1840-1902) and more recent objects deposited in the 20th century, is dated. Objects that reflect certain aspects of the occupation of Fort Témiscamingue are then identified as a function

of the interpretation themes and sub-themes. Finally, the author makes two recommendations directly related to site development.

Foundation corrosion survey circuit L22H (eastern region) : preliminary report

by A. Vorauer and H.S. Radhakrishna. Toronto : Ontario Hydro, Research Division, 1988. 20 p. : ill. Bibliogr. (Report ; no. 88-270-K)
MICROLOG 89-04306 1 fiche

A corrosion survey is a routine maintenance activity which is conducted to help determine the condition of metal in galvanized steel transmission tower legs. This report presents the results of a corrosion survey of transmission tower footings along a portion of circuit L22H, a 230kV transmission line in the eastern region. The survey included measurements of leg-to-soil potentials and corrosion currents using a Tower Leg Integrity Monitor. Soil samples were taken for laboratory measurements of soil resistivity, pH and sulphur content. Current readings on sacrificial anode systems were also made using a clip-on ammeter.

Fracture of mica-reinforced polypropylene : mica concentration effect

by T. Vu-Khanh, B. Sanschagrin and B. Fisá, Boucherville, Que. : National Research Council Canada, Industrial Materials Research Institute, 1988. 44 p. : ill. Bibliogr. (Etude ; no 161) MICROLOG 89-00563 1 fiche (Available on fiche only)

Fillers are widely used in commercial production of polymers to improve physical properties for specific applications, one of the recent additions being ground and delaminated mica. The mica improves the chemical resistance and dimensional stability and reduces the gas diffusivity of the resulting composites, although its results on strength are unclear. In this study the fracture strength and mechanisms of a mica-reinforced homopolymer polypropylene were investigated. Fracture mechanics were used to characterize the material capacity to resist the growth and fracture parameters in the elastic-plastic regime are also discussed.

Fraser River Estuary marine environmental monitoring results, 1984-1986

by L. Harding...et al. West Vancouver, B.C. : Environment Canada, Conservation and Protection, Environmental Protection, Pacific and Yukon Region, 1988. viii, 69 p. : ill. Bibliogr. (Regional program report ; 87-18) MICROLOG 89-00457 1 fiche

The Fraser River Estuary Management Plan includes provisions for monitoring environmental quality in the estuary. As part of this Plan, a federal/provincial committee developed a recommended approach to monitoring marine environmental quality. This plan outlined stations, frequency and parameters to be sampled in both freshwater and marine portions of the estuary, and for several compartments of the ecosystem. As a contribution to this program, Environmental Protection studied the distribution of metals and selected organic contaminants in sediment and biota in the outer portion of the estuary during 1984-1986. This report presents results of the study and establishes a baseline for future monitoring.

Free trade and women in British Columbia : potential impact and policy directions for the future

by M. Stephenson. Victoria : Women's Secretariat, 1989. ii, 49 p. Bibliogr.

MICROLOG 89-05275 1 fiche

This study presents background information on the Free Trade Agreement, and discusses its content. It supplies a labour force profile, and examines free trade and the female labour

force. In addition, it provides a review of literature which covers the potential impact of tariff removal, of the extension of national treatment and the rights of national establishment, and of the binational dispute mechanism on securing access to the United States market. BC CI CO EX PR SA

The Free trade deal and Canada's sovereignty : are the fears justified?

by R.G. Lipsey. Toronto : C.D. Howe Institute, 1988. 12 p. Bibliogr. (Trade monitor ; no. 8) ISSN 0836-0820 ISBN 0-88806-232-X

MICROLOG 89-00487 1 fiche

Leaving aside the debate on the Agreement's economic merits, it is the assertion that the Agreement entails a serious loss of sovereignty that seems to have created the most concern among the general public. This document contains a brief overview of the arguments to the contrary, followed by a discussion of how international agreements affect sovereignty. It then considers the argument that the Agreement's clauses directly affect sovereignty, and considers whether forces that may follow from the Agreement, but are not directly contained in it, may directly affect Canadian sovereignty.

Free trade on the Prairies : the implications of the Canada-U.S. Trade Pact for the three Prairie Provinces

by S. Dorey. Regina : University of Regina. Canadian Plains Research Center, 1989. 138 p. Bibliogr. (Canadian plains reports ; 7) ISSN 0384-8930 ISBN 0-88977-054-9

MICROLOG 89-02713 2 fiche (Available on fiche only)

This monograph considers briefly developments which have contributed to the confidence the three Prairie Provinces have in free trade. It then examines the expected effects of both free trade in general and the Canada-U.S. Free Trade Agreement reached on October 4, 1987, in particular, on individual industries important to the Prairies. The study also considers the sectoral and regional implications of various economic models concerning trade liberalization, and the macroeconomic effects of free trade and their consequences for the Prairie region. Freight distribution series, vol. 1 : 1987 truck survey

Toronto : Ministry of Transportation, Provincial Transportation Division, Goods Distribution Systems Office, 1989. iii, 17 p. : ill.

MICROLOG 89-05487 1 fiche

During the summer of 1987, the Ministry conducted truck surveys at 12 vehicle inspection stations throughout the province to provide input for the development of a truck costing model and to gather specific information for several areas in the Ministry. The survey also served as the basis for analysis of empty truck movements on Ontario's main highways. This report summarizes the methodology and general findings of the survey, including vehicle count, equipment types, differences between corridors, energy saving devices, headlight usage, distances travelled by various equipment types, driver and company data, origins and destinations, and freight. ON PR SC TR

Freight distribution series, vol. 2 : potential savings through the elimination of empty truck movements : the cost of regulation

Toronto : Ministry of Transportation, Provincial Transportation Division, Goods Distribution Systems Office, 1989. iv, 22 p. : ill.

MICROLOG 89-05488 1 fiche

In 1987, the Ministry undertook a truck transportation survey to provide input for the development of a truck costing model and to gather specific information for several areas in the Ministry. The survey data was used to examine the occurrence of empty truck movements between northern Ontario and Toronto along Highway 400. This report presents the results of an analysis of empty truck movements on corridors leading from Toronto. Data obtained from inspection stations on Highway 401, the Queen Elizabeth Way, and Highway 400 are analysed to determine the applicability of the earlier findings to other parts of southern Ontario. Fruit crops : estimated production costs : Ontario, 1988

by E.D. McKibbin. Toronto : Ministry of Agriculture and Food, Economics and Policy Coordination Branch, 1988. v, 54 p. (Economics information report : no. 88-07) CSI 55101.007. ISSN 0708-482X
MICROLOG 89-00450 1 fiche

Cost of production estimates based on the ACRES (Agricultural Crop Enterprises System) program. Sources of the data are Branch studies, and consultations with producers and extension, research and agribusiness personnel. For each crop cost estimate in this report, the data was organized into variable and fixed costs and totalled to arrive at the cost of production both on a per acre and per hectare basis. Variable costs are those which vary directly with production of each crop grown. They include seed, plants, hired labour, fertilizer, herbicides, insecticides, fungicides, other materials, machinery operating costs, marketing charges and interest on operating capital. Fixed costs inputs are operator labour, management allowance, interest on land, machinery and buildings, depreciation on machinery and buildings, taxes on real estate (net of farm tax rebate), and other overhead cost items. In this report, cash costs of production are also determined. Cash costs include total variable costs, interest on the debt portion of investment in tractors and machines, and other overhead costs.

Fundamental flammability data for methanol-based spark-ignition engine fuels

prepared for D. Elliot ; prepared by M.F. Bardon...et al. Downsview, Ont. : Ministry of Transportation, Transportation Technology and Energy Branch, 1989. viii, 126 p. : ill. Bibliogr.
MICROLOG 89-06301 2 fiche

In most respects, methanol or methanol-gasoline blends are excellent alternatives to ordinary gasoline as fuels for spark-ignition engines. However, differences in volatility characteristics such as vapour pressure, evaporation rate, and latent heat result in driveability problems in the Canadian climate. This report presents the results of a program to determine the relative proportions of alcohol and hydrocarbon in the vapour as a function of the extent of vaporization for various mixtures, to adapt an existing mathematical technique previously developed for gasoline to alcohol-hydrocarbon mixtures so that the experimental results could be correlated and cast into manageable functional relationships; to calculate the lean flammability limit of the various combinations that exist in the vapour phase, making use of existing theoretical techniques; and to verify experimentally the calculated flammability limits so that other fuel combinations could be

predicted confidently without experimental verifications each time.

Future logging equipment needs in coastal B.C., 1989-2005

by E.A. Sauder. S.I. : Forest Resource Development Agreement, 1988. xi, 44 p. (FRDA report : 027) ISSN 0835-0752 ISBN 0-7718-8642-X MICROLOG 89-04499 1 fiche

Report identifying the areas where the coastal industry will be operating from 1985-2005 and the logging equipment and systems it will need to harvest these areas profitably. The report documents current cut volumes, age classes (mature or second growth), and cutting areas in coastal British Columbia; identifies future cut volumes, age classes, and cutting areas; documents the current logging-equipment complement, by subclasses, with any trends in equipment selection; identifies the type and amount of new equipment and systems required to log the future stands; and predicts the proportion of future stands which can be profitably harvested with current equipment and systems. The survey area included the Vancouver Forest Region and the North Coast and Kalum Forest Districts of the Prince Rupert Forest Region, subdivided into 3 zones. BC CA FO SC

Future needs and directions for computerized record linkage in health research in Canada : future study plans

by M.E. Smith. Ottawa : Statistics Canada, 1986. 21 p. Presented at the Workshop on Computerized Record Linkage in Health Records. MICROLOG 89-03362 1 fiche

This paper is divided into three main sections. The first section reviews some of the general objectives of current health studies. A list of specific projects which have utilized the Mortality Data Base since 1979, along with references to related published papers and technical documents, is used to illustrate the kinds of studies and products possible. Several new ongoing studies which are just in the planning or pilot study phase are also

listed. The second section outlines the kinds and broad functions of source records used and needed in future epidemiological and genetic studies involving delayed health effects. The third section describes some main directions for future endeavours over the next 2-5 years, with examples from some ongoing or currently planned studies. • CA HE PS SC

Future occupational requirements and workforce adjustment in the Canadian metal mining industry : a report

prepared by Employment and Immigration Canada : in consultation with the Mining Association of Canada. Ottawa : Employment and Immigration Canada, 1986. vii, 78 p. Bibliogr. (COPS sector studies) French ed. (Les Professions futures...) : 89-02942/2 CSI 21133.200. MICROLOG 89-02902 1 fiche

Employment in the Canadian metal mining industry has plummeted from a level of approximately 69,000 in 1981 to about 51,000 in 1985. This report focuses on how changes in competitive pressures in the world industry and the adoption of new technologies and production processes are affecting the Canadian metal mining workforce, and will continue to affect it over the next four or five years and perhaps longer. Ce document traite de la détérioration de l'écologie planétaire, aborde la crise écologique ainsi que les réponses du Canada et examine la nécessité d'une restructuration des institutions et les directives à l'industrie et la recherche sur l'état de l'environnement. CA EV SC

Garages de stationnement : relevé de la condition

par C. Patrickson. Ottawa : Travaux publics Canada, Services d'architecture et de génie, 1988. vii, 19, vii, 19 p. : ill. Bibliogr. (Série sur l'évaluation du rendement des immeubles ; Document D32) Bilingue (Parking garages : condition...). MICROLOG 89-01912 1 fiche

Ce document a pour but d'assister l'ingénieur à conduire un relevé de la condition des garages de stationnement détériorés pas le sol. L'évaluation préliminaire inclut une analyse des plans et archives, une analyse des lieux, et une entrevue avec le propriétaire/administrateur. Puis, il décrit les techniques simples de mesure disponibles, l'étude de la délimitation et la mesure au parcomètre. Une liste des autorités compétentes des réglementations applicables, des références appropriées et des recommandations y est aussi présentée. CA PL PW SC

Garanties de l'Agence internationale de l'énergie atomique : observations sur les leçons applicables à la vérification découlant d'une convention sur les armes chimiques

par J.F. Keeley. Ottawa : Ministère des affaires extérieures, Direction du contrôle des armements et du désarmement, 1988. xi, 72 p. : ill. Bibliogr. (Études ponctuelles sur la vérification du contrôle des armements ; no 1) L'éd. anglaise (International Atomic Energy...) : 89-01797/1. ISSN 0840-7983 ISBN 0-662-95165-4 MICROLOG 89-01798 1 fiche

L'étude analyse les aspects politiques, organisationnels, juridiques, financiers et techniques de l'expérience de l'Agence. Les aspects non techniques qui y sont abordés portent sur les caractéristiques importantes de la structure et des opérations internes de l'Agence, et sur celles de l'environnement plus large dans lequel celle-ci est appelée à évoluer. L'étude se penche sur la manière dont l'Agence a abordé le problème du contrôle (sa définition du problème et ses objectifs) ainsi que de la couverture qu'elle offre sur les voies possibles d'acquisition d'armes nucléaires. De plus, elle examine les facteurs qui influent sur l'efficacité politique et technique de l'Agence.

Gassing of paper wrapped conductors

by W.J. Janis. Toronto : Ontario Hydro, Research Division, 1988. v. 44 p. : ill. Bibliogr. (Report ; no. 87-4-K)
MICROLOG 89-02654 1 fiche

Gas generation in the vicinity of hot spots within paper wrapped transformer windings under load is recognized as a potential cause of electrical failure in transformers. This research project was undertaken to answer the questions of the effects of hydrostatic pressure and insulation moisture on bubble formation; the influence of time lag in attaining gas generation temperatures; and the electrical potential required to cause arcing when gas bubbles were present. Thirteen, 38 cm diameter

power transformer winding models of known paper type and moisture content (a standard 55C winding rise paper insulation and a 65C winding rise thermally upgraded (cyanoethylated) paper insulation) were tested in a large, oil-filled enclosure. High current and high potential sources were connected to the test models at various times to produce thermal overload and/or high electrical stress conditions within the windings. Resulting effects, such as conductor gassing, oil or paper degradation or turn-to-turn arcing, were monitored and the data used to interpret fault severity.

Generator condition monitors : comparison of heated and unheated ion chambers

by J.M. Braun. Toronto : Ontario Hydro, Research Division, 1989. 16 p. : ill. Bibliogr. (Report ; no. 88-326-K)

MICROLOG 89-04304 1 fiche

The detection of overheating inside a large turbine generator before it has reached catastrophic levels is notoriously difficult. As a result, the generator condition or core monitor (GCM) was developed in the 1960s to detect such overheating on-line. In 1980-82, all 8 Nanticoke Thermal Generating Station generators were retrofitted with GCMs, while the 4 Bruce Nuclear Generating Station B turbogenerators came, factory-equipped, with monitors. In spite of their long service history worldwide, there remains an ongoing debate on their reliability and usefulness to provide an early warning of generator insulation overheating. The first phase of the present study assessed the operation performance of the GCM system at Nanticoke and performed a comparison of heated and unheated ion chambers. To allow for this assessment, the generator was fitted during routine maintenance with small painted resistors, wired through the instrumentation feed-through panel, to enable controlled overheating experiments.

Geochemistry of FGD waste by-products

by Z. Zhou and R. Dayal. Toronto : Ontario Hydro, Research Division, 1989. ii, 22 p. : ill. Bibliogr. (Report ; no. 88-329-K)

MICROLOG 89-04433 1 fiche

Flue gas desulfurization is developing as a viable technology to control acid gas emissions from coal-fired generating stations. Ontario Hydro is evaluating sulphur oxide control by injection of pulverized limestone directly into the furnace (LIF) at Lakeview Thermal Generation Station Units 4 and 5. The LIF process, however, does generate a considerable amount of waste by-products which must be disposed of safely. This report gives the results of a geochemical study to establish the chemical mineralogical composition, leaching behaviour and evolution of leachate chemistry with time, and the nature and extent of geochemical interactions between FGD leachate and clay liner materials. The results of FGD waste characterization and the leaching tests are presented, and a preliminary interpretation of FGD leachate data using the geochemical computer program PHREEQU is presented, emphasizing FGD leachate/clay liner interactions and their relevance to FGD waste disposal.

Geological and tectonic framework of eastern Canada as interpreted from potential field imagery

by J.M. Woodside and J. Verhoef. Ottawa : Energy, Mines and Resources Canada, Geological Survey of Canada, 1989. 33 p. : ill., maps. Bibliogr. (Paper ; 88-26) ISSN 0068-7650 ISBN 0-660-13231-1 MICROLOG 89-05777 1 fiche

Recent compilation of all gravity and magnetic anomaly data for offshore and eastern Canada provides an unprecedented perspective on the geological framework of the region.

Classification of the region by similarities in the patterns and trends of gravity and magnetic data observed at a scale of 1:5,000,000 indicates geological affinities within structural provinces and tectonic relationships between geological domains. This report examines the correlation between the potential field data and regional geology, and provides a key to the published results and current research on regional structure as interpreted using the available geophysical and geological information.

Geological setting of the Tartan Lake gold deposit

by G.H. Gale and K.J. Ferreira. Winnipeg : Manitoba Energy and Mines, Geological Services, 1988. vi, 65 p. : ill., maps. Bibliogr. (Economic geology report ; ER87-1) *Fold. maps not filmed.* MICROLOG 89-02280 1 fiche

Synthesis of the geology of the area immediately surrounding the Tartan Lake gold deposit, 10 km northeast of Flin Flon, to be utilized as a geological framework within which detailed mineral deposit studies could be undertaken. The initial 6-week field program provided a 1:5000 geological base, with part of the area remapped at a scale of 1:1200 using cut grid lines for reference and carrying out extensive outcrop stripping during a 5-week field program in 1986. This report deals mainly with petrographic descriptions of the main rock types. Structural, geochemical and

mineralization descriptions are brief.

Geological setting, structure and alteration associated with gold-pyrite mineralization in mafic volcanic rocks at Cameron Lake, Wabigoon Subprovince, northwestern Ontario

by D.R. Melling. Toronto : Ministry of Northern Development and Mines, Mines and Minerals Division, 1988. xxiii, 112 p. : ill., maps. Bibliogr. (Ontario Geological Survey open file report ; 5689) *Fold. maps not filmed.* MICROLOG 89-04722 2 fiche

The Cameron gold deposit is located in northwestern Ontario about 80 km southeast of Kenora and was originally discovered in 1960 but not developed. This report documents the basic geologic features associated with the Cameron Lake gold deposit, emphasizing geologic setting, structure, and alteration. The report summarizes 3 field seasons of work and forms part of a broader study on the geologic setting and genesis of gold occurrences in the Cameron-Rowan Lakes area. Data is based on limited regional mapping, detailed mapping of excavated exposures of the deposit, and diamond drill core logging.

Geology and coal resources of the Carbon Creek map area, Peace River district

by A.S. Legun. Victoria : Ministry of Energy, Mines and Petroleum Resources, Mineral Resources Division, Geological Survey Branch, 1988. 33 p. : ill., maps. Bibliogr. (Paper ; 1988-3) *Fold. maps not filmed.* ISSN 0226-9430 ISBN 0-7718-8634-9 MICROLOG 89-00615 1 fiche

Mapping in the Carbon Creek area is a part of a larger study of the Peace River Coalfield in the vicinity of Williston Lake. The study, initiated in 1983, is directed toward the publication of a 1:50,000 compilation map of the area together with reports on the stratigraphy, structural geology and sedimentology of Jurassic-Lower Cretaceous rocks with special reference to coal-bearing strata. The first

product of the study was the publication of the Butler Ridge map sheet with accompanying notes. This map and report are the second contribution. Although this report focuses on the Carbon Creek area it also updates and draws upon the geology of the larger study area.

Geology of carbonatite-alkalic rock complexes in Ontario : Argor carbonatite complex, District of Cochrane

by R.P. Sage. Toronto : Ministry of Northern Development and Mines, Mines and Minerals Division, 1988. vii, 90 p. : fold. map. Bibliogr. (Ontario Geological Survey study ; 41) ISSN 0704-2590 ISBN 0-7729-0576-2 MICROLOG 89-03285 2 fiche

As part of a study of carbonatite-alkalic rock complexes in Ontario, a brief examination was made of a selected group of thin sections of diamond drill core from the Argor carbonatite complex. The complex was emplaced into the northern portion of the Kapuskasing Subprovince of the Canadian Shield and is located at the edge of the Paleozoic cover rocks that form the bedrock to most of the James Bay Lowlands. The carbonatite was discovered by a consortium of companies which flew aeromagnetic surveys over areas covered by licences of occupation. The study describes the rock types and mineralogy of the complex and outlines the history of the mineral exploration efforts.

Geology of carbonatite-alkalic rock complexes in Ontario : Goldray carbonatite complex, District of Cochrane

by R.P. Sage. Toronto : Ministry of Northern Development and Mines, Mines and Minerals Division, 1988. vii, 35 p. : ill. Bibliogr. (Ontario Geological Survey study ; 40) ISSN 0704-2590 ISBN 0-7729-0575-4 MICROLOG 89-03200 1 fiche

The Goldray carbonatite complex occurs at the north end of the Kapuskasing Subprovince of the Superior Province and was discovered in 1966 by diamond drilling by Argor Explorations Ltd. As part of the alkalic rock-carbonatite study undertaken by the Ontario Geological Survey, a petrographic examination was done on a limited number of core samples obtained from the 1966 drilling. This report describes the rock types and mineralogy of the complex and outlines the history of the mineral exploration efforts within the complex.

NR ON PR PS SC

Geology of carbonatite-alkalic rock complexes in Ontario : Hecla-Kilmer alkalic rock complex, District of Cochrane

by R.P. Sage. Toronto : Ministry of Northern Development and Mines, Mines and Minerals Division, 1988. vii, 38 p. : ill. Bibliogr. (Ontario Geological Survey study ; 38) ISSN 0704-2590 ISBN 0-7729-0573-8 MICROLOG 89-02257 1 fiche

The Hecla-Kilmer Alkalic rock complex lies on the boundary between Hecla and Kilmer Townships approximately 5 km south of the Mattagami River. The lack of outcrop prevents surface mapping, therefore all lithologic and chemical data must be obtained from drilling. Samples were collected from drill core abandoned in the bush by Ashland Oil and

Refining Company in 1969. Homogeneous sections or core were selected for thin section examination and those specimens displaying the most homogeneous texture and the least alteration were selected for complete rock analysis. This report includes both general and economic geology, including property description and recommendations for prospectors.

The Fletcher Lake area lies northwest of the town of Armstrong in the District of Thunder Bay. Field work was carried out from early June to September 1980. Mapping was done by pace and compass traverses over land areas, and shoreline examination of navigable lakes and streams. This report includes general geology, geochemistry, metamorphism, structural geology, and economic geology, including descriptions of properties and exploration. Recommendations for exploration of gold, copper-zinc-lead, copper-nickel, and lithophile elements are included. NR ON PR PS SC

Geology of the Highvale Study Site : plains hydrology and reclamation project

by A.M. Schutze. Edmonton : Alberta Land Conservation and Reclamation Council, Reclamation Research Technical Advisory Committee, 1987. xiii, 77 p. : ill., maps. Bibliogr. (Report ; RRTAC 87-11) MICROLOG 89-00378 2 fiche

This is one of a series of reports that presents the findings of the Plains Hydrology and Reclamation Project (PHRP), an interdisciplinary study that focuses primarily on hydrologic aspects of reclamation of surface coal mines in the plains. The focus of the PHRP is to develop a predictive framework that will permit projection of success for reclamation and impact of mining on water resources on a long-term basis. The project involves a holistic approach to reclamation by integration of studies of geology, hydrogeology, and soils, not only in the proposed mining area, but also in the adjoining unmined areas. This approach permits the assessment of impacts and long-term performance, not only in reclaimed areas, but also in the surrounding area. AL EV PR SC

Geology of the Lower Cretaceous Mannville Group as a source of water and a reservoir for brine disposal : final report

by J.E. Christopher. Vanscoy, Sask. : Saskatchewan Potash Producers Association, Research Group, 1989. iv, 55 p. : ill. Bibliogr. CANMET contract: 89173-01-SQ. MICROLOG 89-04493 1 fiche

A detailed study was undertaken from the available data of the region around the Cominco Potash Operations to determine the geological environment of the Lower Cretaceous Mannville Formation, the factors bearing on the formation as a reservoir water source and brine storage, and the potential impacts of implementing the reservoir. The available data from 102 wells in the region were utilized, mostly geophysical well logs, drill stem tests data and well cuttings. As well, 3 full length cores were logged in detail and used to interpret the sand bodies as reservoirs and for regional correlations. Porosity and air permeability values were determined and the formation water system for the Mannville and the upper Devonian strata was also evaluated from the drill stem test pressure and salinity data in the files.

Geology of the MacDowell Lake area, District of Kenora, Patricia portion

by J. Wood. Toronto : Ministry of Northern Development and Mines, Mines and Minerals Division, 1988. vii, 52 p. : ill., maps. Bibliogr. (Ontario Geological Survey report ; 261) *Fold. maps not filmed.* ISSN 0704-2582 ISBN 0-7729-4604-3 MICROLOG 89-02212 1 fiche

The MacDowell Lake map area is located about 160 km NNE of Red Lake in the Patricia Portion of the District of Kenora. The only efficient means of access is by float-equipped aircraft. Geological mapping of the area was done during the summer of 1975. Basemaps were prepared and aerial photographs were used in field mapping. The shorelines of most lakes and most outcrops shown on the air photos were mapped. This report covers general geology, structural and metamorphic geology, and economic geology. NR ON PR PS SC

Geology of the Monument Bay area, Lake of the Woods, District of Kenora

by M.G. Morrice. Toronto : Ministry of Northern Development and Mines, Mines and Minerals Division, 1989. xxv, 124 p. : ill., maps. Bibliogr. (Ontario Geological Survey open file report ; 5707) *Fold. maps not filmed.* ISBN 0-7729-5277-9 MICROLOG 89-06131 2 fiche

The Monument Bay area encompasses about 150 sq km in the District of Kenora, about 50 km southwest of the Town of Kenora. Prior to 1987, the geological database available for the area was at a reconnaissance level. The detailed mapping project described in this report was designed to encourage mineral exploration interest and to provide a basis for land use planning. The report includes location, means of access, physiography, field methods, previous geological work, mining and exploration history, general geology, geochemistry, structure and metamorphism, and economic geology. Geology of the southern part of the Rusty Lake volcanic belt

by D.A. Baldwin. Winnipeg : Manitoba Energy and Mines, Geological Services, 1988. vi, 90 p. : ill., maps. Bibliogr. (Geological report ; GR86-1) *Fold. maps not filmed.* MICROLOG 89-01495 2 fiche

Report on the stratigraphy of the volcanic and volcanic-derived rocks, their environment of deposition, mode of transport and genesis. The lithologies and their outcrop appearance are described in detail and the geology is described with respect to 4 subareas. Intrusive rocks, other than sills and dykes, are not discussed. Contact relationships between some of the intrusive rocks (quartz diorite) and the greenstones are described. MS NR PR SC

Geophysical expression of the Canadian Shield of northeastern Alberta

by K.F. Sprenke, C.S. Wavra and J.D. Godfrey. Edmonton : Alberta Research Council, Natural Resources Division, Alberta Geological Survey, 1986. iv, 54 p. : ill., maps. Bibliogr. (Bulletin, no. 52) *Fold. maps not filmed.* MICROLOG 89-00787 1 fiche

Part of a series of publications on the geology of the Canadian (Precambrian) Shield of northeastern Alberta. Field mapping began in 1957 and was completed in 1975. This report summarizes the geophysical aspects of the portion of the exposed Canadian Shield of northeastern Alberta that lies north of Lake Athabasca. Information is given on the general geology, the magnetic and gravity fields, airborne radiometric survey analysis, and a case study of the Tulip-Mercredi Lakes area. AL NR PR PS SC

Georgetown Shipyard Inc. : Annual report 1987-88

Georgetown, P.E.I. The Shipyard, 1988. 16 p. CSI 62140.001 MICROLOG 89-02771 1 fiche

On Prince Edward Island the shipbuilding industry is served by the provincially incorporated Georgetown Shipyard Inc., whose recent economic performance has reflected the general decline in orders of the whole industry. The annual report predicts a rise in order activity for 1988 and investigates the fishing industry, its primary market for the next decade. The report also contains financial statements. AP CO PR TR

Geoscience Research Grant Program : summary of research, 1987-88

edited by V.G. Milne. Toronto : Ministry of Northern Development and Mines, Mines and Minerals Division, 1988. vi, 251 p. : ill., maps. Bibliogr. (Ontario Geological Survey miscellaneous paper ; 140) *Fold. maps not filmed.* CSI 56120.002. ISSN 0704-2752 MICROLOG 89-02301 3 fiche

The Grants Program was initiated in 1978 to encourage geoscience research at Ontario universities. The program supports applied studies of up to 3 years duration towards: mineral deposit characterization involving studies of specific occurrences or groups of occurrences within Ontario; petrology, rock geochemistry, structural geology, stratigraphy, and geochronology studies; field and laboratory studies leading to the development of new geophysical or geochemical concepts and techniques; engineering and environmental geology studies, and methods for improving automated or manual processing, and facilitating the interpretation of geoscience data. This document provides 24 reports from the year's research, covering the above topics. NR ON PR PS SC

The Geosciences in Canada, 1987 : annual report

Geotrack and Geoplot, Stress, Bearing and Compare subgrade stress analysis and bearing capacity : user's manual first edition

by P.J. Sattler and D.G. Fredlund. Montreal : Transport Canada, Transportation Development Centre, 1988. x, 175 p. : ill. Bibliogr.
MICROLOG 89-04024 2 fiche

User's manuals for the 5 computer programs used to develop the bearing capacity design charts presented in the final report. Geotrack was purchased for use in a bearing capacity approach to railway subgrade design, and Geoplot was developed to produce graphic output for all of the Geotrack output generated. Both Geotrack and Geoplot can be used independently to model the stress distribution beneath a track structure. Stress was written to perform the averaging of the Geotrack stress distributions such that a unique value would be available to represent the stresses below the track system for any given loading configuration and soil conditions. Bearing was developed to compute the bearing capacity of the subgrade system from parameters entered interactively by the user. Averaged stress distributions computed by Stress can be compared to bearing capacities computed by Bearing through use of Compare.

The Geraldton gold camp : the role of banded iron formation

by A.J. Macdonald. Toronto : Ministry of Northern Development and Mines, Mines and Minerals Division, 1988. xxi, 173 p. : ill., maps. Bibliogr. (Ontario Geological Survey open file report ; 5694) *Fold. maps not filmed.* ISBN 0-7729-4445-8
MICROLOG 89-06126 3 fiche

In 1981, a program was begun to investigate and describe the geological controls upon gold mineralization in the province and to address several discrete factors pertaining to gold mineralization by individual, detailed geological mapping studies in key localities in a variety of gold camps. One of the initial investigations focused upon the well-known association between gold and banded iron formations. The Geraldton gold camp was selected for this program, because it hosts a number of significant, past-producing gold mines, from which a considerable amount of gold was mined from an oxide facies, banded iron formation. The report presents the results of this investigation, including a detailed study of an open slope in the Hard Rock Mine.

Germination and fertilization regime effects on the growth of container white spruce seedlings at Red Rock Research Station

by D.A. Draper and C.D.B. Hawkins. S.I. :

Forest Resource Development Agreement, 1989. vi, 19 p. : ill. Bibliogr. (FRDA report 064) ISSN 0835-0752 ISBN 0-7726-0922-5
MICROLOG 89-03690 1 fiche

The accelerated pace of non-satisfactorily stocked (NSR) backlog reforestation programmes in north central British Columbia challenges northern latitude nurseries to develop cultural techniques for producing cost-effective and high performance seedlings. This report describes experiments carried out at Red Rock Research Station near Prince George. White spruce was germinated under 3 germination regimes (20/20C under- and over-bench heating systems and 20/11C under-bench heating system, all 12/12h day/night) and then grown under a common cultural regime; or germinated under a 20/20C air temperature and fertilized with either a 20-8-20 grower formulation over the entire growing season, or a 20-20-20 Hi-Sol fertilizer until mid-July followed by a 10-52-17 finisher formulation. Crop growth was assessed periodically to provide growth curves of height, caliper, shoot mass, and root mass, as well as shoot to root ratios and sturdiness ratios.

Glass of the British military, ca. 1755-1820

by O.R. Jones and A. Smith. Ottawa : Environment Canada, Parks Canada, National Historic Parks and Sites Branch, 1985. 134 p. : ill. Bibliogr. (Studies in archaeology, architecture and history) ISSN 0821-1027 ISBN 0-660-11921-8 MICROLOG 89-00393 2 fiche

Archaeologists and curators working on military sites have to address the problems of what kinds of objects were used by officers and men, how and when they were used and whether they were privately owned or supplied by the military. To help both these groups and for the interest of the general public an illustrated catalogue of glassware used by the British military in Canada from ca. 1755 to 1820 was compiled. The catalogue focusses on the Seven Years' War (1756-63), the American Revolution (1776-83) and the War of 1812-14. Categories used include drinking by type of beverage, storage and serving vessels, drinking glasses, wine glass coolers and finger glasses; eating vessels for condiments, serving vessels and desserts; canteens; health and personal care; and lighting. Material on ownership, sources of supply, and details on production are also included.

Government restraint : an issue of the eighties -- Rev.

by J. Stilborn. Ottawa : Library of Parliament, Research Branch, 1988. 14 p. Bibliogr. (Current issue review ; 86-12E) French ed. (*La Restriction de l'appareil...*) on the same fiche. ISBN 0-660-13189-7 MICROLOG 89-05424 1 fiche

The 1980s have seen growing concerns in Canada about negative impacts, both economic and social, of the massive state bureaucracy which developed in response to economic depression, world war, and the rising expectations of the post-war era. Since the mid seventies, concerns about the scope and expense of government programs and, in particular, about the size and cost of the modern public service, have spawned a series of initiatives directed to the enhancement of political control and the achievement of financial restraint. After examining salient characteristics of the issue of big government, this document reviews governmental efforts since 1984 to achieve reductions in the size and cost of the bureaucracy. It gives particular attention to the efforts of the Nielsen Task Force in this regard.

Grandy Brook Station to Hope Brook Station transmission line environmental impact statement -- Rev.

Newfoundland and Labrador Hydro. St. John's : Newfoundland and Labrador Hydro, 1987. vii, 107 p. : maps. Bibliogr. Fold. maps not filmed. MICROLOG 89-00350 2 fiche

Newfoundland and Labrador Hydro proposes to construct a 138 kV transmission facility to provide the power and energy requirements of the Hope Brook Gold Mine. The proposed transmission line route runs approximately 33 km southwesterly from Grandy Brook Station, which will be constructed adjacent to Route 480 approximately 23 km north of Burgeo, to a station to be constructed at the Hope Brook Mine Site. Concerns were expressed about possible adverse impacts on terrestrial and aquatic habitat, water resources, resource utilization, wildlife, and historic resources and raptors along the proposed route. This environmental impact statement deals with the project description; the environmental setting including the baseline environmental conditions; impact assessment and mitigation; rehabilitation; monitoring; and public involvement.

Grey mould control by seedling canopy humidity reduction through under-bench ventilation and styroblock aeration

by M.J. Peterson and J.R. Sutherland. S.I. : Forest Resource Development Agreement, 1989. 16 p. Bibliogr. (FRDA report ; 077)
ISSN 0835-0752 ISBN 0-662-17032-6
MICROLOG 89-05045 1 fiche

Grey mould caused by the fungus *Botrytis cinerea Pers.* is a major impediment to the production of container-grown conifer seedlings in B.C., particularly those of Douglas fir. Management in container nurseries currently relies heavily on protectant fungicide sprays, but this is producing tolerant fungal strains. Lower seedling canopy humidities combined with reductions in the length of time free moisture persists on seedling foliage would be a desirable way to achieve effective grey mould control. To evaluate the efficacy of methods of promoting canopy drying following watering and to achieve overall humidity reduction, standard container-nursery procedures were used to grow coastal Douglas fir seedlings in unmodified, unvented control styroblocs and in styroblocs with aeration holes at each intercavity intersection and vented with heated forced air, unheated forced air and unheated, unforced air. This report presents the results of that experiment.

Groundwater study at Nanticoke ash lagoon, part I : physical hydrogeology

by A. Vorauer. Toronto : Ontario Hydro, Research Division, 1989. i, 63 p. : ill. Bibliogr. (Report ; no. 89-185-K)
MICROLOG 89-06323 1 fiche

Ontario Hydro will be installing a flue gas desulfurization (FGD) system at the Nanticoke Thermal Generating Station in the near future to reduce acid gas emissions produced during the burning of coal at the station. Since the exact nature of the FGD waste material is unknown, a hydrogeological investigation was undertaken in the vicinity of the existing Nanticoke fly ash disposal area, established in the early 1970s, to assess the impact of the proposed FGD waste disposal system on the local groundwater resources. The field program was initiated in the fall of 1986 and consisted of installing several nests of piezometers, both underneath and around the fly ash disposal lagoon, to measure hydraulic heads, hydraulic conductivities and obtain water samples for chemical analyses. Soil sampling from underneath the ash lagoon was also undertaken to allow for chemical analysis of pore waters as well as trace element analysis of the soil itself. This report provides the results of all of the hydraulic testing completed to date and the results of the on-going hydraulic head monitoring in the piezometer nests.

Growth and yield 32 years after commercially thinning 56-year-old western hemlock

by S.A. Omule. S.I. : Forest Resource Development Agreement, 1988. vi, 16 p. : ill. Bibliogr. (FRDA report ; 029) ISSN 0835-0752 ISBN 0-7726-0878-4
MICROLOG 89-02958 1 fiche

Commercial thinning is rarely practised in British Columbia, mainly because of an abundance of old-growth forest and a lack of suitable second-growth stands. Not only can it increase value and net revenue from forests by making wood available early, it can also

produce large trees at rotation, increase employment, and help overcome wood supply problems. Studies of commercial thinning of western hemlock in the Pacific Northwest suggest that the thinning improves, in varying extents, the growth of residual trees, but that it produces no consistent growth and yield response related to thinning intensity. This report documents growth and yield following 4 levels of single-entry commercial thinning in a 56-year-old coastal western hemlock stand on a good site in the Coastal Western Hemlock Vancouver Island Drier Maritime variant on East Thurlow Island. It is based on 32-year remeasurements and observations from Experimental Project 388.

Growth of some pine-spruce stands in the Yukon : a 27-year record

by G.M. Bonnor. Victoria : Government of Canada, Canadian Forestry Service, Pacific Forestry Centre, 1989. iii, 10 p. (Information report ; BC-X-311) ISSN 0830-0453 ISBN 0-662-17045-8
MICROLOG 89-05474 1 fiche

Permanent sample plots were established at Watson Lake in 1961 and remeasured in 1978, 1982 and 1987. The plots were located in 3 types of stands: Stratum RC - an area cleared of vegetation about 1941 which subsequently regenerated to lodgepole pine; Stratum RS - an area largely cleared (also about 1941) but containing some residual pine, black spruce, and white spruce; and Stratum MA - a mature, undisturbed lodgepole pine-spruce stand. All three strata contained a minor component of hardwoods, mostly trembling aspen. Data from 19 plots in each of strata RC and RS and from 10 plots in stratum MA were available for analysis.

Growth response of white spruce to release from trembling aspen

by R.C. Yang. Edmonton : Government of Canada, Canadian Forestry Service, Northern Forestry Centre, 1989. vi, 24 p. : ill. Bibliogr. (Information report ; NOR-X-302) ISSN 0704-7673 ISBN 0-662-16774-0
MICROLOG 89-03668 1 fiche

White spruce and trembling aspen mixed forests are widely distributed in western Canada east of the Rockies, where aspen forms the upper canopy in young and intermediate-age stands, and spruce trees under the aspen canopy are often suppressed and whipped by the overtopping aspen. Releasing the spruce understorey from the aspen might provide an expedient silvicultural alternative to planting. This report presents 30- to 50-year effects of release cuttings at various levels of trembling aspen and white spruce stocking for diameter, height, basal area, and volume increments. Data are taken from 2 similar but separate studies: one was established in 1936 in a 50-year-old stand in the Duck Mountain Forest Reserve in Manitoba; and the other was established in 1951-54 in 15- to 60-year old stands at Candle Lake, Big River, Big River Nursery, Montreal Lake, Bertwell, and Reserve in Saskatchewan and at Riding Mountain in Manitoba.

Growth, size, and lipid content declines of lake whitefish *Coregonus clupeaformis* in Lake Winnipeg following recovery of the fishery

by J.F. O'Connor. Winnipeg : Dept. of Natural Resources, Fisheries Branch, 1981. vi, 34 p. Bibliogr. (Manuscript report ; no. 81-23)
MICROLOG 89-00727 1 fiche

Lake Winnipeg is known internationally as a source of high quality whitefish, particularly smoked whitefish, which need a high lipid content. Recently the quality of the fish has

deteriorated and the fish caught are smaller and thinner. This study was conducted to determine if a correlation existed between lipid content and size of fish; to determine the extent of the decline in size; to identify the cause or causes of the decline in size; and to recommend management measures based on the findings.

A Guide to the common phytoplankton of the St. Croix Estuary, New Brunswick

by D.J. Rawlence. Saint John, N.B. : New Brunswick Museum, 1987. iii, 60 p. Bibliogr. (Publications in natural science ; no. 6) ISSN 0823-1885 ISBN 0-919326-27-7
MICROLOG 89-00239 1 fiche

The St. Croix is one of three rivers discharging into the Bay of Fundy through Passamaquoddy Bay, which supports the most productive fishery in the Bay of Fundy. Mean tidal amplitude at the head of the Estuary is 6.1 m, which combined with the considerable discharge from the St. Croix, contributes to the generally high suspended load characteristic of the estuary. The spring and autumn phytoplankton maxima are therefore restricted vertically by rapid light attenuation and distributed horizontally in somewhat patch fashion. The groups of phytoplankton covered in this guide include diatoms, the loricate chrysophytes of the genus *Bibryon*, and the dinoflagellates. Keys are provided for the identification of 108 diatoms, 7 species of *Dinobryon*, and 8 dinoflagellate taxa. Comments are included about the collection of phytoplankton, together with some guidance on the cleaning and preservation of diatoms.

Guidelines for estimating honey production costs

Winnipeg : Manitoba Agriculture, Farm Business Management, 1989. 12 p. (Information update) MICROLOG 89-04759 1 fiche

Provides planning information and a format for calculating cost of honey production for a 1,000-hive beekeeping enterprise. This "model" enterprise incorporates indoor wintering into its management practice. AG MS PR SC

Guidelines for estimating manure hauling costs

Winnipeg : Manitoba Agriculture, Farm Business Management, 1989. 8 p. (Information update) MICROLOG 89-04762 1 fiche

Provides a format for calculating the costs of hauling livestock manure. The cost figures are estimates based on a number of assumptions

which are outlined in this document. AG MS PR SC

Guidelines for estimating sheep production costs based on a 250 ewe flock

by G.A. Therrien and A.M. Shatto. Winnipeg : Manitoba Agriculture, Farm Business Management, 1989. 16 p. (Information update) MICROLOG 89-03479 1 fiche

This publication is intended to provide a format and a set of guidelines for determining costs of production on a sheep farm flock enterprise. It examines operating costs, fixed costs, and labour costs. AG MS PR SC

Guidelines for estimating swine production costs based on a 150 sow herd, 2500 hogs sold

Winnipeg : Manitoba Agriculture, Farm Business Management, 1989. 22 p. (Information update) MICROLOG 89-04760 1 fiche

This publication provides a format and a set of guidelines for determining costs of production for a hog enterprise. The cost figures listed in this budget are estimates, and it provides the assumptions on which the costs are based. It presents information in 3 sections: farrow-finish, weaner, and grower-finisher pig production. AG MS PR SC

Guidelines for estimating timothy seed cost of production

by P. Blawat...et al. Winnipeg : Manitoba Agriculture, Farm Business Management, 1989. 8 p. (Information update) MICROLOG 89-03480 1 fiche

Provides planning information and a format for calculating the costs of production of timothy seed. It examines operating costs, fixed costs, and labour costs. AG MS PR SC

Guidelines for forestry extension

by P. Bunnell. S.I. : Forest Resource Development Agreement, 1988. vi, 20 p. : ill. Bibliogr. (FRDA report ; 046) ISSN 0835-0752 ISBN 0-7726-0874-1 MICROLOG 89-02344 1 fiche

Guidelines for those individuals involved in the design and delivery of extension activities, divided into an overview of existing programs, extracting those elements that characterize a successful program; and extension methods, the principles of learning and the processes of information dissemination. Guidelines are presented for using methods to deliver extension activities, highlighting that information which has implications for forestry extension. BC FO PR SC

Guidelines for investigative interviewing of child victims of sexual abuse

by M. Wells. Ottawa : Health and Welfare Canada. Social Service Programs Branch. Family Violence Prevention Division, National Clearinghouse on Family Violence, 1989. 8 p. ISBN 0-662-16665-5 MICROLOG 89-03897 1 fiche

These guidelines cover a number of areas considered to be of key importance in conducting an investigative interview, including: the feelings of the child and the interviewer; checklist; preparing for the interview; seating arrangements, establishing trust; a neutral location; background information; getting started; children's sense of time, children's language, use of aids such as drawings and dolls, validating the child's credibility; and concluding the interview. Guidelines for Residential Source Characterization Program

by S.M. Harvey. Toronto : Ontario Hydro, Research Division, 1988. 6 p. Bibliogr. (Report ; no. 88-121-K)
MICROLOG 89-02600 1 fiche

Two epidemiological studies carried out in the Denver area raised the hypothesis that increased levels of power-frequency magnetic fields in residences may be associated with increased incidences of childhood cancer. This hypothesis is based on the use of a surrogate method of estimating the historical level of residential magnetic fields, using the physical characteristics of the nearby distribution wiring rather than actual magnetic field measurements. However, the actual extent to which particular internal or external conductors will contribute to the residential environment, and by what mechanism, is not well understood, leading to doubts about the hypothesis. The Magnetic Field Source Characterization Program is designed to provide information about the detailed mechanisms by which magnetic fields are produced in homes. To assist in the development of this program, two recent surveys of residential magnetic fields, one in the Denver area and the other in the Tacoma/Seattle/Everett area of the U.S., are analyzed, and the results are used to suggest guidelines for the program.

Guidelines for rock cutting performance prediction using rock mass parameters

by M.C. Bétournay. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1988. iii, 18 p. : ill. Bibliogr. (Report ; MRL 88-52(TR))
MICROLOG 89-00966 1 fiche

The efficiency of access boring machines must be scientifically described. Until now, though some of these machines were used in hard rock settings, little research was carried out in relation to machine performance respects. This report presents guidelines to predict access boring machine performance based on geomechanical aspects and machine advance data. Aspects related to intact rock (small scale), rock mass (large scale), and a combination of the two are discussed, as well as a-priori data collection and validation of predictive models in relation to various performance elements evaluated.

Handcrew fire-line construction : a method of estimating production rates

by P.J. Murphy and D. Quintilio. Edmonton : Government of Canada, Canadian Forestry Service, Northern Forestry Centre, 1978. v, 27 p. Bibliogr. (Information report ; NOR-X-197) ISSN 0704-7673
MICROLOG 89-00188 1 fiche

Trained men properly equipped with handtools are an important element of fire control, with such handcrews utilized during the critical initial attack and in the sustained campaign fire operation. A study was designed to develop a system for describing fuel resistance to handtools and to determine fire-line building rates for broad fuel resistance classes. Initially an attempt was made to observe crews working ongoing wildfires but it proved unsatisfactory and a systematic procedure was developed to measure fire-line construction of typical suppression crews in pre-selected areas. This report presents the results of that study, taking into consideration tree cover, brush, deadfall or slash, and duff, resulting in resistance index values for individual stand components which are correlated directly to fire-line production rates.

Hardwood management problems in northeastern British Columbia : an information review

by E.B. Peterson, R.D. Kabzems and N.M. Peterson. S.L. : Forest Resource Development Agreement, 1989. x, 77 p. Bibliogr. (FRDA report ; 066) ISSN 0835-0752 ISBN 0-7726-0929-2
MICROLOG 89-03673 1 fiche

In 1986, a task force recommended interim strategies for managing hardwoods (aspen, balsam poplar, birch, black cottonwood) in the Fort Nelson, Fort St. John, and Dawson Creek timber supply areas. In 1987, 12 problems associated with boreal hardwood use and management were identified. This literature review, conducted in early 1988, addressed these problems, focussing almost exclusively on aspen. Each problem is reviewed, with a brief statement of the circumstances behind it, a synopsis of related information from the literature, interim solutions based on available information, and suggested follow-up work. Identified problems include outdated inventory, land use, lack of awareness of hardwood utilization and management opportunities, hardwood stock standards, stand tending requirements, growth projections, reforestation requirements for pure aspen and mixedwood types, slash disposal, regeneration response, compaction of soils, erosion, and gene conservation.

HASTUS I : a mathematical programming approach to the bus driver scheduling problem

by R. Lessard, J.-M. Rousseau and D. Dupuis. Montreal : Université de Montréal, Centre de recherche sur les transports, 1980. 14 p. Bibliogr. (Publication ; no. 173)
MICROLOG 89-00008 1 fiche

The bus driver scheduling problem in a transit company involves establishing at minimum cost for each day of the week a list of workdays which assign a driver to each bus in the timetable and respect all clauses of the union contract. The approach used here assumes that the bus schedule is known and that once the list of feasible workdays is established, the problem is solved. The basic terminology and some related rules are given, then a general mathematical programming formulation, with a relaxation of the problem to deal with its size, and a solution approach. The application of the system in Quebec City (250 buses) is briefly reviewed.

Health effects of cadmium and its inorganic compounds

by M.G. Cherian, J. O'Heany and R.A. Kusiak. Toronto : Ministry of Labour, Special Studies and Services Branch, Health Studies Service, 1985. ii, 116 p. Bibliogr.
MICROLOG 89-05338 2 fiche

Cadmium is of special importance in occupational health because it is widely used in industry and has a long biological half-life (10-30 years) in humans. Because cadmium accumulates in tissues and has a wide range of toxic effects, it is important to limit and control the exposure of workers to it. This report provides a critical assessment of the potential risks to human health associated with occupational exposure to cadmium and evaluates the available dose-response data. Laboratory tests considered to be indices of both exposure to, and body burden of, cadmium are assessed.

Health effects of inorganic lead with an emphasis on the occupational setting : an update

by J.N. Nearing. Toronto : Ministry of Labour, Health Studies Service, 1987. vi, 143 p. Bibliogr.
MICROLOG 89-06027 2 fiche

Lead is a designated substance in the Province of Ontario and as such is regulated. Since the proclamation of the lead regulation in 1981, many scientific studies respecting the health effects of lead exposure have been published. This report reviews the more recent scientific literature to determine whether the present regulation, its exposure limits and action levels appropriately reflect the current state of knowledge. The review focuses on occupational

health, and relevant papers are cited and critically appraised. Where human studies are limited in number or are unclear, or inadequate to suggest a dose-response relationship, relevant experimental animal research is considered. Health effects are considered by system, and an update on the metabolic aspects of inorganic lead is included.

Herring spawning stock biomass estimates from diving surveys for the central coast in 1986

by J.F. Schweigert and C.W. Haegele. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1988. iv, 43 p. : maps. (Canadian manuscript report of fisheries and aquatic sciences ; no. 1984) ISSN 0706-6473
MICROLOG 89-00748 1 fiche

Herring abundance in the Central Coast district of British Columbia has recently shown signs of decline. A first attempt to survey spawn in the District (with divers) was made in 1986 to accurately assess the status of the spawning stocks. Herring spawns were surveyed independently with traditional surface survey techniques and by scuba divers. Visual observations were made from a boat and grapples were used to determine the presence of and obtain samples of spawn. From these observations the length and width of spawn and the layers of eggs were estimated. Divers took samples of vegetation with eggs attached, they were weighed, and egg counts were obtained. Eggs on the bottom substrate were calculated from diver estimates of the number of egg layers and percent of the bottom covered by vegetation and then added to eggs on the vegetation.

High temperature triaxial tests on rock samples from borehole URL-05, Lac du Bonnet, Manitoba

by J.S.O. Lau, B. Gorski and R. Jackson. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1988. iii, 86 p. : ill. Bibliogr. (Report ; MRL 88-90(TR))
MICROLOG 89-00970 1 fiche

As part of an investigation into locations for safe, long term disposal of high level nuclear wastes in plutonic rock vaults, two series of high temperature triaxial tests, as well as ultrasonic tests, were conducted on granitic core samples obtained from Borehole URL-05 at the site of Atomic Energy of Canada Ltd.'s Underground Research Laboratory. The tests consisted of various confining temperatures and pressures to provide strength and deformation data and interpretations for the study of the stability and deformity of the rock mass, under both the ambient and high temperature conditions. Pseudo Young's modulus was introduced to describe the slope of the stress-strain curve during each stress interval. The strength properties of the rock samples were expressed in terms of the Hoek and Brown failure criterion.

High temperature triaxial tests on rock samples from boreholes 209-021-SV1 and 209-030-D1L1, Lac du Bonnet, Manitoba

by J.S.O. Lau, R. Jackson and B. Gorski. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1988. iii, 57 p. : ill. Bibliogr. (Report ; MRL 88-112(TR))
MICROLOG 89-01955 1 fiche

A series of ambient and high temperature triaxial tests were conducted on grey granitic core samples obtained from boreholes at the 240 level of Atomic Energy of Canada Limited's Underground Research Laboratory. Nine sets of tests at 3 confining pressures (3.5, 17.0, and 35.0 MPa) and 3 temperatures (ambient, 75C and 125C) were performed to investigate the thermal-mechanical properties of the rock mass. The failure deviator stress and the total axial strain of each of the specimens tested were recorded and both the tangent Young's modulus and the pseudo Young's modulus were used to describe the elastic properties of the samples. Strength properties were expressed as Hoek and Brown failure criterion, and the effects of temperature on the mechanical and elastic properties of the rock samples were discussed.

Historic rates of adjustment in Prairie farm employment and some international comparisons

by J.L. Serjak. Ottawa : Economic Council of Canada, 1988. ix, 79 p. Bibliogr. (Discussion paper ; no. 356) CSI 22215.221. ISSN 0225-8013
MICROLOG 89-00207 1 fiche (Available on fiche only)

Since 1961, farm employment in the Prairies diminished by almost 40 per cent. This adjustment in farm employment is expected to continue in the future as projections, based on the analysis of the historic trends, suggest that the farmer will continue to leave farming. This paper examines the rates of adjustment in the farm employment in the Prairie Provinces as they occurred over the last two and a half decades and compares them with Canada and other major crop producing and exporting countries. It focuses on a number of factors which directly or indirectly affect the employment patterns in the agricultural sector including, the impact of wheat prices, the price of farm land, yield levels, unemployment rate, government subsidies and stabilization payments, and net farm income.

An Historical overview of the Owikeno Lake fall sockeye salmon escapement surveys, 1971-1987

New Westminster. B.C. : Dept. of Fisheries and Oceans, Fisheries Branch, 1988. iii, 72 p. : ill. (Canadian data report of fisheries and aquatic sciences ; no. 711) ISSN 0706-6465
MICROLOG 89-01391 1 fiche

The sockeye salmon runs to Rivers Inlet spawn in the Owikeno Lake system. Since the 1970s, a fall field program has been conducted to enumerate the sockeye escapement, with representatives from the commercial fishing sector accompanying departmental staff in the spawning assessment. This report summarizes the fall enumeration surveys conducted from 1971-87. A description of Owikeno Lake and its tributaries is also included.

Historical overview of water quality in New Brunswick, 1961-1979

edited by P.E. Belliveau. Moncton, N.B. : Inland Waters Directorate, Atlantic Region, Water Quality Branch ; Dartmouth, N.S. : Inland Waters Directorate, Atlantic Region, Water Planning and Management, 1989. xvii, 230 p. : ill., maps. Bibliogr.
MICROLOG 89-04207 3 fiche

Data on surface- and ground-water quality collected by the federal and provincial agencies in New Brunswick from 1961-1979 and screened, analyzed, and interpreted in conjunction with available socioeconomic and physiographic information. The province was divided into 7 basins with the water chemistry in each discussed in relation to industrial, agricultural, forestry, and municipal activities, land use, geology, and the physiography. Water quality is also compared with current criteria or guidelines to assess the suitability of surface and ground water for use as drinking water and for the protection of freshwater aquatic life.

Hog fuel availability in north coastal and interior regions of British Columbia, 1986

by P.W. Appleby. Victoria : Government of Canada, Canadian Forestry Service, Pacific Forestry Centre, 1989. vii, 44 p. (Information report ; BC-X-308) ISSN 0830-0453 ISBN 0-662-16821-6
MICROLOG 89-05344 1 fiche

A great many studies of the renewable energy industry have identified hog fuel produced by the forest industry as the least expensive source of biomass energy. This study updates 1977 work which investigated hog fuel availability in British Columbia. Information was obtained from questionnaires sent to all of the 195 separate manufacturing operations of the 117 forest product companies on the mill listing.

The report gives a detailed tabulation of 1986 hog fuel production, purchases, on-site surplus, on-site utilization, disposition of surplus, and net available surplus by individual mills within each sub-region.

Holocene proxy-climate data from the Canadian Arctic

by L. Ovenden. Ottawa : Energy, Mines and Resources Canada, Geological Survey of Canada, 1988. 11 p. Bibliogr. (Paper ; 88-22) ISSN 0068-7650 ISBN 0-660-13077-7
MICROLOG 89-01812 1 fiche

Quaternary studies by the Geological Survey of Canada (GSC) have produced data on the biological, geomorphological, and glacial history of Canada. Some of the climatically significant discoveries have not become general knowledge, as indicated by their omission from literature reviews and bibliographies. This review of GSC reports and publications is an attempt to make some of its proxy-climate data more accessible. In this review, only data of Holocene age from the Northwest Territories and Yukon Territory are considered, using such phenomena indicative of climate change as vascular plant range extensions, eolian deposition, peat accumulation, and thermokarst and thaw. The report includes a compilation of these data types, comments on their relationship to climate, and concludes with some general thoughts on the nature of proxy-climate data.

Homicide from east to west : a test of the impact of culture and economic inequality on regional trends of violent crime in Canada

by L.W. Kennedy, R.A. Silverman and D.R. Forde. Edmonton : University of Alberta, Centre for Criminological Research, 1988. 17 p. Bibliogr. (Discussion paper ; 17)
MICROLOG 89-04085 1 fiche

Explores explanations for the regional east to west variation in rates of homicide in Canada. It examines whether the effects of inequality and population change are felt consistently across regions in Canada, or whether, as has been reported in the United States, a persistent effect of regional culture exists regardless of structural changes. This paper shows that there is little evidence in the data on homicide, drawn from four time periods over twenty years in Canada, that there is a regional culture of violence which is isolated from the impacts of income inequality and population.

Howden plasma extended arc reactor

Howden Group Canada Limited. Toronto : Ministry of Energy, 1987. 62 p. : ill. Bibliogr. MICROLOG 89-00396 1 fiche

Electric arc furnace dust (EAFD) is being generated at a rate of 1.5-2.0% of steel production from mini-steel mills which use automobile scrap as the primary raw material for making the steel. The EAFD is a designated toxic material containing 2-3% lead along with traces of cadmium and up to 25% zinc. Currently the slag is transported to landfill sites and could thus contaminate the environment. A 1Mw plasma extended arc reactor (PEAR) was designed, built and operated based on information and operating results from a 100kW unit at the University of Toronto. From March-July 1986 the PEAR was run intermittently employing cast iron as the primary feed material, followed by feeding mixtures of mill scale and coke. During September and October 1986 controlled amounts of zinc and zinc oxide were added to the furnace feed. Attention was paid to the feed system, the electrode assemblies, the refractory lining, the gas sampling system, the zinc splash condenser and the cross-over pipes connecting the PEAR with the cyclone and the condenser.

HT deposition to Darlington soils

by F.S. Spencer. Toronto : Ontario Hydro, Research Division, 1988. 12 p. : ill. Bibliogr. (Report ; no. 88-198-K)
MICROLOG 89-04299 1 fiche

Results of research to determine, under field conditions, the potential of various soils of the Darlington site to oxidize molecular tritium (HT) to tritiated water (HTO), a much more radiotoxic form of tritium. With HT as a major atmospheric source term at the Darlington Tritium Recovery Facility, knowledge of HT oxidation is necessary for reliable tritium environmental modelling and dose estimation. Soil was sampled from 8 representative areas

of the Darlington property, based on vegetation cover and expected soil type. The samples were exposed to the HT plume during the June 10, 1987 Chalk River HT field release experiment. Soil density and soil free pore volume (volume of soil pores not filled with water) were calculated, with the 4th core of each site submitted for soil texture, organic content, and pH measurement.

Humanitarian immigration and Canadian immigration policy -- Rev.

by G. Purves. Ottawa : Library of Parliament, Research Branch, 1988. 14 p. Bibliogr. (Current issue review ; 80-10E) *French ed. (L'immigration humanitaire et la...) on the same fiche.* ISBN 0-660-13169-2
MICROLOG 89-05441 1 fiche

The focus of this study is the historically close association of an essentially humanitarian concern - the treatment and resettlement of those who cannot return to their homelands for one reason or another - with a basically self-interested or pragmatic concern - the immigration policy. It is indisputable that there should be some connection between the two concerns; at issue is the degree of this connection and the extent to which the criteria of immigration policy should be applied to the selection of refugees abroad for resettlement in Canada.

Hydraulic testing of multiple siphon generator intakes

Western Canada Hydraulic Laboratories. Ottawa : Energy, Mines and Resources Canada, Renewable Energy Branch, 1988. iii, 64 p. : ill. Bibliogr.
MICROLOG 89-05650 1 fiche

Physical model studies were undertaken at 1:15 scale to investigate hydraulic features of locating intakes to several modular siphon generator units in close proximity to one another. The project was to simplify preparation and increase the reliability of prefeasibility designs and cost estimates for low head power developments which used pre-engineered and commercially available siphon units. This report presents the results of experiments to determine the range of conditions over which the intakes could be operated without undue vortex formation; an examination of the effectiveness of basic vortex prevention techniques; and tests to gauge the effects of angle of approach, discharge, submergence, bottom clearance and approach velocity on hydrostatic and differential horizontal and vertical pressure imbalances across the intake.

A Hydraulically actuated test frame for the field determination of ice flexural properties

by M.N. Demuth and T.D. Prowse. Saskatoon, Sask. : Environment Canada, National Hydrology Research Institute, 1989. 5 p. : ill. Bibliogr. (NHRI contribution ; no. 89030) *Presented at the Eastern Snow Conference.* ISSN 0838-1992
MICROLOG 89-05554 1 fiche

The resistance to downstream forces by a typical river-ice sheet is controlled primarily by its thickness, internal strength and compliance, and the retention mechanisms at work transferring those forces to the bank and bed. Flexural loading is one of the dominant mechanisms promoting failure at the ice-bank/bed interfaces and at the breakup front and plays a significant role in determining the

rate of ice cover clearance. As part of an ongoing series of investigations into the mechanical processes important to the evolution and progression of breakup, this paper reports on the development and field application of a device used to measure the flexural properties of ice during the period preceding breakup.

Ice flow and blockage investigation of shrouded propellers

prepared for Transportation Development Centre : by Viodek Laskow ; in cooperation with NORDCO Limited and Institute for Marine Dynamics. Montreal, Que. : Transportation Development Centre, 1988. 640 p. : ill. Bibliogr.

MICROLOG 89-05261 7 fiche

Description of a series of model tests and analytical investigations of ice flow and blockage of shrouded propellers. The tests were done using a 1:15 scale model of the Louis S. St. Laurent equipped with a centreline nozzle. Tests performed included ice block buoyancy tests, friction tests, waterjet tests, overload tests with and without an ice deflector, simulated blockage tests, wing shaft interference tests, and broken ice flow tests, with and without the deflector. The influence of ship speed, draft, power and other parameters on ice-propeller interaction frequency and blockage frequency was established. Blockage forces were determined as a function of blocking piece geometry, power developed and direction of motion. The effectiveness of waterjets and ice deflectors is discussed, along with the various means of minimizing blockage severity.

Ice strength indexer

prepared for the Transportation Development Centre : by D. Baker. Ottawa : Melville Shipping, 1987. xvi, 105 p. : ill. TP 8945E. MICROLOG 89-06057 2 fiche

Ice tank simulation of ice breaking ships is very dependent on the mechanical properties of the simulated ice. The conventional methods used are time consuming and restricted to only one or two of the strength parameters. This report documents the ongoing development of a device, known as the Ice Strength Indexer, which measures the flexural, shear and compressive strength of the ice continuously along the entire length of the ice tank. The report describes the latest development of the Indexer design, model tests and calibration of strength values to those measured using the conventional methods, as well as a method to apply the output from the Indexer to correct the model resistance for variations in ice strength along the length of the tank.

Image analysis for microscope-based observations : an inexpensive configuration

by S.E. Campana. Dartmouth, N.S. : Dept. of Fisheries and Oceans, Bedford Institute of Oceanography, Biological Sciences Branch, Marine Fish Division, 1987. iv, 20 p. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1569) ISSN 0706-6457
MICROLOG 89-00633 1 fiche

Image analysis systems allow for image enhancement, manipulation, storage and quantification. They are of particular benefit to those conducting microscopic examinations, since they can display detail and quantify features that would not otherwise be possible. The image analysis system described here is a state-of-the-art microcomputer-based system that operates in real-time. Its substantial price advantage (\$7000 includes software and hardware) over commercially-available systems derives from the requirement for user configuration and some basic programming in the C language. This paper details one such configuration, provides an overview of system capabilities, presents some fisheries applications and provides examples of two commonly-used programs.

Impact and fretting wear studies, part 1 : test rig and review of theories

by P.L. Ko. Ottawa : National Research Council Canada, Division of Mechanical Engineering, 1987. v, 29 p. : ill. Bibliogr. (Technical report : TR-TM-004). MICROLOG 89-02356 1 fiche (Available on fiche only)

A wear test rig, capable of studying reciprocating, sliding and impacting wear at temperatures up to 300C, was designed and constructed. This report describes the new test rig and reviews the theoretical background on impact and fretting wear. The overall research program, which includes both theoretical and experimental studies, is also described. CA PS SC

Impact and fretting wear studies, part 2 : room temperature test results (single impact per cycle)

by P.L. Ko, L. Close and M.F. Robertson. Ottawa : National Research Council Canada, Division of Mechanical Engineering, 1988. v, 27 p. : ill. Bibliogr. (Technical report : TR-TM-006). MICROLOG 89-02357 1 fiche (Available on fiche only)

A research program to develop an impact-fretting wear predictive model using the impact energy as the principal parameter was initiated. This report represents the second interim report for this program, and describes the results of a series of oblique impact tests obtained from the new impact-fretting test rig at room temperature. ● CA PS SC

Impact assessment of acid mine drainage from Equity Silver Mines using in situ bioassay analysis

by D.B. Maclean. Victoria : Ministry of Environment, 1988. iv, 28 p. Bibliogr. ISBN 0-7726-0909-8. MICROLOG 89-01777 1 fiche

Investigations of the effects of acid mine drainage (AMD) from Equity Silver Mines near Houston, British Columbia, included water quality sampling, in situ bioassays using steelhead trout eggs and steelhead trout yearlings as test organisms, and laboratory flow through bioassays. In situ bioassays were timed to run during the annual spring peak in ambient metal concentrations. Laboratory bioassays were performed to determine the LC50 of the AMD and to determine if the egg stage of development was more or less sensitive to metal toxicity than underyearlings. Comparisons were also made with similar AMD bioassay work near Mt. Washington on Vancouver Island. BC EV NR PR SC

Impact de l'exploitation sexuelle de l'enfant : examen de la recherche

par A. Browne et D. Finkelhor. The Impact of Canada's changing industrial mix of employment on the occupational structure

by G. Picot. Ottawa : Statistics Canada, Social and Economic Studies Division, 1985. ii, 39 p. (Research paper ; no. 21)

MICROLOG 89-03859 1 fiche

This paper reviews changes in the industrial structure of employment over the past 30 years. Using data for 41 industries, it calculates 2 indexes of structural change (in industrial employment) for the periods 1951-61, 1961-71, 1971-81 and 1981-84, and it determines the influence of change in the industrial mix of employment on the occupational structure in Canada for the 1971-81 period. This analysis contributes to the understanding of the underlying causes of change in the occupational structure of employment.

The Impact of Canadian fuel properties on exhaust emissions from heavy duty truck and bus engines

by S.A. Shimpi and V.K. Duggal. Ottawa : Energy, Mines and Resources Canada, Transportation Energy, 1986. iii, 62 p. MICROLOG 89-05381 1 fiche

The Canadian government is evaluating the social and economic impact of emissions standards for heavy duty diesel engines. This report presents the results of tests conducted to determine the performance and emissions contribution of 2 typical 1990 Canadian diesel fuel compositions in heavy duty diesel engines in relation to the U.S. EPA emissions standards for 1988, 1991, and 1994. Transient cycle emissions tests were carried out on 2 heavy duty engines (Cummins NTCC-400 and L10-270) with 3 fuels, 2 of which were supplied by the Canadian refining industry and included a blend from entirely synthetic crude. Emissions from these fuels were characterized against fuel used by Cummins for EPA certification. The range of fuel properties included Cetane no. 37-42, Aromatics 27-58%, and Fuel sulphur 0.01-0.4% in weight. In the transient test cell environment, the engine performance was not

affected by the fuels tested.

Impact of child sexual abuse : a review of the research

by A. Browne and D. Finkelhor. Ottawa : Health and Welfare Canada, Social Service Programs Branch, Family Violence Prevention Division, National Clearinghouse on Family Violence, 1989. 26 p. Bibliogr. *French ed.* (Impact de l'exploitation...) on the same fiche. ISBN 0-662-16657-4

MICROLOG 89-03911 1 fiche

This article reviews studies that have tried to confirm empirically the effects of child sexual abuse cited in the clinical literature. In regard to initial effects empirical studies have indicated reactions of fear, anxiety, depression, anger and hostility, aggression and sexually inappropriate behaviour. Frequently reported long-term effects include depression and self-destructive behaviour, anxiety, feelings of isolation and stigma, poor self-esteem, difficulty in trusting others, a tendency toward revictimization, substance abuse and sexual maladjustment. The controversy over the impact of child sexual abuse is discussed and recommendations for future research efforts are suggested.

Impact of pine stem rusts of hard pines in Alberta and the Northwest Territories

by Y. Hiratsuka, J.M. Powell and G.A. Van Sickle. Edmonton : Government of Canada, Canadian Forestry Service, Northern Forestry Centre, 1988. vi, 9 p. Bibliogr. (Information report ; NOR-X-299) ISSN 0704-7673 ISBN 0-662-16438-5

MICROLOG 89-02948 1 fiche

Stem rusts are among the most destructive and widespread diseases of pine, affecting tree form, growth rate, and wood quality. To obtain quantitative information on canker growth and possible host mortality, a study was initiated in 1965 in Alberta and the Northwest Territories to ascertain the damage caused by stielactiform and comandra blister rusts and western gall rust. Mortality and growth studies in lodgepole pine and jack pine regeneration were conducted, and the development and growth of rust cankers in heavily infected stands was observed. This report presents the results of measurements of rust cankers and observations of rust canker behaviour and tree mortality over 12 years.

An Improved magnetic field probe for use with the MFRRS exposure systems

by S.M. Harvey. Toronto : Ontario Hydro, Research Division, 1988. 6 p. : ill. (Report ; no. 88-37-K)
MICROLOG 89-02610 1 fiche

As part of the Magnetic Field Rodent Reproductive Study (MFRRS), 4 exposure systems were built capable of generating triangular-wave magnetic fields similar to those produced by video display units. The fields have fundamental frequencies of 17-20 kHz, with provision also for operation at 60 kHz, and amplitudes from 3.6-200 uT peak-to-peak. This report presents performance specifications.

Improved preventive maintenance : sealing cracks in flexible pavements in cold regions

by G.J. Chong and W.A. Phang. Downsview, Ont. : Ministry of Transportation, Research and Development Branch, 1987. ii, 31 p. : ill. Bibliogr.
MICROLOG 89-03216 1 fiche

Cracking of asphalt pavement in cold regions has always presented a problem because it can directly affect pavement rideability and material behaviour, and therefore service life. Cracking, if left untreated, can develop into more drastic distresses, which are irreversible and are a major factor in surface roughness. A prime example is the transverse crack which, if left untreated, develops permanent and seasonal deformations. This report describes the on-going preventive maintenance measures to deal with this problem, as well as current investigations to discover better methods and materials.

Improved ultrasonic evaluation of green-state ceramics with the use of a surface-bonded adhesive tape

by K. Yamanaka... et al. Boucherville, Que. : National Research Council Canada, Industrial Materials Research Institute, 1988. 29 p. : ill. Bibliogr.
MICROLOG 89-00594 1 fiche (Available on fiche only)

An improved method was developed for the NDE of green-state ceramics where samples are covered with an adhesive tape. An alternative method is proposed using adhesive tape so that standard ultrasonic couplant for testing green state ceramics can be used. As well, it enables C-scan imaging if the sample is completely covered with tape. If a water bag is used with the taping, no complete sealing is necessary and it is possible to apply the method on large or curved samples.

Improved understanding and predictability of salt anomalies in potash mines, phase I

University of Saskatchewan. Saskatoon, Sask. : The University, 1988. 41 p. : ill. Bibliogr.
CANMET contract: 79187-01-SS.
MICROLOG 89-01748 1 fiche

The flooding in the potash mines in the Prairie Evaporite Formation of Saskatchewan has sparked renewed interest in the geology of the Prairie Evaporite and the overlying Dawson Bay formation. This project concentrates on the Saskatoon Potash Mining District and is divided into 3 independent projects, consisting of a chemical analysis of one location of the potash beds at PCS Mining, Cory Division; fluid inclusions in halite; and the diagenetic history of the Dawson Bay formation, including the paths of fluid migration and an examination in detail of the mineralogy, both of the rock matrix and the pore-filling cements.

Improving the agronomics and feed value of kochia : final report

E. Coxworth, D. Green and J.A. Kernan, editors. Saskatoon, Sask. : Saskatchewan Research Council, 1988. xv, 198 p. : ill. Bibliogr. (SRC technical report ; no. 221) (SRC publication ; no. R-814-4-B-88)
MICROLOG 89-00060 3 fiche

Kochia is a very common annual wild plant (weed) on disturbed soil throughout southern Saskatchewan. A 3-year research and development project was conducted to learn how best to manage, control, and utilize this wild plant for forage to feed cattle. The project was planned as the first stage in development of non-weedy strains as a domestic crop. The report presents the results of farm trials and experience with the plant; potential antinutritive components; grasshopper resistance; effects of soil cultivation and fertilizer on the yield and feed value; studies on the intake and digestibility; effect of ammoniation; trials on the methods of seeding kochia; effects of herbicides; effects of maturity on yield and nutritive value; allelopathic effects; and irrigation and regrowth after cutting.

Improving the design and economics of Darrieus rotor wind turbines

prepared for Renewable Energy Branch, Energy, Mines and Resources ; by Indal Technologies Inc. Mississauga, Ont. : Indal Technologies Inc., 1987. v, 45 p. : ill. Bibliogr.
MICROLOG 89-05741 1 fiche

Final results of a study of the feasibility of improving the cost effectiveness of Darrieus rotor wind turbines. Two new rotors were designed (in a preliminary manner) and arrangement drawings were prepared. One rotor was limited to using a blade obtainable as a single aluminum extrusion while the second rotor incorporated a step-tapered blade and larger chord dimensions. The cost and energy production of each (based on a 20-machine installation) was compared with equivalent costs for the existing Indal 6400 wind turbine.

Improving wetlands for forestry in Alberta

by G.R. Hillman. S.L. : Canada-Alberta Forest Resource Development Agreement, 1988. vi, 22 p. : ill. Bibliogr. ISBN 0-662-16266-8
MICROLOG 89-05244 1 fiche

In Alberta, concern about the decreasing productive forest land as more forest land was withdrawn for other uses led foresters to consider increasing the wood-growing capability of forested wetlands. In 1985, a wetland drainage and improvement program was instituted to develop optimal silvicultural regimes for increasing growth of commercial tree species on drained wetlands, and to assess the effects of drainage on tree growth, ground vegetation, soils, peat, and local hydrology. A treed swamp, a treed bog and a treed fen were chosen as experimental areas. On each area, a portion was designated for ditching and the remainder was preserved as control, with pretreatment and post-treatment data obtained from each site. This report discusses changes in groundwater table levels following drainage of the treed swamp.

Improving Young Child Feeding in Eastern and Southern Africa : household-level food technology : proceedings

editors: D. Alnwick, S. Moses, and O.G. Schmidt. Ottawa : International Development Research Centre, 1987. xxi, 380 p. ill. Bibliogr. (Proceedings series : IDRC-265e)
MICROLOG 89-02146 5 fiche (Available on fiche only)

Food scientists, nutritionists, and health planners working in Africa and South Asia met in an international workshop to examine household-level food technologies that hold promise for improving nutrition of infants and young children. This publication contains the proceedings, conclusions, and recommendations of the workshop. After reviewing current knowledge of breastfeeding and weaning practices in eastern and southern Africa, participants discussed the use in weaning diets of fermented foods and germinated flour, for both improved nutrient intake by young children and decreased risk of food contamination. Research that should be conducted into the effectiveness of the food technology is identified and its diffusion at the community level discussed.

Incremental cost to Canadians of the proposed heavy duty engine regulations to limit emissions from trucks and buses

Ottawa : Energy, Mines and Resources Canada, Transportation Energy, 1986. ix, 68 p.
MICROLOG 89-05367 1 fiche

Forecast of the incremental cost to Canada, based on allocation of resources, of implementing standards limiting the emissions from trucks and buses having a gross vehicle weight exceeding 500 lbs. The analysis begins in 1984 and is projected to 2000, using 1985 Canadian dollars as a base. The analysis forecasts the cost to Canadians caused by the implementation of the U.S. limiting emissions from heavy duty trucks from 1990-2000, assuming that no changes are made to the present Canadian regulations; the change in cost to Canadians caused by implementation of Canadian 1989 and 1995 regulations to 2000; and the incremental costs of the first and second forecasts. The analysis is applied to gasoline and diesel powered trucks, and diesel, propane, liquefied or compressed natural gas, and methanol powered urban buses.

Industrial heat pump technology review

by R.L.D. Cane. Toronto : Ministry of Energy, Energy Technology Development, 1987. 25 p. Bibliogr.
MICROLOG 89-00400 1 fiche

The electrically-driven heat pump in both its open and closed-cycle configurations offers significant potential for reducing purchased energy in processes such as concentration by evaporation, waste heat recovery for boiler feedwater heating and product drying. With the exception of lumber drying by dehumidification (about 200 installations) the industrial heat pump has insignificant penetration in Canada in concentration by evaporation processes and waste heat recovery applications. This report presents the results of an overview study of current industrial heat pump research and development activities in both Canada and the United States. The investigation reviewed current significant research efforts relating to equipment, refrigerants and advanced applications; technical difficulties encountered on NRC funded heat pump demonstration projects; and provided

recommendations on R&D efforts needed to accelerate commercialization of electrically-driven industrial heat pumps.

Industrial relations legislation in Canada

Ottawa : Labour Canada, 1989. ii, 71 p. MICROLOG 89-06409 2 fiche

Tabular summary of major industrial relations provisions existing in the various jurisdictions across Canada, including provisions on certification, government intervention during unsuccessful negotiations, prerequisites to legal strikes, strike votes, strike replacements, and legislation pertaining to the payment of union dues. The second part contains a narrative description of technological change legislation existing in certain jurisdictions as of December 1, 1988. The legislation studies in this report covers workers in general and does not include special statutory provisions often applying to workers in the construction industry and to employees in the public and parapublic sectors such as public servants, teachers, hospital workers, policemen and firefighters.

Industrial-commercial refrigeration system trends and strategic conservation potential

by F.G. Pellini. Toronto : Ontario Hydro, Research Division, 1988. 17 p. Bibliogr. (Report ; no. 87-333-K) MICROLOG 89-02617 1 fiche

Conventional refrigeration equipment used in the industrial and commercial sector in Canada is mainly of American design and manufacture, and is generally for operation in warmer climates. These characteristics lead to energy inefficiency and the need to run the equipment under artificially loaded conditions in order to compensate for deficiencies in mechanical controls and crude designs. This report presents a survey of available systems and controls that best suit the Canadian market in terms of electrical demand reduction and energy efficiency. Information was obtained from published reports and interviews with key people in the industry.

Influence of chemical composition and microstructure on the two-body abrasion resistance of steels

by G. Huard and K.-H. Habig. Boucherville, Que. : National Research Council Canada, Industrial Materials Research Institute, 1987. 68 p. : ill. Bibliogr. MICROLOG 89-00540 1 fiche (Available on fiche only)

The development of new materials which are resistant to abrasion contributed to lower economic losses due to wear. Two-body high-stress wear resistance experiments were carried out on chromium steels and chromium-

molybdenum steels submitted to various heat-treatments such as normalizing, hardening and tempering. The values of resistance to wear by soft flint and hard silicon carbide abrasives were compared with those for plain carbon steels and tool steels similarly heat treated, as related to bulk hardness, carbon and alloying element contents and microstructure.

Influence of gill net hang ratio on the catch of salmon in the Fraser River

by K.H. Wilson and J.H. Andrew. New Westminster, B.C. : Dept. of Fisheries and Oceans, 1987. vii, 16 p. Bibliogr. (Canadian technical report of fisheries and aquatic sciences : no. 1516) ISSN 0706-6457. MICROLOG 89-04715 1 fiche

Hang ratio is the length of web material divided by the length of the completed gill net. This report presents information on the effect of hang ratio on the relative efficiency and selectivity of gill nets commonly used to harvest sockeye in the Fraser River. Three gill net panels were constructed with hang ratios of 2:1, 2.5:1 and 3:1. The 3-panel net was set twice daily on 15 days between August 23 and September 23, 1984 at a site in the Fraser River upstream from New Westminster. Fishing was restricted to days when no commercial activity occurred. The fish captured in each panel on each set were counted and analysed for sex, weight, postorbital-hypural length, and mode of capture (gilled, wedged, or tangled based on location of net marks). All chinook and coho salmon, and a sample of sockeye salmon were recorded.

Influence of handrail shape, size and surface texture on the ability of young and elderly users to generate stabilizing forces and moments

by B.E. Maki. Ottawa : National Research Council Canada, Division of Electrical Engineering, 1988. x, 75 p. : ill. Bibliogr. MICROLOG 89-03264 1 fiche (Available on fiche only)

Current handrail design standards were derived with little regard to basic biomechanical principles. This report presents an evaluation of handrail shape, size and surface texture. The handrails were tested in circular, square, and rectangular shapes, with 4 circumferences from 100mm-160mm, and with 8 different surface preparations. The experiments involve measurement of the maximum forces and moments that subjects are able to exert on the handrails, and the comfort of the subject was assessed also.

The Influence of sandstone channels on coals from the Sydney Basin : mineralogy, chemistry, petrography, rheology and thermal characteristics : final report

by J.C. White and W.D. Birk. Sydney, N.S. : Atlantic Coal Institute, 1989. 353 p. : ill. Bibliogr. CANMET contract: 79225-01-SQ. MICROLOG 89-06205 4 fiche

The influence of sandstone channels on coal quality was studied for Hub, Harbour, and Phalen commercial seams by comprehensive geochemical, thermal and petrophysical analysis of bench samples for 6 columnar sections from roof rock to seat clays. For each seam, coal overlain by sandstone roof and coal capped by shale roof were analyzed.

The Influence of shielding gas composition on pulsed gas metal arc welding of arctic and offshore structures and pipelines : final report

by T.S. Thompson, A.B. Rothwell and D.V. Dorling. S.I. : NOVA Corporation of Alberta, 1988. vi, 144 p. : ill. Bibliogr. CANMET contract: 69113-01-SQ. MICROLOG 89-04497 2 fiche

For the economical construction of offshore structures and pipelines, a clear need exists for welding processes which are capable of depositing weld metal of high integrity and toughness, and which offer significantly improved productivity, relative to the conventional, shielded metal arc welding process. This report examines the potential of pulsed gas metal arc welding (GMAW) for these applications. The report describes a study of the influence of shielding gas composition on pulsed GMAW characteristics and weld metal mechanical properties to determine the optimum gas mixtures for the pulsed GMAW of structural and pipeline steels for offshore oil and gas installations. Preferred oxygen potential was determined through an investigation of the effect of variations in CO₂ content of Ar-CO₂ gas mixtures on weld metal properties. Maintaining the oxygen potential constant for each welding application, the effect of additions of He and H₂ and variations in CO₂ and O₂ content on arc stability and metal transfer and on penetration and fusion characteristics were investigated.

The Influence of time and size at release of juvenile coho salmon *Oncorhynchus kisutch* on returns at maturity : results of studies on three brood years at Quinsam Hatchery, B.C.

by R.B. Morley...et al. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1988. vi, 120 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1620) ISSN 0706-6457 MICROLOG 89-01039 2 fiche

A study at Rosewall Creek experimental hatchery, Vancouver Island, showed that both the time of release and size at release of juvenile coho salmon influenced their subsequent growth, survival, and age at maturity. Similar studies were undertaken at Quinsam Hatchery, on the north-east Vancouver Island, and at Capilano Hatchery, on the southern mainland, to determine whether the Rosewall results could be applied. This report deals with studies at Quinsam Hatchery, in which juvenile one-year-old salmon were released on April 20, May 10, May 30, and June 19 in both 1980 and 1981 and on May 30, 1983; fish of each release were graded to 3 size categories and coded wire tagged. The resulting returns to the catch and escapement were examined for influences of time of release and size of juveniles at release.

The Influence of wordprocessing on the attitudes and writing of postsecondary students

by A. Tilly and P. Myers. Toronto : Ministry of Education, 1988. vi, 140 p. Bibliogr. (Education and technology series) ISBN 0-7729-3723-0 MICROLOG 89-00142 2 fiche

650 college students were taught to use wordprocessing in their writing, and used it through their first academic year. The study draws a profile of the writing background, attitudes, and skills held by the students, and documents changes in these aspects over the period of the study. Topics presented include college students and their writing; wordprocessing in college English and students' lives; implications for teaching and administration in the college setting; research and current literature; methodology in detail; interviews: a statistical profile of students and their responses; an anecdotal profile of students and their responses; and writing samples and student writing skills. This paper also presents an annotated bibliography and the survey, interview questions, and questions used in the study.

The Information economy : the implications of unbalanced growth

by L. Osberg, E.N. Wolff and W.J. Baumol. Halifax : Institute for Research on Public Policy, 1989. xix, 114 p. Bibliogr. ISBN 0-88645-085-3 MICROLOG 89-03957 2 fiche

This paper argues that growth in modern economies is inherently unbalanced because labour productivity grows at different rates in the different occupation sectors. It examines the relative shift within industries towards knowledge-based occupations. It also demonstrates that higher education does not imply higher individual earnings for those employed in the goods and personal services sector, but post-secondary education is strongly rewarded within the information economy. Finally, it discusses the educational policy, research and development and international trade issues raised by the pattern of unbalanced growth characteristic of the information economy.

Infra-red detection and acoustic deterrent study, Cape Churchill, Manitoba 1984

Computech Services Canada Inc. Yellowknife : Dept. of Renewable Resources, 1986. ix, 49 p. : ill. Bibliogr. (File report ; no. 55) MICROLOG 89-03533 1 fiche

A two-part study was carried out in November 1984. Part I tested the feasibility of using an infra-red system to detect (and also to census) polar bears under natural arctic winter conditions and to assess this system's usefulness as an early warning device. Part II consisted of a preliminary investigation into the feasibility of using an acoustic system as an effective and versatile deterrent system which is physically harmless to polar bears, to observe the effects of acoustic stimulation on bear behaviour, and to determine any possible optimal frequencies for deterring these animals in their natural habitat.

Initial response of partially defoliated black spruce trees to precommercial thinning

by P.F. Newton. St. John's : Government of Canada, Canadian Forestry Service, Newfoundland Forestry Centre, 1988. vii, 24 p. : ill. Bibliogr. (Information report ; N-X-264) ISSN 0704-7657 ISBN 0-662-16309-5 MICROLOG 89-00845 1 fiche

From 1975-80, approximately 8000 ha of productive coniferous forests were precommercially thinned within insular

Newfoundland. Coincidentally a regional spruce budworm outbreak peaked at the same time. This case study was initiated to evaluate the response of black spruce trees to precommercial thinning conducted during this period. The study areas consisted of two black spruce stands situated on medium sites. Both areas were partially thinned in 1977 at the age of 25 years. Parameters evaluated included diameter, basal area, volume and specific volume growth, cylindrical form factor, live crown ratio and specific gravity at breast height.

Integration of Canadian farm and off-farm markets of women, men and children

by R.D. Bollman and P. Smith. Ottawa : Statistics Canada, Analytical Studies Branch, 1988. 45 p. : ill. Bibliogr. (Research paper series ; no. 16) French ed. (Intégration de la... on the same fiche. CSI 01100.217.

MICROLOG 89-02296 2 fiche

Current levels of participation in off-farm work by farm family members might be viewed as part of an historical trend toward greater integration of the farm enterprise and of the family with the non-farm economy. To understand the integration of the farm family with the off-farm economy, it is important to analyse the farm business situation separately from the farm family situation. This report documents briefly the trends concerning measurement of integration; describes the on-farm and off-farm work patterns of farm operators, their spouses, and their children; and demonstrates the importance of separating the analysis of the farm business enterprise from the analysis of farm family economic welfare.

Inter-ministry child abuse handbook : an integrated approach to child abuse and neglect

compiled by Ministry of Attorney General, Ministry of Education, Ministry of Health, Ministry of Social Services and Housing and Ministry of Solicitor General. Victoria : Ministry of Social Services and Housing, 1988. viii, 120 p. Bibliogr. ISBN 0-7718-8691-8

MICROLOG 89-02394 2 fiche

Part I of this handbook provides guiding principles in approaching child abuse; a summary of the relevant law; the principles governing confidentiality of information; working definitions of child abuse and neglect; the prevention of child abuse and neglect; the obligation to report child abuse and neglect; and an approach to investigation and intervention in child abuse and neglect cases. Part II contains sections on the roles of five ministries: Social Services and Housing, Attorney General, Solicitor General, Health, and Education. Part III presents protocols for specific situations: cases involving multiple victims or a high impact on the community; cases of abuse or neglect in a child care facility; and cases of abuse or neglect by a school board employee. Lastly, it contains the Family and Child Service Act, indicators of abuse and neglect, guidelines for interviewing children, the role of the physician in incidents of child abuse, and the role of Alcohol and Drug Programs.

Interaction between water, sediments and radionuclides

by W.J. Snodgrass ; prepared for the Atomic Energy Control Board, the National Uranium Tailings Program and Environment Canada. Ottawa : Atomic Energy Control Board, 1988. 203 p. : ill. Bibliogr. (Research report ; INFO-0291)

MICROLOG 89-05137 3 fiche

A model-based measurements program was carried out to evaluate the primary mechanisms controlling transport of uranium 238 and thorium 232 decay chain radionuclides in Quirke Lake, a water body draining much of the uranium mining and milling district near Elliot Lake, Ontario. This program included studies of radionuclide accumulation in sediments, particle settling and lake mass-balance studies, and sediment studies to evaluate chemical fractionation, mineralogical associations, and sediment-water adsorption and release. A limnocorral experiment was conducted in an isolated portion of a lake to measure radium 226 removal from the water column and diffusion from the sediments back to the water. Modelling studies were made to assess the data.

Interaction of plasma-sprayed YBa₂Cu₃O_x coatings with alumina substrates

by C. Moreau...et al. Boucherville, Que. : National Research Council Canada, Industrial Materials Research Institute, 1988. 21 p. : ill. Bibliogr.

MICROLOG 89-00453 1 fiche (Available on fiche only)

Since the discovery of the new high T_c ceramic superconductors, much work has been done on the processing of new oxides in order to develop large scale industrial applications. The processing of the ceramic is intricate, but the plasma spraying technique can be used as a viable coating technique for the deposition of superconducting YBa₂Cu₃O_x coatings on various substrates. In the paper, such coatings and

their interaction with polycrystalline alumina substrates is discussed and modifications in coating microstructure that occur upon heat treatment are studied to select optimum spraying parameters and heat treatment conditions.

Interactions between wildlife and salmon farms in British Columbia : results of a survey

by H. Rueggeberg and J. Booth. Ottawa : Canadian Wildlife Service, Pacific and Yukon Region, 1989. xiv, 83 p. : ill. Bibliogr. (Technical report series ; no. 67) ISSN 0831-6481 ISBN 0-662-16965-4 MICROLOG 89-05548 2 fiche

Results of a study of interactions between wildlife and salmon farms in British Columbia to determine appropriate planning, management and husbandry measures to avoid detrimental impacts of wildlife on salmon farms and of salmon farms on wildlife. A questionnaire was sent to 87 salmon farming companies in June-August 1988 that requested information on the occurrence of wildlife around their farms and any changes in the frequency of these occurrences as the farms became established; the nature of interactions and problems with individual species; the measures used to counteract problems, their costs and effectiveness; and farm or site characteristics that may be factors in creating or amplifying these problems. The study originally dealt only with birds, but was extended to cover marine mammals and furbearers also.

Interfacial thermodynamics and adsorption, 1 : an introduction to surface energetics and a survey of temperature dependence studies

by C.W. Angle. Ottawa : Canada Centre for Mineral and Energy Technology, Coal Research Laboratories, 1988. vi, 60 p. : ill. Bibliogr. (Report ; CRL 88-33(TR)) MICROLOG 89-00470 1 fiche

Interfacial properties dominate the behaviour of colloidal systems. To understand these systems, a thorough appreciation of interfacial thermodynamics is useful, especially when adsorption occurs. This paper presents a discussion of the principles that govern interfaces of liquid/liquid, liquid/solid and liquid/vapour systems in relation to adsorption and the Gibbs Surface Excess. The Guggenheim-Adams model is compared with the Gibbs model. Special features of adsorption relative to thermodynamic properties, problems and assumptions for complex heterogeneous systems are discussed and the influence of temperature increase on surface entropy of liquid/vapour and liquid/liquid interfaces is

surveyed with examples. Classical empirical relations developed in the past are illustrated in examples taken from metallurgy and heat transfer studies. Surface entropy as influenced by changes in adsorption with increased temperature is discussed in relation to polarography, polymers, proteins, surfactants, and emulsions, with special emphasis given to enhanced oil recovery.

Interim pollution reduction strategy for Ontario kraft mills

Toronto : Environment Ontario, 1989. 76 p. ISBN 0-7729-4931-X MICROLOG 89-03208 1 fiche

While discharges from pulp and paper mills have decreased over the past few years, the measures taken do not provide an acceptable level of pollution abatement. Concern has

focused particularly on the discharges from the 9 mills producing bleached kraft pulp, which, because of the use of chlorine in the bleaching process, produce large amounts of chlorinated organic compounds, including dioxins and furans. In 1988, the report of a Committee reviewing toxic wastes in bleached kraft mills was released by the Ministry, and reviewed by the public and Ministry staff. This position paper describes the Ministry's program for reducing kraft mill water pollution, both as part of the Municipal-Industrial Strategy for Abatement (MISA) program and, until that program begins, by the use of control orders.

International Atomic Energy Agency safeguards : observations on lessons for verifying a chemical weapons convention

by J.F. Keeley. Ottawa : Dept. of External Affairs, Arms Control and Disarmament Division, 1988. xi, 63 p. : ill. Bibliogr. (Arms control verification occasional papers ; no. 1) French ed. (Garanties de l'Agence...) : 89-01798/1. ISSN 0840-772X ISBN 0-662-16526-8
MICROLOG 89-01797 1 fiche

As an international agency engaged in the verification of compliance respecting nuclear facilities and materials for more than 20 years, it is natural that the International Atomic Energy Agency (IAEA) should be considered as a possible model for verification organizations in other arms control and disarmament areas. This study examines the political, organizational, legal, financial, and technical aspects of the Agency's experience; observes its approach to the control problem and the coverage it provides of possible routes for acquisition of nuclear weapons; considers the factors affecting its political and technical effectiveness; and examines the political base of its activities, as well as some issues arising from the use of an international organization for the performance of verification tasks. Specific features of the Agency's structure and operations considered include its relations with states (including aspects of its personnel policies, the designation of inspectors, and information management), and a brief examination of the political structures and safeguards system.

The International competitive status of Canada's milk production sector

by R. Phillips, J. White and P. Stonehouse. Ottawa : Agriculture Canada, Policy Branch, 1989. vii, 90 p. : ill. (Working paper ; 1/89) CSI 21100.202.
MICROLOG 89-01866 2 fiche

This study was undertaken to determine the relative productivity, efficiency and competitiveness of dairy producers in selected markets. It compares the productivity of milk production in Canada with that of selected areas in Britain, the Netherlands, the United States and New Zealand. It also compares Canada's competitiveness as a supplier of milk for domestic and export processing with that of selected foreign countries. Productivity refers to relationship among physical inputs and outputs, efficiency refers to the cost of various inputs required to produce a unit of output and competitiveness is the measure of relative efficiency of producers in different countries. Data are for 1985.

Interprovincial migrants and their language characteristics, 1976-1982

by J. De Vries. Ottawa : Statistics Canada, Social and Economic Studies Division ; Dept. of the Secretary of State, Social Trends Analysis Directorate, 1985. 77 p. Bibliogr. (Research paper ; no. 18) French ed. (*Les Migrants interprovinciaux...*) : 89-03397/1. CSI 01100.234.
MICROLOG 89-03396 1 fiche

The analysis is based on the August 1982 Current Population Profile. The report is divided into two parts. The first part provides a description of the interprovincial migration flows and their characteristics; special attention is paid to the language characteristics of the migrants. In the second part, migration is considered in relation to the initial population or sub-population.

An Introduction to the modeling and analysis of flexible manufacturing systems with Petri nets

by I. Muftic. Ottawa : National Research Council Canada, Division of Mechanical Engineering, 1988. vi, 25 p. : ill. Bibliogr. (Technical report ; TR-SYS-021) MICROLOG 89-03268 1 fiche (Available on fiche only)

Petri nets provide useful concepts and tools for studying the structure and control of concurrent systems. They have been used in the modeling of a wide variety of systems from

computers to sociotechnical systems. This report discusses the use of Petri nets in the modeling and analysis of flexible manufacturing systems (FMS). Net concepts relevant to the manufacturing systems are introduced and qualitative properties such as the existence or absence of deadlock, safeness, and boundedness are discussed using the method of invariants. The modeling and analysis techniques are illustrated by means of simple manufacturing systems and the concepts of coloured Petri nets and their usefulness in the modeling of FMS is considered.

Inventaire archéologique du parc historique national de la forteresse de Louisbourg, saison 1987-88

par C.A. Burke. Ottawa : Environnement Canada, Service canadien des parcs, 1989. 16 p. : ill. Bibliogr. (Bulletin de recherches ; no 277) L'éd. anglaise (Progress of the archaeological...) sur la même fiche. ISSN 0228-1236
MICROLOG 89-05593 1 fiche

La deuxième saison de l'inventaire archéologique de Louisbourg a débuté en juin 1987. L'objectif immédiat des travaux était de finir de relever les vestiges de la Côte du Nord et d'entreprendre l'étude d'autres secteurs du parc. Quelques sondages d'essai ont été proposés du côté nord de la pointe de Rochefort dans le but de mesurer les pertes dues à l'érosion dans les cimetières historiques du secteur. Ces travaux ont été entrepris en octobre. A la fin de la saison 1987, 433 vestiges avaient été relevés. Ce document décrit les réalisations de la deuxième année des travaux. Les vestiges sont traités dans le contexte géographique du lieu où ils ont été trouvés.

Investigation of chloride migration in reinforced concrete under application of cathodic protection

by J.S. Poland and J.A. Page. Downsview, Ont. : Ministry of Transportation, Research and Development Branch, 1988. iv, 46 p. : ill. MICROLOG 89-03225 1 fiche

Corrosion of reinforced concrete bridge structures in Ontario is a serious problem. Cathodic protection is a recognized way to control this corrosion and a number of bridges in the province now have these systems in place. This project was initiated to examine the mobility of the chloride ion in concrete under cathodic protection and to discover whether long term application reduces the chloride ion content in the concrete surrounding the reinforcing steel. The study examined the effect of power interruptions in these systems, the rate of recovery from them, and the possibility that a minimal current density could maintain an established cathodic protection system.

An Investigation of the radiolytically enhanced oxidation of carbon-14 particulate

by F.R. Greening. Toronto : Ontario Hydro, Research Division, 1988. 19 p. : ill. Bibliogr. (Report ; no. 88-160-K) MICROLOG 89-02540 1 fiche

The injection of oxygen into the nitrogen-filled gas annulus systems at Pickering Nuclear Generating Station was proposed as a method of carbon-14 (C-14) decontamination prior to retubing. The thermal oxidation of C-14 particulate produced in a nitrogen gas annulus system had already been investigated but until the present study, no data was available on the influence of radiation of C-14 gasification rates. Samples of particulate C-14 were therefore subjected to radiolysis in air in a high-flux research reactor for periods up to 4 days and their C-14 oxidation rates observed. Oxidations of non-active carbon-12-hydrocarbons, also present in gas annulus deposits, were also observed.

An Investigation of the result and benefit of grading potatoes into storage

New Brunswick Research and Productivity Council. S.I. : Canada-New Brunswick Agri-Food Development Agreement, 1988. v, 47 p. French ed. (Etude des résultats...) : 89-04196/1. MICROLOG 89-04195 1 fiche

Pre-grading (including sizing) of potatoes into storage is not a common practice in New Brunswick although it is standard practice in other potato producing areas. To determine the effect of before-storage grading on potato quality, a survey of potato packing houses was undertaken to determine their requirements in the foreseeable future and the extent to which cost recovery may be possible through the marketing of off-grade potatoes; the last 8 years' grading data of a recently ceased potato packing operation was analyzed to determine the extent of occurrence of off-grade potatoes delivered from several operations at various times; and experimental field studies were undertaken to determine the additional quantities of extraneous material which would be removed with more rigorous grading, and the extent to

which grading prior to storage could improve the quality of potatoes taken out of storage. AG AP CA PR SC

Investigation to eliminate the negative effect of dust-suppressing surfactants on flotation : Kidd Creek ore

by M.A. Cristovici and D.R. McCarthy.
Ottawa : Canada Centre for Mineral and Energy Technology, Mineral Sciences Laboratories, 1988. iii, 20 p. Bibliogr.
(Report : MSL 88-84(IR)) *Project 14.39.01 ventilation and respirable dust*.
MICROLOG 89-00485 1 fiche

Surfactants received from various manufacturers of chemicals were investigated for their properties and ability to suppress sulphide ore dust. Some wetting agents were selected as potential dust suppressors, but it was found that they interfered with the flotation process. Research work has succeeded in developing a technique which would eliminate the surfactants' detrimental effect on flotation. The case chosen for this work was the copper-zinc-pyrite Kidd Creek ore. The present report deals with the experiments carried out to select dust suppressors for Kidd Creek ore and to eliminate surfactants' negative effect on flotation of this ore by using the carbon adsorption technique.

Investigations into the 1985 migratory game bird season, The Pas, Manitoba

by W.T. Toderan. Winnipeg : Manitoba Natural Resources, Wildlife Biological Services, 1986. iv, 30 p. Bibliogr. (Manuscript report ; no. 86-02)
MICROLOG 89-01576 1 fiche

The Pas is an important hunting area for non-resident and resident waterfowl hunters. As a result of declining duck populations, restrictions were introduced in 1984 and subsequent years. As part of an ongoing Provincial program to collect information on waterfowl seasons and hunters, a 2 part study involving hunter interviews and landowner/lodge/motel owner concerns was conducted during the 1985 hunting season (September-October) to determine the Canadian and non-Canadian use of the resource and the commercial facilities in The Pas area, as well as the concerns of waterfowl hunters and commercial operators who provide accommodation to the hunters. Hunter interviews and bag checks, and lodge owner and motel owner interviews were conducted. Waterfowl were identified by species, aged, sexed, and data recorded. Prior to the start of the season, motel and lodge owners were provided with record books to record hunter length of stay, number of hunters, and total number of birds harvested. Information on hunter vehicle activity was also monitored.

Investigations on peat energy for process heat and manganese production : final report -- Rev.

submitted to Joe Robert. Fredericton : Research and Productivity Council, 1987. i, 52 p. : ill. Bibliogr.
MICROLOG 89-05735 1 fiche

Results of a study to combust thermal and manganese peats in a circulating fluidized bed combustor and to evaluate the performance of both as fuels. The thermal peat was combusted in normal oxidizing conditions, while the manganese peat was combusted in reducing conditions. This was necessary to convert the manganese into the monovalent form required for further treatment of the ash to recover the manganese. Variables recorded hourly included air flow rates, peat feeder weight, ash discharges and temperatures in the reactor. The flue gas composition was monitored continuously and the hourly average was recorded.

Investment limits for Nova Scotia dairy farms, 1988 : a guide for the use of borrowed capital on Nova Scotia dairy farms

Nova Scotia. Farm Management Division. Truro, N.S. : The Division, 1988. 14 p. *CSI 51100.016*. MICROLOG 89-00492 1 fiche

Modern dairy farms are very capital intensive. Large amounts of borrowed funds are usually required when a going concern changes owners, or when a new dairy farm is being established. Borrowers and lenders of this capital both have a vested interest in evaluating accurately the capacity of the dairy business to repay principal and interest, as well as compensating the owner for his or her labour and management. This guide assists in the process, making no allowance to check-offs levied against members of cooperative dairies. Repayment/capitalization rates are given by percentage borrowed by production rate of farm.

Ion probe microanalysis of gold in common sulphide minerals and implications for enhanced recovery from refractory gold

by S.L. Chrystosoulis. London, Ont. : University of Western Ontario, Surface Science Western, 1989. 371 p. : ill. Bibliogr. *CANMET contract: 79037-01-SS*. MICROLOG 89-04477 4 fiche

Ion probe microanalysis, or secondary ion mass spectrometry is a sensitive microbeam technique enabling the analysis of individual sulphide grains with a minimum detection limit of 0.5 ppm or better per mineral grain. Therefore, it is the ideal tool to solve the long standing problem on the presence of invisible gold. This report is the result of a collective effort to demonstrate quantitatively the presence of invisible gold in sulphides from several

Canadian refractory gold ores, as well as in the copper anodes from the 4 Canadian refineries. Case studies are given for Trout Lake Mine, MB; Moberly Mine, QC; Elmtree deposit, NB; Congress Mine, BC; Lara deposit, Vancouver Island, BC; Golden Pond, QC; HW Mine, BC; Estrades deposit, QC; and Ketza River Mine, YT.

The ion-exchange removal of cyanide from gold-mill wastes for environmental benefit

by A.J. Gilmore. Ottawa : Canada Centre for Mineral and Energy Technology. Mineral Sciences Laboratories, 1976. 30 p. : ill. Bibliogr. (Report ; MSL 76-26(IR))
MICROLOG 89-02405 1 fiche

Environment Canada has proposed an objective of 0.1 ppm total cyanide for cyanidation effluents discharged to the water environment and has drafted regulations for control of heavy metal content in processed effluents for the base metal, iron ore and uranium mining and milling operations. This report describes an investigation to make an ion-exchange pilot plant study of the practicability of removing cyanide and metal cyanide complexes from a cyanidation waste effluent. The waste used in the study was a filter-press bleed effluent from the Dome gold-cyanidation operation in the Timmins area of Ontario. The report describes the adsorption and desorption phases of the pilot plant procedure, the recovery of the metal cations, and an economic evaluation of the concept.

Isotopic mass balance measurements for determination of coal-derived liquid contribution into reprocessing distillates

by K. Muehlenbachs. Edmonton : University of Alberta. Dept. of Geology, 1989. 42 p. : ill. Bibliogr. CANMET contract: 79143-01-SS.
MICROLOG 89-05082 1 fiche

Co-processing coal with bitumen, vacuum resids or other solvents yields a very complex slate of products which can be estimated but fails to identify the contribution of coal to specific product fractions. Stable carbon isotope monitoring of fuels and products can, by mass balance, quantitatively determine the coal contribution to each fraction. This report compares, under identical autoclave run conditions, the solubilization of Forestburg coal in Athabasca pitch, vacuum resid blend - Blend 24, hydrogenated Anthracene oil, and tetralin. For the Athabasca and Blend 24 samples, the solubilization of coal as a function of coal loading (0, 10, 20, 30%) was also investigated. All experiments were loaded with the same concentration of FeSO₄. Details of the autoclave, run conditions and product workup are also given.

Item order effects on the measurement of abortion attitudes : a quasi-experimental design

by E. TenVervert, M.W. Gillespie and J. Kingma. Edmonton : University of Alberta, Dept. of Sociology, Population Research Laboratory, 1988. 29 p. Bibliogr. (Edmonton area series report ; no. 60) ISSN 0703-8763
MICROLOG 89-01432 1 fiche

A problem in measuring change in attitudes is separating the change due to the sequence of the questions in the surveys from real change. This study investigates empirically the extent to which the responses to a set of attitude items are affected by the order of presentation. It also determines the effects of the item order manipulations on the scalability of the items. These issues are addressed by analyzing the six abortion items that appeared in the 1984 Edmonton Area Survey and the 1987 All Alberta Study.

IWD-Northwest Territories water quality program, 1985-1990 : strategy paper

Yellowknife : Environment Canada, Conservation and Protection, Inland Waters and Lands, Western and Northern Region, 1984. 45 p. MICROLOG 89-03354 1 fiche

The Inland Waters Directorate (IWD) maintains a responsibility centre in Yellowknife, NWT, that operates day-to-day water quality program activities consisting of a small network of 22 stations designed in the 1960s to provide some baseline water quality data. However, due to increasing development and the range and number of users of water quality information, both of which have broadened and increased, it was felt there was a need for an evaluation of the IWD services. This paper identifies the priority issues to be addressed in the water quality program and recommends a long-term direction for the development of water quality monitoring activities, including networks, surveys and studies. The procedures for promoting and assisting in the development of water quality objectives are defined and a comprehensive strategy is established to allow for a subsequent detailed plan of action and future directions.

Job loss and labour market adjustment in the Canadian economy

by G. Picot and T. Wannell. Ottawa : Statistics Canada, Analytical Studies Branch, 1987. 46 p. : ill. Bibliogr. (Research paper series ; no. 5) *French ed. (Perte d'un emploi...)* : 89-02309/1. CSI 01100.223.
MICROLOG 89-02310 1 fiche

Between 1981 and 1984, many Canadians were confronted with permanent job loss. This report focusses on the workers who lost their jobs during this period and were not recalled or rehired by the same employer. More specifically, the analysis concentrates on the incidence of job loss among different groups, and their labour market adjustment experiences up to the end of 1985. These experiences are measured in terms of the length of job search, the proportion finding new jobs, the tendency of these workers to retrain or relocate, the wage differential between the lost and new job, and movement between industrial sectors

Joint patterns at the headscarp of the 1965 Hope Slide

by R.S. Von Sacken, K.W. Savigny and S.G. Evans. Ottawa : Energy, Mines and Resources Canada, Geological Survey of Canada, 1989. 10 p. : ill. Bibliogr. (Open file : 2012)
MICROLOG 89-05870 1 fiche

Early in the morning of January 9, 1965, a rock avalanche with an estimated volume of 47 x 10(6) cubic metres descended the southwest

slope of Johnson Park, located southeast of Hope, approximately 160 km east of Vancouver. The slide was Canada's largest known slide and although the potential for a further slide poses an ongoing hazard to any development in the valley below, no detailed study of the rock mass has been undertaken. In an effort to better understand the failure mechanisms of the 1965 event, together with the significance of the possible slope deformation features noted, mapping of the rock mass was carried out at the headscarp of the 1965 slide and adjacent Johnson Ridge during July and August 1988. This report presents a preliminary interpretation of these data.

A Laboratory evaluation of concrete surface sealants, phase 2

by R.M. Rollings and B. Chojnacki. Toronto : Ministry of Transportation, Materials Information, Engineering Materials Office, 1988. 23 p. : ill. Bibliogr. (Materials information report ; MI-127) MICROLOG 89-00746 1 fiche

Freezing conditions and the use of deicing salt on highways cause spalling and surface scaling

of concrete containing reinforcing steel in bridge decks, parapet walls, structural barrier walls, retaining walls, abutments, piers and columns. A laboratory testing program of coatings and penetrating sealants was carried out in 1985. This report details the continuation of the sealant evaluation. Ten concrete surface sealants were evaluated for their effectiveness in increasing the resistance of concrete to penetration by water and chloride ions, and to salt scaling. The treated concrete was also tested for moisture vapour permeability and rapid chloride permeability. All tests were carried out using concretes with low and normal air contents.

Laboratory evaluation of recycled hot mixes, vol. 1 : low temperature performance

by P.E. Joseph, K.K. Tam and D.F. Lynch.
Toronto : Ministry of Transportation,
Engineering Materials Office, 1989. 32 p. : ill.
Bibliogr. (Report ; EM-88) ISBN
0-7729-5896-3
MICROLOG 89-05486 2 fiche

Following the construction of 80 recycled hot mix (RHM) projects in Ontario, a long term monitoring program was initiated to evaluate the performance of such asphalt pavements yearly. Seven test sites from different contracts covering all the regions of Ontario were selected. Initial evidence, based on the limited performance data taken from these sites after 4-5 years of construction, suggests that RHM design needs improvement, particularly for cracking. This created a need for an objective performance evaluation of RHM as compared to the traditional HL4 mix. With this need in mind, an experimental program was undertaken to carry out a series of laboratory tests to evaluate the low temperature performance of recycled asphaltic concrete mixtures.

Laboratory investigation on the evaluation of crude oil concentration by spectroscopic methods

by P. Cielo and K.C. Cole. Boucherville, Que.
National Research Council Canada, Industrial
Materials Research Institute, 1988. 21 p. : ill.
Bibliogr.
MICROLOG 89-00542 1 fiche (Available on
fiche only)

Measurement of oil and gas concentration in the liquid extracted from wells is required for taxation purposes. The liquid is extracted as a mixture of mainly oil and water, with a certain amount of methane dissolved into it. The usual method of separation involves depressurization of the liquid in large decanters and manual evaluation of the three separated phases. This report summarizes the laboratory results of a transmission spectroscopic evaluation done on crude oil and water samples of typically 1 mm thickness. The possibility of extending such measurements to an in-situ device, as well as the expected accuracy, are discussed.

Laboratory study of the response of round whitefish larvae to a benthic sled sampler

by J.S. Griffiths. Toronto : Ontario Hydro,
Research Division, 1989. iv, 16 p. : ill.
Bibliogr. (Report ; no. 88-334-K)
MICROLOG 89-04447 1 fiche

Ongoing studies to assess possible thermal effects on spawning round whitefish at Pickering, Darlington, and the Bruce Nuclear Power Development used a benthic sled to sample the larvae. Due to small and irregular catches of the larvae in the field, a study of larval response to the sled sampler was conducted in the laboratory, using a 1/3 scale model in a long flume (15 m x 1.2 m) filled to a depth of about 0.8 m. For each test, 400 newly hatched larvae were placed in a screened central section of the flume. This area was covered by a cobble substrate. At the start of a test, the screens were raised, and the sled was towed the length of the flume, passing the larvae. Larvae captured by the sled were enumerated. A video system with a low-light camera was used to monitor larval response during each test.

Lambton TGS chimney 2 condition survey of concrete shell

by E.J. McColm. Toronto : Ontario Hydro, Research Division, 1988. ii, 15 p. : ill. (Report ; no. 88-158-K) MICROLOG 89-02538 1 fiche

An investigation of the concrete shell of Lambton Thermal Generating Station Chimney 2 was conducted in May 1988, as part of the Life Assessment Program. The investigation consisted of visual observations, mapping of cracks, measurement of crack widths, ultrasonic testing to determine the depth of crack penetration into the shell, and a visual inspection of repaired cracks. This report summarizes the findings of the inspection and includes a sketch showing the location of the main cracks on the exterior surface of the concrete shell.

Laminar air flow super window

G.K. Yuill and Associates. Ottawa : Energy, Mines and Resources Canada, Renewable Energy Branch, 1987. ix, 82 p. : ill. Bibliogr. MICROLOG 89-05957 2 fiche

This report describes the first phase of a project to develop a commercially viable laminar air flow super window (LAFSW). This first phase determined if the LAFSW was theoretically and economically feasible and if there were any practical barriers to its use. The project used an approximate analysis of the heat transfer problem to determine the appropriate size range for the window; developed a computer program to conduct a more precise analysis of the heat transfer problem; and constructed and installed a LAFSW to check for any practical difficulties that might arise.

Descriptions are given of the method of production, burning systems, other applications of wood fuel, technical and financial alternatives, and factors to be taken into consideration when contemplating conversion to such a system. ● AP CA EN SC

Large truck braking at signalized intersections

by D.J. Parker and B.G. Hutchinson. Toronto : Ministry of Transportation, Research and Development Branch, 1988. ix, 71 p. : ill. Bibliogr. MICROLOG 89-01767 1 fiche

The braking capabilities of a range of truck types operating at various speeds and under a range of loading conditions on pavements with varying skid resistance characteristics are analyzed. Trucks include straight two- and three-axled trucks, tractor semi-trailers with and without belly axles and A- and B-train double trailer combinations. Braking distance, braking efficiency, and signal clearance time are calculated at the point at which wheel lock-up first occurs, equivalent to controlled braking. The analyses use a set of simplified braking models developed at the University of Michigan, adapted to the special needs of this report. ON PR SC TR

Laser ignition of oil spills : telescope assembly and testing

by M. Frish...et al. Ottawa : Environment Canada, Environmental Protection Directorate, River Road Environmental Technology Centre, 1989. 23 p. : ill. Bibliogr. MICROLOG 89-03655 1 fiche

In the event of an Arctic oil spill, it is expected that oil reaching the surface of an ice field melting during springtime will form tens of thousands of small pools. To remove these pools before the ice melts, they are set afire

from an airborne vehicle using pyrotechnic ignitors. These ignitors have a 5-year life, are difficult to manufacture and transport in sufficient numbers, and would be expensive in dealing with more than one spill. During the past 4 years, a novel dual-laser approach to starting pool fires was developed, with the laser mounted in a helicopter. This report describes the telescope developed to focus the pulsed "igniter" laser and the testing of ignition. In addition, two techniques for automatically focusing the telescope were studied. ● CA EN EV SC

Laser surface hardening of steels

by M.U. Islam and W.J. Wells. Ottawa : National Research Council Canada, Division of Mechanical Engineering, 1984. viii, 52 p. : ill. Bibliogr. (Technical report ; TR-MTC-002) (Rapport technique ; TR-MTC-002) MICROLOG 89-00584 1 fiche (Available on fiche only)

Study of the laser hardening response of AISI 01, AISI 4340, carburized AISI 1020, and carburized AISI 9310 steels in various prior heat treatment conditions. The laser operating parameter combinations are established to produce maximum hardened case depths without surface melting. CA PS SC

Laser-based separation of zirconium isotopes

by H.D. Morrison. Toronto : Ontario Hydro, Research Division, 1988. 36 p. : ill. Bibliogr. (Report ; no. 87-322-K) MICROLOG 89-02506 1 fiche

A recent report indicated that reducing the concentration of zirconium-91 reduces significantly the neutron absorption cross-section of zirconium, an effect which is of great interest to the nuclear power industry since zirconium is the major element in the core components of nuclear reactors. Therefore, lower neutron absorption in reactor components would provide greater flexibility in the design of nuclear reactors. The laser-based method for zirconium isotope separation is known as atomic vapour laser isotope separation (AVLIS). This report identifies a considerable improvement in proposed schemes for isotopic depletion of zirconium-91 based upon the AVLIS method. EN ON PR PS SC

Late Cretaceous and paleocene mammal localities of southern Alberta

by R.C. Fox. Drumheller, Alta. : Tyrrell Museum of Palaeontology, 1988. 38 p. : maps. Bibliogr. (Occasional paper of the Tyrrell Museum of Palaeontology ; no. 6) ISBN 1-55006-108-9 MICROLOG 89-01940 1 fiche

Library resources in the schools : pedagogical and organizational aspects

by Y. Léveillé. Quebec : Gouvernement du Québec, Ministère de l'éducation, Direction de la technologie éducative, 1987. 51 p. : ill. ISBN 2-550-13574-1
MICROLOG 89-03184 1 fiche

This document comprises 4 parts. The first section contains basic information and background on library resources: definition, organization, roles, management principles, and user training. The second section suggests some tools for effective management of library resources. Subjects include selection and pruning of resources, user training programs, and the library resource system. The appendix brings together a variety of texts which will enable the reader to trace the historical development of the notion of library resources. Finally, it presents an annotated bibliography.

The Licensing system for fish buyers and vendors : a review of provincial roles and responsibilities

by E. Blewett and L. Huestis. Victoria : Ministry of Agriculture and Fisheries, Aquaculture and Commercial Fisheries Branch,

1988. v. 85 p. Bibliogr.
MICROLOG 89-01787 1 fiche

The Ministry initiated a review of their licensing systems for fish buyers and vendors to define their roles and responsibilities. This study provided the Ministry with recommendations on whether the government should or could withdraw from these roles and responsibilities, and which activities should be carried out by the different Ministries. Information and data were gathered from personal interview surveys of fishermen and of officials of the provincial and federal governments and municipal health units. Fisheries legislation and regulations, constitutional case law, technical reports and policy documents, and catch statistics for licensed buyers were reviewed. Background information on constitutional jurisdiction, legislative authority, and administrative arrangements regarding licensing, inspection, and enforcement provided the basis for an analysis of the primary purpose of the licensing schemes and of whether and how the province should be involved in the regulation of various types of illegal fish sales.

Light bulb filament impact dynamics study in support of aircraft accident investigation

M.R. Poole and M. Vermiju : prepared for the Transportation Development Centre ; by the Aviation Safety Engineering Branch, Canadian Aviation Safety Board. Montreal : Transportation Development Centre, 1985. xiv. 172 p. : ill. Bibliogr. TP 6254E.
MICROLOG 89-06047 2 fiche

Report on a study conducted from August 1982 to October 1984 to investigate the behaviour of aircraft light bulbs at impact. The study mainly consisted of laboratory impact testing of over 400 General Electric type 327 miniature light bulbs, used to correlate the type of damage exhibited by the tungsten filament to the state of the light bulb at impact (i.e., on or off). The impact tests were instrumented to provide acceleration-time data to relate severity and type of impact to filament change. Analysis of light bulbs can be a valuable tool for aircraft accident investigators as many aircraft contain numerous light bulbs to illuminate various caution, warning, and system failure indicators.

Limestone industries of Ontario

prepared for the Aggregate Resources Section, Land Management Branch, Ontario Ministry of Natural Resources ; by Derry Michener Booth and Wahl and staff of the Engineering and Terrain Geology Section, Ontario Geological Survey, Ministry of Northern Development and Mines. Toronto : Ministry of Natural Resources ; Ministry of Northern Development and Mines, 1989. 3 v. : ill., maps. Bibliogr. Contents: Vol. 1 : *Geology, properties and economics -- vol. 2 : Limestone industries and resources of eastern and northern Ontario -- vol. 3 : Limestone industries and resources of central and southwestern Ontario*. ISBN 0-7729-3533-5

MICROLOG 89-05464 7 fiche

Examination of Ontario's limestone industries as a geological resource, including limestone, dolostone, marble, and carbonates, and through the various industries which rely on these resources to manufacture such products as construction aggregate, cement, lime, fillers and extenders, building stone and pulverized stone. The study brings together the most up-to-date geological information pertaining to carbonate rocks and describes the current operations of the members of the limestone industry. Field work and data compilation were performed in 1986 and 1987, with changes in plant ownership and design current as of the summer of 1988. The geological and plant site descriptions are organized based on the Ministry administrative districts.

Link availability and rain attenuation exceedance characteristics for EHF satellite communications with arbitrary link parameters in Canada

by S.M. Khanna and D.M. Adams. Ottawa : Defence Research Establishment Ottawa, 1988. xiv, 176 p. : ill. Bibliogr. (Report ; no. 991)
 MICROLOG 89-02075 2 fiche

The transmitted electromagnetic wave at frequencies above 10 GHz is severely attenuated by rain during its passage through the earth's atmosphere. Since rain is a random process, statistical methods are used to evaluate the problem. The paper presents a brief review of radio wave attenuation in an earth-space path, followed by details of the rain attenuation prediction method used. Experimental rain statistics of approximately 500 station years from 47 weather stations in various parts of the country are used for the calculation of rain attenuation statistics for any arbitrary location, for any geostationary satellite link at any frequency in the 10-45 GHz range. Representative results in the form of tables and contours are included for SATCOM links at 20, 30 and 44 GHz.

Literature review for the National Uranium Tailings Program (NUTP) long term effects of natural events on uranium tailings impoundments

by P. McInnis. Ottawa : Energy, Mines and Resources Canada, Canada Centre for Mineral and Energy Technology, National Uranium Tailings Program, 1985. ix, 164 p. : ill., maps. Bibliogr.
MICROLOG 89-00973 2 fiche

Based on a literature review and personal communications with experts in the respective fields, this report determines the long-term effects of natural events on existing uranium tailings impoundments in northern Saskatchewan and at Bancroft and Elliot Lake, Ontario. Natural events studied included floods and heavy precipitation, high winds, earthquakes, forest fires, and climatic change (glaciation, drought and the carbon dioxide-greenhouse effect). General conclusions included a ranking of events in order of the severity of radionuclide release and a summary of the severity of future radionuclide release from each tailings site.

Literature review for the National Uranium Tailings Program (NUTP) physical parameters of tailings and underlying aquifer study on contaminant migration

by M. Leclair. Ottawa : Energy, Mines and Resources Canada, Canada Centre for Mineral and Energy Technology, National Uranium Tailings Program, 1985. iv, 50 p. : ill., maps. Bibliogr.
MICROLOG 89-00972 1 fiche

A review of the published literature and personal communication with experts in the field of tailings, physical property studies, and modelling was conducted to clarify and/or better understand certain physical parameters of tailings and their effect on the removal of radionuclides and other contaminants associated with uranium mill tailings. Coverage includes groundwater flow rates, contaminant flow rates, hydraulic gradient, porosity, density, diffusivity, dispersion, and soil temperature. These points, the effect of their variations with time over the long-term, and some specific erosion processes are discussed.

A Literature review of life histories of some species of fish ... that may be introduced into the Hudson Bay watershed from the Missouri River watershed as a result of the Garrison Diversion

by D.P. Swain, A.J. Derksen and J.S. Loch. Winnipeg : Dept. of Natural Resources, Fisheries Branch, 1980. 180 p. : maps. Bibliogr. (Manuscript report ; no. 80-37)
MICROLOG 89-00697 2 fiche

A number of fish species now occur in the Missouri River watershed that are not found in the Hudson Bay watershed. Completion of the Garrison Diversion Project in North Dakota, as proposed in 1976, will provide a high volume connection between the waters of the two watersheds. Rainbow smelt, gizzard shad, paddlefish, shovelnose and pallid sturgeon, and shortnose gar are some of the species that may be transferred into the Hudson Bay basin. Information on the biology and distribution of these fish was collected from the literature in order to assess the potential impact of these species on indigenous fish. The various life histories included in the report provide information on habitat and seasonal distribution, spawning sites, spawning seasons and behaviour, sexual maturity, sex ratios, fecundity, early development, growth, food habits,

parasites and known effects on other fish of these six species.

Little Waterhen River fish movement and walleye tagging study, 1971-1972

by G.A. Edwards and W.N. Howard. Winnipeg : Dept. of Natural Resources, 1980. vii, 53 p. : ill. Bibliogr. (Manuscript report ; no. 80-8)
MICROLOG 89-00691 1 fiche

Fluctuating walleye stocks in Lake Winnipegosis and the contention by commercial fishermen that walleyes are migrating downstream from and out of the lake led to a fish movement study conducted in 1971-72 on the Little Waterhen River, which flows from Lake Winnipegosis into Waterhen Lake. Tagging was conducted from June 2, 1971 to June 6, 1972. Two trap nets were used to catch both upstream and downstream fish. Tags were recovered by anglers and commercial fishermen during the respective open seasons.

Load forecasts report no. 881212 : system demands

Toronto : Ontario Hydro, Economics and Forecasts Division, 1989. ii, 92 p. : ill.
CSI 56125.005.
MICROLOG 89-03824 2 fiche

Report on the short-term (1988-93) and long-term (1994-2010) load forecasts. The short-term was prepared using the results of a customer survey, updated economic forecasts, electricity demand forecast models, the latest analysis of deviations of demand from last year's predictions, and a forecast of incentive-driven demand management and load displacement generation. The short-term forecast includes a comparison of the primary load forecast with last year's and this year's basic load forecast, a discussion of incentive-driven demand management and load displacement generation, and a summary of the regional estimates. The long-term forecast takes into account the short-term forecast, the long-term economic outlook, econometric model estimates, end-use model estimates, the 1987 load forecast, judgmental factors, and the incentive-driven demand management and load displacement generation. Load testing and rehabilitation of the Sioux Narrows bridge

by R. Taylor. Downsview, Ont. : Ministry of Transportation, Research and Development

Branch, 1987. viii, 180 p. : ill. Bibliogr.
MICROLOG 89-03226 2 fiche

The Ontario Ministry of Transportation (MTO) has been actively engaged in the research and development of wood bridges since 1973, with the Sioux Narrows bridge playing an important role. Built of B.C. Douglas Fir in 1936, it supports a main clear span of 64 m. It was proposed that the bridge be replaced in 1974, but due to the efforts of a group of university students, MTO initiated an in-depth investigation. This report documents the extensive work performed by MTO, including a detailed field inspection, numerous structural analyses and field testing, and the successful replacement of the old nailed laminated deck with a new prestressed wood deck in 1982.

Locating postal relay boxes using a set covering algorithm

by J. Bouliane and G. Laporte. Montreal : Université de Montréal, Centre de recherche sur les transports, 1989. 8 p. Bibliogr.
(Publication ; no. 611)
MICROLOG 89-02529 1 fiche

Over the last decade, some members of this research centre have undertaken studies in cooperation with Canada Post Corporation to improve some of their operations. These include post-box collection routes and door-to-door mail delivery. This study deals with the location of relay boxes along mail carrier's routes. The location of these relay boxes is important both for the delivery vans and the mail carrier. The problem is considered and modelled as a set covering algorithm and is solved by means of a simple heuristic solution procedure.

Logging in Kootenay landscapes : the public response

by C. Berns and P. Bekker. Victoria : Ministry of Forests and Lands, 1989. iv, 29 p. : ill. Bibliogr. (Land management report ; no. 57)
ISSN 0702-9861 ISBN 0-7718-8743-4
MICROLOG 89-05272 1 fiche

As recreation and tourism become increasingly important components of the economy in British Columbia, more attention is being directed towards the scenic values of the landscape. This study examined whether the guidelines provided in the Forest Landscape Handbook describe adequately public perceptions and preferences for forest landscapes. A photo-questionnaire showing photographs of forest landscapes in the east and west Kootenays representing the types of landscapes and degrees of forest alteration occurring in that region was prepared. Respondents were asked to rate each photograph according to their liking on a 5-point scale. Several questions were also asked about attitude to the visual impacts of logging and clearcutting, and the importance and priorities of specific forest management aspects. Six communities were selected for sampling. This report presents the results of the questionnaire.

Logistic regression analysis of sample survey data

by G. Roberts and S. Kumar. Ottawa : Statistics Canada, Methodology Branch, Census and Household Survey Methods Division, 1985. 31 p. : ill. Bibliogr. MICROLOG 89-03512 1 fiche

Standard chi-squared or likelihood ratio test statistics for logistic regression analysis, involving a binary response variable, are adjusted to take account of the survey design. These adjustments are based on certain generalized design effects. Logistic regression diagnostics to detect any outlying cell proportions in the table and influential points in the factor space are also developed, taking account of the survey design. Finally, the results are utilized to analyse some data from the October 1980 Canadian Labour Force Survey.

Long term loading of residential floor trusses

submitted to Fred Plimmer, by J.A. Thompson and M.M. Lepper. Ottawa : Canada Mortgage and Housing Corporation, 1988. 36 p. : ill. MICROLOG 89-04399 1 fiche

This report is a continuation of an earlier project in which 80 full size, wood, parallel chord residential floor trusses were tested to failure. Sixteen different truss configurations were tested and models were developed to predict the strength and stiffness of full size trusses based on tests of truss components. This report presents the results of long-term loading tests using 6 of the original truss designs. The long-term loads were sustained for 26 months beginning November 29, 1983 and ending February 6, 1986. The loads were then removed and the trusses were tested to failure approximately 1 week later.

Long-term forecasts for the Niagara River flows

by F. Camacho. Toronto : Ontario Hydro, Research Division, 1989. iii, 96 p. : ill. Bibliogr. (Report ; no. 88-327-K) MICROLOG 89-04432 2 fiche

Ontario Hydro periodically prepares 6-years-ahead forecasts for the Niagara River flows to plan the usage of the water resources during the operation of the electrical system. This report presents the results of an assessment study of the forecasting model used, evaluates the forecast ability of the model, and determines if the model could be improved upon. A forecasting competition is used, with the root mean square error as the index of the forecast ability. A total of 33 models and 18 validation periods are included in the competition.

Losing a home : experiences under Ontario's Rental Housing Protection Act : final report

prepared for the Federation of Metro Tenants' Associations, the Federation of Ottawa-Carleton Tenants' Associations and the Ontario Ministry of Housing ; by the Social Planning Council of Metropolitan Toronto. Toronto : The Council, 1988. xxvi, 146 p. : ill. Bibliogr. ISBN 0-919456-69-3 MICROLOG 89-05671 2 fiche

This study is concerned with efforts to stop the erosion in the supply of affordable housing, and the experience of administering the Act. It examines experiences of tenants who may be facing dislocation as a result of conversion in the tenure or use of their buildings, demolition or renovation and repair requiring vacant possession, as well as tenants who were recently displaced by these and similar events. It concerns the situation in the 6 area municipalities that comprise Metropolitan Toronto and in the Regional Municipalities of Ottawa-Carleton and Hamilton-Wentworth. It reviews trends in the supply and affordability of the rental housing stock, and analyzes the administration of the Act. Finally, it summarizes legislation and policy and the background to it in other North American jurisdictions.

Losses in timber values associated with distorted growth in immature Douglas-fir

by G.R. Middleton...et al. S.I. : Forest Resource Development Agreement, 1989. vi, 20 p. Bibliogr. (FRDA report : 050) ISSN 0835-0752 ISBN 0-7726-0913-6 MICROLOG 89-02957 1 fiche

Lumber yields from a sawmill recovery study were used to quantify variation in tree values associated with growth distortion, prevalent in two stands of late immature Douglas-fir located in the Wetter Maritime CWH biogeoclimatic subzone on the west coast of Vancouver Island. Following preliminary sampling of 200 potential study trees, 42 were selected according to size, branching, and sinuosity. These trees were felled, transported to a sawmill, and converted to lumber. Lumber grade and volume yields were recorded and used to calculate values for each study tree. Analysis of variance was used to test preliminary branching and sinuosity indices for their effect on tree value. To investigate the possibility that growth distortion could result in an increase in drying defects, lumber obtained from the distorted trees was kiln dried.

Low level radioactive incinerable waste characterization

by A.S. Williamson. Toronto : Ontario Hydro, Research Division, 1988. 11 p. Bibliogr. (Report ; no. 88-22-K) MICROLOG 89-02622 1 fiche

As part of the systematic radioactive waste characterization research underway to provide data to assist in waste management strategy development, the physical and radiochemical composition of 1115 bags of low level radioactive incinerable waste was determined. Each bag was weighed and visually inspected to determine the composition of the contents by volume of the major material classifications. The contact dose rate of each waste bag was measured. Bags having a contact dose rate greater than 30 uSv/h (3 mr/h) were gamma scanned to determine their beta gamma radionuclide inventory and randomly selected bags were analysed for carbon-14 and tritium.

Low power photovoltaic systems for northern applications : final report

prepared for Renewable Energy Branch, Energy, Mines and Resources Canada ; by J. Savage and R.W. Elliott. Mississauga, Ont. : Ontario Research Foundation, 1987. vi, 49 p. : ill. Bibliogr. MICROLOG 89-05614 1 fiche

One of the most economically feasible applications of photovoltaics is the supply of low level power in extremely northern sites where there is no access to electricity grids and the transportation costs for primary batteries or diesel fuel are prohibitive. This report presents the results of a laboratory evaluation of lead-acid batteries which consisted of a discharge-charge protocol at -40C simulating the operation of a Water Survey of Canada water monitoring site; the evaluation of a pocket plate nickel-cadmium battery; and the customization for northern, low power applications, of an

existing photovoltaic system simulation package called PVFORM. The simulation was of 1 full year with hourly time resolution for Fort Smith (latitude 60 degrees) and Resolute (latitude 75 degrees). System parameters were derived from information provided on a Coppermine River site (latitude 67 degrees). EN NO ON PR PS SC

Low-friction snow plow evaluation

prepared for Transportation Development Centre ; by G.J. Clouston, G.W. English and J.D. Young. Kingston, Ont. : Queen's University, Canadian Institute of Guided Ground Transport, 1988. viii, 29 p. : ill. (CIGGT report ; no. 88-6) MICROLOG 89-04065 1 fiche

Low-friction polymer coatings have been used on snow plows in both highway and airport applications. This report presents the results of a cost benefit analysis on a low-friction coating applied to a mainline railway snow plow. The assessment was carried out in cooperation with CN Rail, using two of their snow plows. Due to lack of snow storms and early equipment problems, an analytical model was developed to estimate the importance of friction reduction to fuel consumption and power requirement. A qualitative assessment of the benefits of the coating was also made by the plow crews.

Magnetic Field Rodent Reproductive Study (MFRRS) exposure system

by S.M. Harvey. Toronto : Ontario Hydro, Research Division, 1988. 23 p. : ill. Bibliogr. (Report ; no. 88-125-K)
MICROLOG 89-02601 1 fiche

Beginning in 1982, studies were carried out on the possible health hazards of Video Display Units (VDUs), but failed to find any support for concerns that radiative emissions or electric and magnetic fields produced by the units were causing adverse pregnancy outcomes. To further address these concerns, the Magnetic Field Rodent Reproductive Study (MFRRS) was begun to expose pregnant mice to magnetic fields similar to those produced by the horizontal deflection coils in VDUs. About 800 mice and field levels up to 3000 times greater than actual human exposures (9,000,000 times greater in energy units), will be used in an attempt to find a statistically significant effect on fetal development in the selected mouse strain. This report describes the exposure system which was designed and developed, and is now installed in the Animal Sciences Laboratory at the University of Toronto.

Magnetic separation of potash, phase II : project part I and project part II

Central Canada Potash. Regina : Central Canada Potash, 1988. 83, 51 p. : ill. Bibliogr. CANMET contract: 79226-01-SQ.
MICROLOG 89-01736 2 fiche

Research work has shown that clay contained in potash ores can be separated in dry form using a high intensity, high gradient magnetic roll. This separation is possible as the clay was found to be slightly magnetic while the sylvite and halite which make up the balance of the ore are non-magnetic. This report establishes the flotability of magnetically separated ore, presents a flowsheet for incorporating the magnetic separator into the desliming process, and reports on a literature search to determine the current state of knowledge on magnetic activation of weakly magnetic or non-magnetic materials such as halite. A laboratory Permroll magnetic separator was used and the test work was done on CCP mill feed which is similar to potash ores mined in the Saskatoon area.

Magnitude scaling of seismic events at Elliot Lake

by P. Rochon and D.G.F. Hedley. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1987. i, 10 p. : ill. Bibliogr. (Report ; MRL 87-156(TR))
MICROLOG 89-02154 1 fiche

As part of the Canada/Ontario/Industry Rockburst Project, the seismographic stations of

the Eastern Canada Seismic Network are being augmented by local seismograph stations at the mining camps experiencing rockbursts (Red Lake, Elliot Lake, Sudbury, and Kirkland Lake). The seismograph station at Elliot Lake has been in operation for almost 2 years and during that time 31 seismic events at Quirke and Denison Mines were recorded on the regional and local networks. This report analyzes correlations between magnitude and amplitude and between magnitude and time duration. The latter relationship is used to calculate magnitudes of seismic events 1.0-1.9, while relying on the regional network for larger magnitudes.

Mainland-Southwest Region 2 : summary of Transportation Committee recommendations

Mainland Southwest Region 2 Transportation Committee (B.C.). S.I. : The Committee, 1989. 84 p. : maps. MICROLOG 89-06157 1 fiche

The Province of British Columbia Strategic Transportation Plan 1990-2000 will determine the best way to direct both public and private resources in building transportation systems. Regional transportation committees were formed in each of the 8 development regions to prepare plans to determine the present and future needs and priorities of each region; to analyze issues and provide support documentation for recommended improvements, and to recommend a plan that included both short and long term directions. All modes of transportation (air, coastal marine, ferry,

highways, ports, rail and transit) were considered. The Mainland/Southwest region established 6 sub-committees and a community advisory committee which provided additional comments on the Greater Vancouver transportation study. This document summarizes the findings of the 6 regional district reports, covering Central Fraser Valley, Dewdney-Alouette, Fraser-Cheam, Greater Vancouver, Squamish-Lillooet, and Sunshine Coast. An economic overview is included, and Great Vancouver also covers population and employment forecasts.

Maintenance of the highway infrastructure : bridge management

by D.G. Manning and R.S. Reel. Downsview, Ont. : Ministry of Transportation and Communications, 1986. iv, 26 p. : ill. Bibliogr. MICROLOG 89-03134 1 fiche

A bridge management system is required to ensure the safety of bridges and to optimize the resources available for maintenance and rehabilitation. This report describes the bridge management practices for the King's Highway System in Ontario and outlines the work in progress towards the development of a more comprehensive bridge management system. The basis of the system is the computerized information contained in the Ontario Structural Inventory System and in the Bridge Appraisals Inventory.

Maintenance of the highway infrastructure : data collection for pavement management

by W.A. Phang and D. Kobi. Downsview, Ont. : Ministry of Transportation and Communications, 1986. iv, 23 p. : ill. Bibliogr. MICROLOG 89-03136 1 fiche

Effective management of a highway system is difficult without accurate and current information on the status and physical condition of every part of the system, including pavement condition and riding quality data, pavement-load-response, and skid resistance data. This report gives details of the data collected for network pavement management in Ontario, the methods of evaluation, and their use. Brief descriptions of the equipment used and the costs of operation are provided, as well as the timing and frequency of the measurements and visual assessments of conditions. Reference is made to the manuals prepared for identifying and describing distress manifestations. The measurement and use of pavement-response-to-load data in overlay design is briefly described and the data bank for storage and retrieval of these and other data used in pavement management is outlined.

**Managing for learning in
organizations : the fundamentals**

by D. Abbey-Livingston and D. Kelleher.
Toronto : Ministry of Tourism and Recreation,
1988. 87 p. : ill. Bibliogr. ISBN
0-7729-3137-2
MICROLOG 89-00221 1 fiche

In unplanned and unintentional ways,
organizations send out a myriad of messages
to be learned each day. These messages are
carried by meeting rituals, memos, policies, and
procedures. People learn these unplanned

lessons well, often without being conscious of
them. This document explains how to insure
that what is taught is what organizations wish
their workers to learn. It focuses on meetings,
training programs, and supervision sessions,
and presents principles of how learning takes
place in organizations. These principles are
portrayed in a series of stories and incidents
and arranged around four main tasks: needs
assessment, design, facilitation, and building
organizational support.

Manitoba emergency plan, January 1988

Manitoba Emergency Measures Organization. Winnipeg : The Organization, 1988. vi, 139 p. : ill. MICROLOG 89-00080 2 fiche

While the initial response in dealing with peacetime emergencies and disasters is almost invariably a municipal responsibility, there will be those occasions when the situation is beyond their capability and where assistance has to be provided by departments and agencies of the Manitoba Government. This plan sets forth the arrangements for providing such assistance and the procedures to be followed in the conduct of emergency operations. It also provides action guidelines and procedures

for departments and agencies when responsibility for the response is clearly that of the provincial authority or when the nature and extent of the emergency demand the control and co-ordination of higher authority.

Manitoba Hazardous Waste Management Corporation system scope and technology study : final report

prepared by Reid Crowther & Partners Ltd. ; in association with B & V Waste Management Inc. Winnipeg : Reid Crowthers & Partners, 1988. 2 v. Bibliogr. Contents: Pt. 1,

Strategy review -- pt. 2. Technology review.
MICROLOG 89-02966 3 fiche

The Corporation is charged with the responsibility of implementing a hazardous waste management system in Manitoba. In March 1988, a 3-part system scope and technology study was begun. Part I of the study is documented in this report and involved a review of the planning work performed to date and an evaluation of the Corporation's development strategy. The evaluation was based on a review of the literature and on the consultants' experience with hazardous waste planning, management, and engineering. Part II presents a comprehensive review of available and emerging technologies, including those for waste reduction and materials recovery, storage and transfer facilities, thermal destruction, physical/chemical treatment, immobilization, and residue disposal. Those suitable for Manitoba are identified by developing and applying criteria to rank each technology. A list of manufacturers and suppliers is also included.

Manitoba's forest industry, 1985

by T.W. Steele and T.B. Williamson.
Edmonton : Government of Canada, Canadian Forestry Service, Northern Forestry Centre, 1989. viii, 48 p. : ill., maps. Bibliogr.
(Information report ; NOR-X-304) ISSN 0704-7673 ISBN 0-662-16776-7
MICROLOG 89-03667 1 fiche

In 1985, a study was initiated under the Canada-Manitoba Forest Renewal Agreement to determine the current size, structure, and economic impact of the primary wood-using industry in Manitoba. This report presents the results of that study and identifies directions for future development. Data was obtained from federal and provincial sources, as well as a survey of the provincial forest industry. The primary wood-using industries category includes pulp, paper, and fiberboard mills, sawmills and planer mills, wood treating plants, building timber plants, post and pole manufacturers, and hog fuel operations.

Report to inform the general public of the uses and roles played by mineral fillers and pigments used in the production of pulp, paper and paperboard, and to inform the mineral industry of the Canadian pulp, paper and

paperboard industry's market size, potential, trends, and future prospects. The report covers kaolin, talc, titanium dioxide, calcium carbonate, bentonite, alumina hydrate, and diatomite. It gives a history of paper products and papermaking processes; the use of mineral pigments in paper and paperboard; the structure, performance and outlook of the Canadian pulp and paper products industry; the market for selective minerals; and the outlook for mineral fillers and pigments in paper. A mineral fillers and pigments consumption survey is also included.

Market study for cement/gypsum bonded particleboard : final report

D.G. Bell & Associates Inc. S.I. : Canada-Alberta Forest Resource Development Agreement, 1988. 181 p. : ill. ISBN 0-662-16342-7
MICROLOG 89-01418 3 fiche

Cement bonded particleboard is used in Europe in such specialized areas as roof decking, partitioning, external cladding, tunnel lining, and fire resistant doors. Markets in North America are limited by lack of knowledge and price compared to substitutes. This report gives markets for board products in North America, a summary of trends in this market, and the current development of cement and gypsum particleboards. The report also covers the European markets in some detail, as well as opportunities in North America, particularly Canada, including sources of raw material and the transportation factor. Some information is also given on the technological process of gypsum board and data for a board plant.

Market survey of computer assistance required by firms involved with injection moulded plastic parts and moulds

Ontario Research Foundation. Boucherville. Que. : National Research Council Canada, Industrial Materials Research Institute, 1985 39 p.
MICROLOG 89-00565 1 fiche (Available on fiche only)

Results of a survey of firms involved with injection moulded plastic parts, including those supplying the resins, moulded parts, manufactured moulds, designed parts, and/or designed moulds. The survey used mailed questionnaires, telephone interviews and personal interviews to ascertain the use and knowledge of CAD/CAM/CAE systems as applied to plastics. General benefits were developed, as well as the necessary components to encourage the use of these systems. Highlights of the mail survey responses are given, as well as the questionnaire and a list of companies responding.

Mars Hill : background report and recommendations for land use, resource use

by K.J. Tyler. Winnipeg : Manitoba Crown Land Classification Committee, 1988. viii, 58 p. : ill. Bibliogr.
MICROLOG 89-04761 1 fiche

Mars Hill is a significant natural resource area that is currently well known for outdoor recreation and mineral resource extraction. Since 1982, this land has been identified and coded for recreational use. Nevertheless, it has been requested for some additional land uses that are very intensive in nature and contrary to the coding. Acknowledging that the area needs a general review of land use codes and activities, this study has been initiated to investigate present land use, considering such factors as surficial geology, soils, vegetation, climate, renewable and non-renewable resources and accessibility.

A Mathematical description of the effects of prolonged water level fluctuations on the areal extent of marshlands

by R.P. Bukata...et al. Burlington, Ont. Environment Canada, Inland Waters Directorate, National Water Research Institute, Canada Centre for Inland Waters. 1988. x, 47 p. : ill. Bibliogr. (Scientific series ; no. 166) *French ed. (Description mathématique des effets...)* on the same fiche. ISBN 0-662-16472-5
MICROLOG 89-01174 2 fiche

Simple conceptual model for predicting the change in areal extent of marshlands with change in persistent water level. In particular, such marshland changes are described by the change in water level, the onshore and offshore slopes, the marsh area at zero water level, the maximum water depth which allows a marsh to be delineated, and the basic geometric configuration of the shoreline accommodating the coastal marshland. The model is intended to provide a predictive capability for the impact of persistent water level changes when used in conjunction with aerial photography and/or satellite delineation of coastal marsh areas. A "user-friendly" computer program written in IBM PC BASIC is included.

Mathematical modelling of automedium cyclones

Edmonton : Alberta Energy, Scientific and Engineering Services and Research Division, 1988. 10 p. : ill. ISBN 0-86499-344-7
MICROLOG 89-01427 1 fiche

Since the 1970s, cleaning processes for western Canadian metallurgical coals have included automedium cyclones (AMCs), which are needed to recover fine particles that average 30-35% by weight of coking coals.

Attempts to optimize AMC performance by making manual adjustments have had limited success. Therefore the development of mathematical models which would relate AMC performance to process control measures could allow process operators to produce coal having more uniform properties. This overview relates the steps taken to this goal, including a description of the process, the study approach, and the results.

Matrimonial property : division of pension benefits upon marriage breakdown

Edmonton : University of Alberta, Institute of Law Research and Reform, 1985. ii, 168 p. (Report for discussion ; no. 2)
MICROLOG 89-02019 2 fiche

Under Alberta law a pension benefit accumulated by either spouse during marriage is property and, along with other property of the spouses, can be divided between them on matrimonial breakdown. In this report, the Institute makes recommendations that would remove any doubt that this is the law of Alberta. Furthermore, the special characteristics of pension benefits make them difficult to divide satisfactorily. The Institute's proposals provide additional methods of division and make existing methods less costly and more efficient while protecting the interests of

others who have interests in a pension fund.
AL CO JU PR

Edmonton : University of Alberta, Institute of Law Research and Reform, 1986. 115 p. Bibliogr. (Report ; no. 48) ISSN 0317-1604
MICROLOG 89-02035 2 fiche

Under Alberta law a pension benefit accumulated by either spouse during marriage is property and, along with other property of the spouses, can be divided between them on matrimonial breakdown. This report recommends better ways for the division of the benefits of a pension plan upon marriage breakdown. It covers all pension plans which fall under provincial jurisdiction or which can be reached by Alberta court orders.

Measurement of oxygen consumption using the Canadian clearance diving apparatus

by K. Gilmour, D. Eaton and T.T. Romet. Downsview, Ont. : Defence and Civil Institute of Environmental Medicine, 1988. iii, 13 p. : ill. Bibliogr. (DCIEM research report ; no. 88-RR-46) MICROLOG 89-01215 1 fiche

The Canadian Clearance Diving Apparatus was modified to serve as a 100% oxygen rebreathing system for the measurement of oxygen consumption in water. Four physically active male subjects each performed 3 exercise tests on an electromagnetically-braked bicycle ergometer: in shorts on dry land; in shorts while submerged; and in wet suits while submerged. The data were analyzed for the effects on oxygen consumption of the increased viscous resistance imposed by water and by wearing a constrictive clothing ensemble, specifically a wet suit. The validity of the technique was assessed by comparison of results with those of other systems. CA EX LS SC

Measurement of respiratory air temperatures and calculation of respiratory heat loss when working at various ambient temperatures

by J.B. Cain...et al. Ottawa : Defence Research Establishment Ottawa, 1989. vii, 18 p. : ill. Bibliogr. (Report ; no. 1004) MICROLOG 89-05059 1 fiche

Heat loss due to respiration can represent a sizeable proportion of the body's total heat loss. The temperature of expired air has been reported to be as low as approximately 20C and as high as 37C and reports on the

humidity of the expired air also vary from approximately 80% to fully saturated. Since these variations may be due to the slow response times of the sensors used, this investigation was undertaken using a fast response temperature sensor to obtain a better estimate of the correct values. The temperature of the expired air was measured while 5 subjects worked at 4 different rates and at 4 different ambient air temperatures. During tests at very cold temperatures, the water content of the expired air was also measured. With this information and with measured respiratory ventilation rates, the respiratory heat loss was calculated for various metabolic rates and ambient temperatures. • CA EX LS SC

Measurement of the properties of broken ice zones and ice rubble

by M.S. Cheung. Ottawa : Public Works Canada, Architectural and Engineering Services, 1988. vi, 93 p. : ill. Bibliogr. ISBN 0-662-16295-1 MICROLOG 89-02021 2 fiche

Broken ice zones and ice rubble areas are very common in the offshore northern environment. For offshore operators the most important properties of broken ice zones are those governing bearing capacity and lateral load transfer through grounded ice rubble. This report describes the results of a project to measure the properties of ice rubble and broken ice, examine the refreezing of ice rubble, and obtain measurements for comparison with analytical models. A time-dependent bearing settlement test on grounded ice rubble was also performed to obtain large-scale data. Measurements were taken at a grounded rubble field around an artificial island in the Arctic, and in an outdoor basin in Calgary. CA NO PS SC

Measurement of the relative efficiency of highway maintenance patrols in Ontario

by W.D. Cook, Y. Roll and A. Kazakov. Toronto : Ministry of Transportation and Communications, Research and Development Branch, 1988. v, 37 p. : ill. MICROLOG 89-02355 1 fiche

Results of a pilot study aimed at developing a productivity measurement system for highway maintenance patrols. Phase I tested whether the Data Envelopment Analysis (DEA) approach was suitable and valid in the evaluation of road maintenance patrols; determined whether the data necessary for applying such an approach was available; and examined the kinds of analyses that could be done on the efficiency ratings obtained and that assisted in managing the maintenance patrols. A survey of existing data was done, and means were developed to process this data. Fourteen patrols in District 3 were taken as a sample, with a limited set of 2 output factors (area served and traffic intensity) and 2 input factors (maintenance expenditure and pavement rating) chosen for assessment of patrol performance. A series of further analyses were carried out on the initial outcomes, including segregating patrols into groups by different discriminating characteristics and testing the effect of such segregations on the efficiency ratings. Measurement of ultrasound attenuation by laser-ultrasonics

by J.-D. Aussel and J.-P. Monchalin. Boucherville, Que. : National Research Council Canada, Industrial Materials Research Institute, 1988. 9 p. Bibliogr. MICROLOG 89-00549 1 fiche (Available on fiche only)

Laser-ultrasonics is a technique which uses lasers to generate and detect ultrasound and

for which attenuation measurements are made difficult by the lack of precise knowledge of the laser beams intensity distributions. This paper considers cases where laser generation produces stresses essentially normal to the surface, and longitudinal waves. Theoretical results are given which are applicable to uniform generation and reception over zones of radius. CA PS SC

Measurement of volatile organic compounds in the Greater Vancouver Regional District

by T. Dann and D. Wang. Ottawa : Environment Canada, Conservation and Protection, Pollution Measurement Division, 1989. 40 p. : ill. MICROLOG 89-06370 1 fiche

During the summer and fall of 1988, a measurement program for volatile organic compounds was carried out at 11 sites within the Greater Vancouver Regional District to provide information on volatile organic species of importance to ozone formation, to provide information on concentrations of potentially toxic volatile organic compounds, and to investigate the impact of emissions from a pipeline distribution and storage facility (Trans Mountain Pipe Line) on air quality. This report presents the results of that program. BC CA EV MU SC

Measurements of solids concentration in coal slurries using microwaves

by N.A. Mansour. Ottawa : Canada Centre for Mineral and Energy Technology, Coal Research Laboratories, 1988. v, 8 p. Bibliogr. (Report ; CRL 88-55(TR)) MICROLOG 89-00478 1 fiche

Reliable, economic and versatile measurement techniques and instrumentation are vital for monitoring the composition, particle size distribution and solids concentration of coal slurries. The commonly used gamma ray techniques meet some of these requirements, but alternative techniques are needed to provide the faster response times required in real-time controlling. Non-contact microwave electromagnetic measurement techniques promise to compliment and even to supercede most of the currently used gamma ray methods, although to date the absorption based microwave techniques have only been applied to media with low moisture content. This paper presents a new potential application of microwaves in the coal industry, to measure solids concentration in the coal-water slurry. • CA CM NR SC

Mechanochemical grinding of industrial mineral fillers : final report

by V.I. Lakshmanan...et al. Mississauga, Ont. : Ontario Research Foundation. 1988. 246 p. : ill. *CANMET contract: 79177-01-SQ*.
MICROLOG 89-01997 3 fiche

Investigation of the technical feasibility of chemically modifying the surface of industrial mineral fillers during the grinding stage to substitute relative expensive conventional organic surface modifiers by inexpensive organic solvents at lower consumption rates. Materials chosen included calcite and talc from Ontario, sutorite mica from Quebec, and silica from Manitoba. Propionic acid, isopropanol, di-isopropyl ether, methyl isopropyl ketone and kerosene served as alternative organic solvents which were added to the grinding stage. As an indicator for the dispersion behaviour of the mineral filler in plastic resins, the (surface related) oil adsorption test was used as suggested by ASTM standards D 281 and D 1755.

Medical response to wife abuse in Manitoba : a survey of physicians' attitudes and practices : a final report

by B. Trute...et al. Winnipeg : University of Manitoba, School of Social Work, Child and Family Services Research Group. 1988. 27 p. Bibliogr.
MICROLOG 89-02128 1 fiche

This study surveys physicians' perceptions of the prevalence of abused women in their medical practices, reviews the basic medical responses to this problem, and assesses physicians' attitudes in regard to their own preparedness to deal with situations of wife abuse. The study covers the entire province and involves those physicians who are responsible for the provision of primary medical services in both urban and rural locales. It includes a review of relevant literature.

Melt flow of polyethylene blends

by L.A. Utracki. Boucherville, Que. : Conseil national de recherches du Canada, Institut de génie des matériaux, 1988. 71 p. : ill. Bibliogr. MICROLOG 89-04012 2 fiche (Available on fiche only)

Discussion of the rheology of polyethylene blends with an emphasis on those containing the linear low density polyethylenes (LLDPE). Flow of LLDPE with other types of LLDPEs, with low density polyethylene, and with polypropylene was studied in steady state shear, dynamic shear and uniaxial extensional fields. Interrelations between diverse rheological functions are discussed in terms of the linear viscoelastic behaviour and its modification by phase separation into complex morphology. CA PS SC

Metal concentrations in fish and sediment from lakes near Flin Flon, Manitoba

by S.E. Harrison... et al. Winnipeg : Dept. of Fisheries and Oceans, Central and Arctic Region, 1989. iv, 74 p. : ill., maps. (Canadian data report of fisheries and aquatic sciences; no. 747) *This is the 33d data report from the Central and Arctic Region*. ISSN 0706-6465

MICROLOG 89-05950 1 fiche

Since 1930, a base-metal smelter has been in operation in Flin Flon, on the Manitoba-Saskatchewan border. In 1982, a survey was conducted on lakes assumed to be within the deposition zone of the smelter to determine levels of metal contamination in white suckers, a benthic feeder, and the northern pike, a piscivore. Liver and skeletal muscle were analyzed for the metals Zn, Cu, Cd, Hg, and Pb, and the semi-metals Se And As; lake water was analyzed for ionic composition. The survey was designed to evaluate factors such as lake water chemistry, distance of lake from smelter, direction of prevailing winds, fish species, and sex and age which may affect metal contamination of these fish. The survey also evaluated the effect of installation of the taller stack on metal concentrations in fish. In 1985, sediment cores were taken from each lake to assess the metal loading and metal loading chronology and to evaluate effects of the pollution control measures on metal concentrations in sediment. This report presents a preliminary analysis of the data.

Metropolitan Toronto property review, report four : east Bayfront properties

prepared for the Ministry of Government Services ; by N. Barry Lyon Consultants...et al. Toronto : Ministry of Government Services, 1987. 58 p. : maps.
MICROLOG 89-00212 1 fiche

This report deals with the LCBO and OPP properties in the East Bayfront area of Toronto, and provides an assessment of a proposal by the Toronto Star to acquire these properties in order to construct a new printing plant and office building. It also considers an expression of interest from a major bank to establish its international computer centre on a portion of the properties. The study examines alternative ways of dealing with the two properties. These include: acceptance of the Star proposal; establishing a mixed development incorporating the proposed Star buildings and a computer centre; redeveloping the two properties with intensive commercial uses; and proceeding with an interim program for the properties. The study takes into account the political and planning context surrounding the two sites, and reaches conclusions as to how the government should respond to current municipal initiatives regarding the zoning of the properties.

Microbiological analyses of test rig heat exchanger tubes

by T.G. Dunstall. Toronto : Ontario Hydro, Research Division, 1988. 12 p. : ill. Bibliogr. (Report ; no. 88-223-K)
MICROLOG 89-04307 1 fiche

The performance of various heat exchanger materials is being evaluated using an experimental test rig at Pickering Nuclear Generating Station. The test rig simulates the process conditions that exist within a moderator heat exchanger. The potential importance of microbiologically-induced corrosion within the heat exchanger environment prompted the quantification of specific physiological groups of microorganisms in the biofilm adherent to the tubes. In addition, 4 heat exchanger tubes from a similar test rig in operation at Darlington Nuclear Generating Station were recently removed for microbiological analysis. This report presents the results of the analysis of the tubes from both test rigs representing various exposure periods, the longest of which slightly exceeded one year.

Microcomputer based software for lattice parameter calculations for tetragonal systems

by A. Ahmad...et al. Ottawa : Canada Centre for Mineral and Energy Technology, Mineral Sciences Laboratories, 1988. ii, 34 p. Bibliogr. (Report ; MSL 88-119(IR))
MICROLOG 89-01631 1 fiche

Using BASIC programming language and an Apple IIe computer, a software program entitled LP TETR was written to calculate the unit cell lattice parameters (a and c axis) for tetragonal crystal systems. The program uses angles of diffraction (retrieved from X-ray diffraction analysis) and their corresponding hkl indices as an input for data manipulations and a linear regression analysis to obtain refined "a" and "c" values. Output is printed out in a tabular form giving values for the 2-theta, d-spacing, hkl indices, lattice parameters (a and c values) and the Nelson-Riley function for each X-ray diffraction peak. A detailed description of the program, complete program listings and the sample lattice parameter calculations (for PbTiO₃ and a modified PbTiO₃ composition) are included.

Microscopic characterization of oil sands processing emulsions

by R.J. Mikula, V.A. Munoz and W.W. Lam. Ottawa : Canada Centre for Mineral and Energy Technology, Coal Research Laboratories, 1989. v, 19 p. : ill. Bibliogr. (Report ; CRL 89-26(TR))
MICROLOG 89-06211 1 fiche

Microscopic characterization of oil sands emulsions can be important in the prediction of processing characteristics and process yields in the extraction of oil from oil sands. The size distribution of the emulsion can determine how efficiently the oil can be separated from the water and whether mechanically or chemically. In addition, it is possible to characterize the nature of the dispersed phase by observing fluorescence behaviour under an optical microscope or via x-ray analysis with a scanning electron microscope. In certain cases it is also possible to characterize the interface between the dispersed and the continuous phases. This paper presents results using microscopic techniques and illustrates their utility, not only for determining the morphology of these economically important emulsions, but also for characterizing the composition of the interface itself.

Microstructural investigation of RBa₂Cu₃O_{7-x} (R equals Y, Gd, Nd)

by L. Parent... et al. Boucherville, Que. : National Research Council Canada, Industrial Materials Research Institute, 1988. 10 p. : ill. Bibliogr.
MICROLOG 89-00589 1 fiche (Available on fiche only)

The cuprate perovskites RBa₂Cu₃O_{7-x}, where R is Y, La, Nd, Sm, Eu, Gd, Dy, Ho, Tm, Yb, and Lu, show a superconducting transition temperature which is nearly non-related to the nature of the R atom, explained by the fact that the R atom does not modify the structure of the superconducting layers but only the distance between them. However, this slight modification of the crystal structure may change the reactivity and stability of these compounds. Some preliminary observations concerning the microstructure of RBa₂Cu₃O_{7-x}, where R is Y, Gd and Nd are reported.

Microwave bonding of ceramics : final report

by S.J. Oda and I.S. Balbaa. Toronto : Ontario Hydro, Research Division, 1988. 30 p. : ill. Bibliogr. (Report ; no. 87-163-K)
MICROLOG 89-02655 1 fiche

Advanced ceramics are gaining in importance primarily as a result of their high strength and ability to withstand heat and chemical attack. In order to take advantage of these properties, it is often necessary to bond ceramic materials to ceramic and metal substrates. Using technical information gained from preliminary tests for Powerplex and work done at Los Alamos, a study was initiated to investigate bonding of a representative selection of 'advanced' ceramics using microwave power. This report summarizes the results of this study to date with conclusions and recommendations for further study. Background information on advanced ceramics, a survey of ceramic bonding, literature references and contacts, materials selection and acquisition, experimental tests, and product characterization are also included.

Mine roadway surveys : recommendations for an optimum survey interval

by T.R.C. Aston. Ottawa : Canada Centre for

Mineral and Energy Technology, Coal Research Laboratories, 1988. v. 16 p. : ill. Bibliogr. (Report ; CRL 88-72(TR)) MICROLOG 89-02629 1 fiche

In 1983, an extensive roadway deformation survey program was undertaken as part of an ongoing barrier pillar research program in the Sydney Coalfield. The survey resulted in the collection of some 35 km of roadway deformation data (roadway height, width and cross-sectional area) from the Langan and No. 26 Mines. Vertical height data was collected every 10 arches from the faceline position to the original face startline location. Roadway width and arch profile data was also collected every 50 arches. As a result of this work, questions arose concerning the optimum arch spacing interval for the collection of vertical roadway height data. In July 1987, a detailed height survey of 1300 arches along the 9 East bottom level at Langan Mine was conducted. The report presents recommendations, based on the survey data, for the optimum arch spacing interval that should be adopted for future roadway monitoring programs.

Mineralogical and image analysis study of artificially weathered tailings from the midwest uranium ore in Saskatchewan

by W. Petruk and R.G. Pinard. Ottawa : Energy, Mines and Resources Canada, Canada Centre for Mineral and Energy Technology, 1988. vi, 21 p. : ill. Bibliogr. (CANMET report ; no. 88-6E) ISSN 0707-5196 ISBN 0-660-13122-6 MICROLOG 89-04458 1 fiche

Investigation of the weathering of tailings from ore of the Midwest unconformity-type uranium deposit in Northern Saskatchewan. About 11.5 tonnes were produced by pilot-plant runs on the ore. The acidic tailings were treated with calcium hydroxide and deposited into a filings facility (lysimeter) by a layered tailings technique, the final one being in July 1982. The lysimeter was designed to collect both seepage and surface runoff. Cores were taken periodically, the last core being taken in the spring of 1984. Mineralogical analyses were performed on the final cores and on freshly leached tailings to determine changes that had been produced, and to provide data for predicting weathering of tailings and migration of elements. The analysis involved identifying and characterizing the minerals and phases, and determining mineral quantities. CA CM MS NR PS SC

Mineralogical evaluation of samples from the grinding and spiral circuits of the Scully Concentrator : final report

prepared for Wabash Mines Ltd. ; by Lech Lewczuk. Fredericton : Research and Productivity Council, 1988. 204 p. : ill. CANMET contract: OSQ85-00315. MICROLOG 89-06204 3 fiche

Results of the mineralogical investigation of 8 mill products from the Scully Concentrator of Wabash Mines Ltd., Newfoundland, and 5 products of the bench test carried out at the Ontario Research Foundation. The investigation was conducted to determine mineral characteristics that affect iron and manganese recoveries to improve iron recovery and investigate if possibilities exist to decrease the content of manganese in the concentrate. Thirteen samples were received and the investigation began in July 1986. • AP CA CM NR PS SC

Mineralogical study of the platinum-group element distribution and associated minerals from three stratigraphic layers, Bird River sill, Manitoba

by L.J. Cabri and J.H.G. Laflamme. Ottawa : Energy, Mines and Resources Canada, Canada Centre for Mineral and Energy Technology, 1988. vi, 52 p. : ill. Bibliogr. (CANMET report ; no. 88-1E) ISSN 0707-5196 ISBN 0-660-13117-X MICROLOG 89-04463 1 fiche

The Bird River sill, located approximately 130 km northeast of Winnipeg, Manitoba, close to the Ontario border, has recently been the focus of investigations concerning the recovery of chromite and the distribution of the platinum-group elements. This report gives the results of an analysis of 9 hand samples collected from the Chrome property.

Mines et usines de traitement de minéraux au Canada, 1988

Ottawa : Energie, mines et ressources Canada, 1989. iii, 87, iii, 71 p. (Bulletin minéral ; MR 220) Bilingue (Mining and mineral...). CSI 21110.020. ISBN 0-660-54783-X MICROLOG 89-02104 2 fiche

Ce rapport est une compilation des données concernant les mines et les installations de traitement au Canada. On y donne des renseignements qui concernent les mines et usines de traitement de métaux, les mines et usines de traitement de minéraux industriels et les producteurs de chaux au pays. Ces renseignements comprennent le nom des exploitants, l'emplacement de la mine ou de l'usine, sa capacité de production, les procédés utilisés, les produits et les autres détails qui revêtent un intérêt particulier. Le rapport donne aussi la liste des principales usines métallurgiques au Canada dans lesquelles on procède au traitement de minerais et de concentrés de métaux non ferreux et précieux.

Mining and mineral processing operations in Canada, 1988

Ottawa : Energy, Mines and Resources Canada, 1989. iii, 71, iii, 87 p. (Mineral bulletin ; MR 220) Bilingue (Mines et usines...). CSI 21110.020. ISBN 0-660-54783-X MICROLOG 89-02104 2 fiche

Annual compilation of information related to mines and processing facilities in Canada, obtained mainly from a questionnaire sent to all companies concerned. Information is divided into metal and industrial minerals mines and processing plants (metal mines, industrial minerals, and lime producers), and metallurgical works in Canada, nonferrous and precious metals. Those companies that basically refine scrap and other secondary materials, foundries, base-bulion gold refineries associated with mines, and fabricating plants are not listed. Information includes operator and address, location of plant and mine and type, date mill started, mill capacity in tonnes/day, process, products, and operating status and methods.

Model based unemployment estimates for small areas

by I. Trottier and G.H. Choudhry. Ottawa : Statistics Canada, Methodology Branch, Census and Household Survey Methods Division, 1985. 13 p.
MICROLOG 89-03514 1 fiche

As part of the modelling work on labour market data for small areas, synthetic and component methods have been used to estimate total unemployment for census divisions. This study describes these two model based techniques. The monthly estimates for census divisions were obtained for the period 1981-1983 using these two methods. These series are evaluated by comparing them with the labour force post-stratified three-year average estimates and also with sample dependent three-year average estimates. The results of this evaluation are presented. Finally, the study provides the conclusions of the evaluation study and the plans for further work.

A Model for evaluation of some management policy options for lobster or moult-type fisheries

by R. Shotton. Halifax : Dept. of Fisheries and Oceans, Scotia-Fundy Region, Program Coordination and Economics Branch, 1989. v, 52 p. (Canadian technical report of fisheries and aquatic sciences ; no. 1696) ISSN 0706-6457
MICROLOG 89-05180 1 fiche

Description of a discrete-difference model for moult-type fisheries based on Scotia-Fundy lobster fisheries to enable management options to be evaluated for future landings and future (discounted) revenues. The model also enables the age structure of lobster populations to be determined after successive iterations together with the relative yields in weight as a function of lobster carapace length given different management scenarios. These results are used to determine annual yields and revenues during successive years. The principal model control variables are culsize (carapace length at first possible capture or retention), and the annual rate of exploitation. Parameters included sex-dependent functions of annual moult probability, weight and maturity.

Model for the prediction of yield stress and recrystallization anomalies of cold rolled aluminium killed steel sheets

by R. Thibaut...et al. Boucherville, Que. : National Research Council Canada, Industrial Materials Research Institute, 1989. 6 p. : ill. Bibliogr.
MICROLOG 89-00566 1 fiche (Available on fiche only)

The formability of cold-rolled low-carbon aluminium killed steel sheets depends on the recrystallization behaviour during batch annealing. For a .04% Al steel and 40% cold reduction, the resulting high yield stresses are explained by a two-stage recrystallization behaviour. A simple model is proposed to predict the yield stress and recrystallization anomalies using mainly the Al content of the steel, the cold reduction percentage and a thermal parameter characterizing the annealing treatment.

Modeling of ice class shafting and propeller systems : final report

prepared for Transportation Development Centre ; by D.N. Bruce Cowper and Arthur Karton. Calgary, Alta. : Fleet Technology Limited, 1988. ix, 38 p. Bibliogr. MICROLOG 89-04045 1 fiche

A number of successful full-scale tests of ice breaker propulsion systems have been completed in recent years to provide an adequate experimental basis for the development and validation of numerical modeling techniques for predicting the performance of alternative shafting and bearing arrangements. This report describes a software package developed to access the full-scale data and execute numerical models for the design and evaluation of ice class shafting and propeller systems. The Shaft Modeling Tool Kit is written for IBM PC/AT compatibles and provides access to key full scale data from several ice class vessels; tabular displays of the Canadian Arctic Shipping Pollution Prevention Regulations for powering, shafting, and propellers; and analytical modelling of generalized shafting and propeller systems for torsion, thrust, and alignment (dynamic and static).

CA PS SC TR

Modélisation de la teneur en oxygène dissous de la rivière Ste-Croix, à la frontière du Maine et du Nouveau-Brunswick

par W. Boutot et T.A. Clair. Ottawa : Environnement Canada, Direction générale des eaux intérieures, Direction de la planification et de la gestion (Eaux) ; Moncton, N.-B. : Direction générale des eaux intérieures, Région de l'Atlantique, Direction de la qualité des eaux, 1981. v, 28 p. : ill. Bibliogr. (Collection des rapports techniques ; étude no 121) ISBN 0-662-91860-6 MICROLOG 89-00224 1 fiche

Des techniques de modélisation mathématique ont été appliquées à l'étude de la teneur en oxygène dissous du cours inférieur de la rivière Sainte-Croix. Un modèle d'écoulement hydraulique, le HEC-2, a servi à décrire le régime d'écoulement de la rivière tandis que le modèle WATQUAL a permis de simuler la teneur en oxygène. Les résultats de l'étude indiquent qu'il faudrait réduire la charge des eaux usées versées dans la rivière lorsqu'il fait très chaud et lorsque le débit est minimal, afin de permettre la migration des poissons.

Modelling methane flow into underground longwall coal mines

by A.J. Sziadow, R.K. Chan and T. Ertekin. Regina : Lobbe Technologies Ltd., 1988. xiii, 209 p. : ill. Bibliogr. CANMET contract: 79141-01-SQ. MICROLOG 89-01746 3 fiche

Emission of methane gas into mine workings poses a safety concern due to the explosive nature of the gas and affects mining production because it leads to work stoppages and influences the design of ventilation systems. The overall objective of this research program is to develop a computer-based numerical model to simulate the time-dependent release of methane gas from the seam being worked, and from the adjacent seams and strata into longwall coal mine workings. The report reviews: the background material for modelling methane emission in coal seams, including the porosity of coal, adsorption-desorption of gases, diffusion, laminar and non-laminar flow, permeability, flow through porous media, effects of stress of porosity, permeability and gas flow, effects of water saturation on gas flow, and approximate or numerical methods; reviews 5 sets of reported models and identifies 29 model parts as being important for the prediction of methane flow; conducts a series of simulation runs; and outlines the required R&D work, giving a summary of major findings and the benefits to be gained.

Modelling of ozone production in the Sarnia region

by N. Reid and S. Wong. Toronto : Environment Ontario, 1989. 64 p. Bibliogr. ISBN 0-7729-5001-6 MICROLOG 89-05700 1 fiche

Canadian guidelines for ozone specify that the maximum acceptable level is 82 ppb expressed as a 1 hour average. Ozone concentrations in southern Ontario frequently exceed this level. A field study was carried out in the Sarnia region in 1984 to quantify the problem. The modelling study described in this report is complementary to that field work, and was designed principally to provide an indication as to whether hydrocarbon or nitrogen dioxide control would be more effective in controlling ozone production in the region. A model incorporating simplified transport and dispersion, but sophisticated photochemistry was used in this work, and was run for a number of sets of initial conditions, based partly on data obtained during the Sarnia Oxidant Study, with other conditions chosen to ensure that a broad range was covered.

Modelling the cure of Narmco 5208 : a method for determining the chemical state of the prepreg

by K.C. Cole and D. Noel. Boucherville, Que. : National Research Council Canada, Industrial Materials Research Institute, 1988. 66 p. : ill. Bibliogr. MICROLOG 89-00600 1 fiche (Available on fiche only)

The accurate modelling of the curing process of a thennoset resin system requires that the initial chemical state of the resin be properly characterized. This report presents a method for the epoxy/amine system Narmco 5208 which enables the use of data obtained by reverse-phase chromatography (RPLC) to calculate the parameters required to describe the state of the resin by mathematically analyzing the chemical kinetics of the system to develop a

simplified model relating the RPLC data to the unknown parameters, and then by preparing and analyzing a set of mixtures to verify the model and determine the specific numeric factors needed. The two most important parameters involved are the epoxy-to-hardener ratio and the initial degree of polymerization of the resin, both of which can vary from batch to batch.

Modelling the lifetime employment patterns of Canadians

by G. Picot. Ottawa : Statistics Canada, Analytical Studies Branch, 1986. 31 p. Bibliogr. (Research paper series ; no. 4) French ed. (*La Modélisation des...*) on the same fiche. CSI 01100.224. MICROLOG 89-02311 1 fiche

Utilizing data from Statistic Canada's Family History Survey, relationships were studied between family-related variables and the movement of Canadians - women in particular - in and out of employment. These relationships are explored by expressing transition probabilities as a function of age, sex, marital status, age of youngest child, educational attainment, state occupied the previous year, and the duration of that state. The goal is to develop an employment submodel of a larger lifetime income and pension policy simulation model. The simulated employment patterns are compared to the actuals from the Family History Survey.

Modelling unbounded critical two-phase flow critical discharge experiments

by I.G. Elphick. Toronto : Ontario Hydro, Research Division, 1988. ii, 26 p. : ill. Bibliogr. (Report ; no. 88-16-K) MICROLOG 89-02584 1 fiche

Study of unbounded critical 2-phase flow which may occur if a reactor header or feeder ruptures. The pressurized liquid will escape from the break and flash into a mixture of steam and drops. Fission products in the coolant will be carried into containment by this jet. It is important to know the characteristics of this jet to assess the transport of fission products through containment. As a prelude to studying and modelling the jet, this report describes the evaluation of critical discharge models and photographs of the jet. Measurement of critical discharge was performed using the Thermo-Fluids pressurized water blowdown facility. Three correlations (homogeneous equilibrium model, the Henry-Fauske model, and the Alamgir-Lienhard correlation) are compared with the experimental model.

Modifications of existing testing facilities, optimization of hydrotreating conditions and assessment of Canadian oil shales as source of synthetic fuels : final report

New Brunswick Research and Productivity Council, Mineral Development and Processing, Fredericton : The Council, 1983. iii, 134 p. : ill. Bibliogr. CANMET contract: OSQ82-00053
MICROLOG 89-01951 2 fiche

A test facility previously developed at the Research Productivity Council for retorting oil shales under hydrogen pressures was modified to improve oil recoveries. The hydrotreating conditions were optimized at 500 psi hydrogen, 700C, and 8C/min heat-up rate using a Kentucky oil shale sample previously evaluated at the Institute of Gas Technology, Chicago. The optimized conditions for the Kentucky oil shale were used to evaluate a total of 37 oil shale samples from New Brunswick, Ontario, Nova Scotia, Newfoundland, British Columbia, and Quebec.

Monitoring strain on the tristructure backlog knee plate of the Marion 8200 dragline

by A. Cormier and R. St-Laurent. Minto, N.B. : N.B. Coal Limited, 1989. 61 p. : ill. CANMET contract: 89092-01-SQ.
MICROLOG 89-04481 1 fiche

Draglines used in coal mines operate in a high cyclic stress environment with severe lubrication requirements. They offer an excellent opportunity to enhance performance and safety through use of computer monitor/control techniques. Phase I of this project dealt with the monitoring of strain on the tri-structure backlog knee plate of the Marion 8200 dragline operating at Minto, NB. This report describes the system developed to measure and record strain values; sites selected for the placement of strain gauges, their installation and calibration; instructions given dragline operating staff about the project and monitoring tests; operation of the monitoring system, including the adjusting of alarm thresholds; analysis of information from the strain monitoring during operation of the dragline; and the user's manual for management and individual operators.

Morphological and ecological characteristics of common fishes in Ontario lakes

by C.B. Portt, C.K. Minns and S.W. King. Burlington, Ont. : Dept. of Fisheries and Oceans. Bayfield Institute, 1988. vi, 37 p. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences : no. 1991) ISSN 0706-6473
MICROLOG 89-01122 1 fiche

The ecomorphology of stream fishes has been explored quantitatively, but the examination of lake assemblages has been largely subjective, and restricted to relatively few species. This study was undertaken to compile and analyze data on morphological and ecological characteristics of 52 fish species commonly found in Ontario's lakes. The analyses developed measures of dissimilarity distance between species based on ecomorphological, life-history, and feeding characteristics. The concordance of species' groupings obtained using different criteria was assessed.

Mortality of juvenile Atlantic salmon *Salmo salar* exposed to water withdrawn from the hypolimnion of a headpond on the Mersey River, N.S.

by G.J. Farmer, T.R. Goff and D. Ashfield. Halifax : Dept. of Fisheries and Oceans. Biological Sciences Branch, Freshwater and Anadromous Division, 1989. v, 8 p. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences : no. 2016) ISSN 0706-6473
MICROLOG 89-04694 1 fiche

The Mersey Fish Culture Station is located on the Mersey River which drains to the southwest coast of Nova Scotia. The river is acidic, dark brown in colour, lacks acid-neutralizing capacity, has a low calcium concentration and an elevated concentration of total dissolved aluminum. Water for the fish station is withdrawn at a 2 m and a 9 m intake at the Big Falls headpond. Salmon parr were exposed to water withdrawn from the bottom of the Big Falls headpond from mid-June 1988 until mortalities began to occur on

August 12. At that time, increasing volumes of surface water were mixed with the bottom water so that by August 25 only surface water was provided to the parr. This report describes the attempts made to determine the cause of the mortalities.

Mortality risk distributions : a life table analysis

by G. Rowe. Ottawa : Statistics Canada, Analytical Studies Branch, 1988. 30 p. Bibliogr. (Research paper series ; no. 19) French ed. (*Répartitions des risques...*) on the same fiche. CSI 01100.214.
MICROLOG 89-02300 1 fiche

Study of the distribution of mortality risks in Canada from 1975-77, based on nonparametric estimates of probability densities of risks of death in 5-year age groups. The estimates are derived from small area, age-specific mortality data after adjustment for sampling variety. Summary measures of the distribution of risks are provided by estimates of quartiles of expectation of life at birth and of median age at death. Interquartile ranges for life expectancy are estimated to be 3.2 years for males and 2.8 years for females. The geographic units are census divisions which correspond to counties or other subprovincial administrative units representing all regions in Canada except the Yukon and Northwest Territories and the most northerly part of Quebec.

Movements and habitats of caribou in the mountains of southern British Columbia

by K. Simpson and G.P. Woods. Nelson, B.C. : Ministry of Environment and Parks, Wildlife Branch, 1987. 36 p. : ill. Bibliogr. (Wildlife bulletin : no. B-57) ISSN 0829-9560
ISBN 0-7726-0717-6
MICROLOG 89-00365 1 fiche

Woodland caribou populations are declining in British Columbia and are no longer present on many of their former ranges. This study attempts to define the most critical times and habitats of mountain caribou using radio-collared animals. The study area lies within the Interior Wet Belt and encompasses the drainage of the Columbia River between Revelstoke and Mica. All radio-collared animals were located approximately every 2 weeks from March 1981 to September 1985, with accuracy verified by observation of tracks. Time and activity data were recorded for sighted groups and, whenever possible, these groups were classified by sex and age. Group size was estimated by counting tracks or beds when animals were not sighted. Most information was obtained from November to July each year, subdivided into 4 seasons. Habitat units were classified based primarily on forest cover and biogeoclimatic groupings were classified based on forest cover mapping. Food habits, particularly in winter and spring, were documented through observation of animals, examinations of feeding sites, winter tracking, and fecal analysis.

Multivariate ARIMA forecasting of irregular time series

by P.A. Cholette and R. Lamy. Ottawa : Statistics Canada, Methodology Branch, Time Series Research and Analysis Division, 1985. 27 p. : ill. Bibliogr. *Bilingual (La Prévision ARMMI multivariée...)*. Presented at the International Symposium on Forecasting.
MICROLOG 89-03510 1 fiche

Paper indicating how smoothing filters can be built into multivariate ARIMA models. The technique can be especially useful for time series with sizeable irregular fluctuations which tend to blur the relationships between the series, to disturb the forecasts, and to underestimate the forecasting performance. The approach proposed circumvents these problems, and is illustrated by joint ARIMA forecasting of the Canadian Composite Leading Indicator and the Index of Industrial Production.

The NAIRU in Canada : concepts, determinants and estimates

by D.E. Rose. Ottawa : Bank of Canada, 1988. ii, 48 p. : ill. Bibliogr. (Technical report ; 50)
MICROLOG 89-04632 1 fiche

NAIRU is an acronym for non-accelerating-inflation rate of unemployment. This paper reviews the determinants of the NAIRU, why it may change over time, and various methodologies that have been used to measure it. The discussion of determinants considers factors that influence the incentives to be in the labour force and to work; aspects of the composition of the labour force; particular supply factors; and temporary structural influences in the economy. The discussion of methodology covers: reduced-form unemployment equations; the Phillips curve and Okun's Law; and new work at the Bank of Canada that combines Okun's Law, a production function and the Phillips curve in a simultaneously estimated system.

Near-shore migratory behaviour and exploitation of maturing pink salmon *Oncorhynchus gorbuscha* from the Canadian Department of Fisheries and Oceans statistical area 6 in 1985

by M.A. Henderson. Vancouver, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, 1988. iii, 21 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences : no. 1621) ISSN 0706-6457 MICROLOG 89-01263 1 fiche

Pink salmon have formed a major component of the total commercial salmon catch in British Columbia since 1877. One of the important pink salmon production systems lies within the boundaries of Statistical Area 6. Little is known about the near-shore migratory behaviour of these salmon during the adult phase of their life history, making it difficult to regulate fisheries to achieve management goals. This report presents information on the near-shore migratory behaviour of Area 6 adult pink salmon, the location of fisheries intercepting the salmon, their timing through these fisheries, and the travel time of the salmon between the different fisheries. In addition, estimates of the harvest of Area 6 adult pink salmon are provided for 1985 for all fisheries where these fish were known to occur.

Nearshore epibenthos of the Campbell River estuary and Discovery Passage, 1983, in relation to juvenile chinook diets

by B.A. Kask, T.J. Brown and C.D. McAllister.
Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1988. ix, 71 p. : maps. Bibliogr. (Canadian technical report of fisheries and aquatic sciences : no. 1616) ISSN 0706-6457
MICROLOG 89-01038 1 fiche

There is a growing awareness of the importance of estuarine and nearshore habitats to the survival of juvenile salmon, although many have been degraded by logging and other industrial activities. The Campbell River estuary has recently been reconstructed and replanted, with monitoring begun in March 1982. This report describes the 1983 sled survey and compares the epibenthos at the established and newly created sites, as well as considering the seasonal and zonal differences in density and taxa composition. The contribution of the epibenthic community in the freshwater, estuarine and marine environments to the diet of the juvenile chinook is also discussed.

Nearshore epibenthos of the Campbell River estuary and Discovery Passage, 1984, in relation to juvenile chinook diets

by B.A. Kask, T.J. Brown and C.D. McAllister.
Nanaimo, B.C. : Dept. of Fisheries and Oceans, Biological Sciences Branch, Pacific Biological Station, 1988. ix, 73 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences : no. 1637) ISSN 0706-6457
MICROLOG 89-01620 1 fiche

The Campbell River estuary, on the east coast of Vancouver Island, was the site of extensive rehabilitation in 1981-82, with surveys of the estuary initiated in 1982 and concluded in 1986. As part of the study, epibenthic organisms were sampled from 1982-84 using a small sled-mounted net. This report presents data from 284 epibenthic sled samples collected from 10 sites in the estuary and surrounding area, including established areas, newly created islands, and sites in the transition area immediately off the river mouth and in the marine zone. The epifauna was counted and compared to the food organisms present in juvenile chinook collected in the same areas. Comparisons were also made of the epibenthos and the diets of the juvenile chinook in all 3 zones from 1982-84.

Need for repair : an evaluation of alternative question phrasing

University of Manitoba Research Ltd., Social Sciences Division and DSI Tandem Coop Resources Ltd. Ottawa : Canada Mortgage and Housing Corporation, 1988. 67 p.
MICROLOG 89-04334 1 fiche

This report reviews the method used on the Census and Household Facilities and Equipment (HFE) surveys. This comparison identifies several potential sources for differences in the proportion of respondents reporting need for repairs with emphasis on the question wording. It also details the method used in this research. This approach uses two surveys, one a survey of Manitobans, the other a survey of Winnipeg residents. It reports on the reliability of the two question phrasings used by the Census and HFE and presents the results of the two surveys with respect to differences in proportions in the need for repair. It also examines the validity of ratings on dwelling condition. This approach uses supplementary descriptions of needed repairs supplied by respondents to the survey as well as the comparison of occupant ratings with those of qualified inspectors. The final section summarizes the key findings and implications of this research.

Negotiated working conditions in Alberta : collective agreements, 1989

Edmonton Alberta Labour, Planning and Research Branch, 1989. xvii, 411 p. CSI 34110.003 ISSN 0708-5818
MICROLOG 89-03168 5 fiche

Collective bargaining agreements provide a valuable source of information on the nature of working conditions and plant operations. Also, they reflect the diversity of employment conditions among industries and companies, and the scope of the issues over which bargaining takes place. This report presents, in summary form, information on the frequency of occurrence of clauses in the selected Alberta agreements. It highlights trends, measures the prevalence and characteristics of particular provisions, and details the types and levels of non-wage benefits.

Nekite River spawning channel 1988 operations

by I. Winther, S.K. Bachan and R.D. Goruk. Prince Rupert, B.C. : Dept. of Fisheries and Oceans, Fisheries Branch, 1989. iii, 17 p. : ill. (Canadian data report of fisheries and aquatic sciences : no. 753) ISSN 0706-6465
MICROLOG 89-05709 1 fiche

Nekite River chum salmon are the largest chum stock in Area 10 and usually enter the commercial fishing area during August to early September, allowing for the harvest of any surplus when other chum and salmon stocks are not present. Chum escapements in the early 1980s were at or near target, but later returns were poor, leading to the construction of a spawning channel in 1986 to establish a stable spawning habitat. This report reviews the work performed on the spawning channel in 1988, along with efforts to get chum salmon to use it. Work required in 1989 is identified and comments on the operation of the camp are made.

The Nestucca oil spill : preliminary evaluation of impacts on the west coast of Vancouver Island

by W. Duval, et al. Victoria : Ministry of Environment ; West Vancouver, B.C. : Environment Canada, 1989. x, 84 p. : maps. Bibliogr. ISBN 0-7726-0967-5
MICROLOG 89-06403 2 fiche

On December 23, 1988, a collision occurred between the fuel barge Nestucca and its tender tug off the mouth of Grays Harbour in the state of Washington. The barge was

transporting heavy Bunker C oil, some of which spilled, moved north, and eventually stranded on shorelines along the west coast of Vancouver Island. A federal-provincial team was assembled to assess the short and long term environmental impacts of the spill. This report presents the preliminary environmental impacts of the spill, including assessment procedures, movements and fate of the spill, physical, biological and resource use impacts, and impacts on native and local fisheries and aquaculture operations.

Neutron diffraction measurements of crystallographic texture in single-pass weld and T-weld material

by T.M. Holden and J.H. Root. Chalk River, Ont. : Atomic Energy of Canada Limited, 1989. 19 p. : ill. Bibliogr. CANMET contract: 89208-01-SQ. MICROLOG 89-03126 1 fiche

The crystallite orientation distribution functions for a sample of weld material taken from a

single-pass weld, for a sample taken from the plate in which the weld was deposited, and for the construction material of a T-weld, were obtained from neutron diffraction measurements. The principal grain orientations are identified and discussed. With a knowledge of the appropriate single crystal elastic constants, the effective Young's modulus as a function of orientation was computed from the distribution function for each sample.

New Brunswick hydrometric network evaluation : background report no. 2 : delineation of physiographic-climatic zones

Dartmouth, N.S. : Environment Canada, Inland Waters and Lands ; Fredericton : New Brunswick Dept. of Municipal Affairs and Environment, 1988. vi, 37 p. : maps. Bibliogr.
MICROLOG 89-03373 1 fiche

The New Brunswick Hydrometric Network Evaluation was a 2-year study of the surface water quality monitoring network in the province. The study evaluated the entire network on its effectiveness to monitor the water resources. A series of 4 background

reports examining various aspects of the study were produced. This report is the 2nd of the series and deals mainly with the physiographic and climatic influences on the natural hydrology. It also proposes a design scenario of a minimum network to produce a representative sampling of the hydrology of the region.
AP CA EV PR SC

New Brunswick hydrometric network evaluation : background report no. 3 : regional hydrology and data transfer methodologies

New Brunswick Hydrometric Network Evaluation Project. Regional Hydrology and Data Transfer Subcommittee. Dartmouth, N.S. : Environment Canada, Inland Waters and Lands ; Fredericton : New Brunswick Dept. of Municipal Affairs and Environment, Water Resource Planning Branch, 1988. vi, 73 p. : ill. Bibliogr.
MICROLOG 89-03372 1 fiche

In order to assess the ability of the New Brunswick hydrometric network to transfer data from gauged to ungauged sites, a regional hydrology study was undertaken. It was decided that regional regression equations provided the most appropriate approach and these were performed for mean, low and high flows. The transfer of daily flows with flow duration curves was also investigated. The various studies led to mean, low and high flow hydrologic regions as well as indications as to the deficiencies in the network. Based on these findings, a proposal was prepared for a minimum regional hydrology network as well as for a target or optimal regional hydrology network.

AP CA EV PR SC

New Brunswick hydrometric network evaluation : principal report

Dartmouth, N.S. : Environment Canada, Conservation and Protection, Inland Waters ; Fredericton : New Brunswick Dept. of Municipal Affairs and Environment, Water Resource Planning Branch, 1988. xiii, 112 p. : ill. Bibliogr.
MICROLOG 89-03375 2 fiche

An evaluation of the hydrometric network in New Brunswick was performed starting from basic principles of hydrometric network design and proceeding through the analysis of the present network and its ability to meet user needs. Discharge stations used to monitor the streamflow component of the regional hydrology were assessed on their ability to contribute to the transfer of information to ungauged sites. A survey was conducted to determine users' needs. The results of the various analyses were combined using an audit approach based on selected rating factors, with the final output including specific network improvements designed to satisfy hydrometric needs and a list of network adjustment scenarios.

New Brunswick hydrometric network evaluation : summary report

by A. Perks...et al. Dartmouth, N.S. : Environment Canada, Conservation and Protection, Inland Waters ; Fredericton : New Brunswick Dept. of Municipal Affairs and Environment, 1989. i, 10, i, 11 p. : ill. Bilingual (Evaluation du réseau...)
MICROLOG 89-03371 1 fiche

The water resources of the Province of New Brunswick are monitored by the Government of Canada under a cost-sharing agreement with the provincial government and have been since 1918. This report presents the results of an assessment of the network from the user's, hydrological, technical, and socioeconomic points of view. The main activities included an assessment of user needs to identify the present and potential uses for hydrometric data and information in New Brunswick; an assessment of regional hydrology capabilities to establish how well the present network can be relied upon to estimate streamflow at ungauged locations; a review of new hydrometric techniques and equipment; and a determination of station priorities, including an evaluation of alternative gauging strategies.

A New frontier : globalization and Canada's financial markets

Economic Council of Canada. Ottawa : The
Council, 1989. x, 59 p. Bibliogr. *French*
ed. (Le Nouvel espace...) : 89-04877/1. ISBN
0-660-13219-2
MICROLOG 89-04876 1 fiche

This statement describes the stages of the dual
process of internationalization and innovation,
and examines the extent of the globalization of
financial markets and the emergence of new
instruments and practices. It also analyzes
Canada's participation in international markets
and the process of financial innovation. It
focuses on the role played by Canadian-
controlled institutions and examines the
implications of these new developments for
certain long-standing debates in domestic public
policy. Finally, it offers proposals on how
Canadians, and especially their governments,
can meet the challenges posed by
internationalization and innovation.

New loader and truck payload measurement systems

by V. Srajer. Ottawa : Canada Centre for
Mineral and Energy Technology, Coal
Research Laboratories, 1988. vi, 11 p.

Bibliogr. (Report : CRL 88-50(TR))
MICROLOG 89-00476 1 fiche

There are two different approaches to
monitoring quantities of material being moved at
surface mines: monitoring the load at the
loading equipment, or monitoring truck payload.
In the past, automatic load measurement for
loading equipment was tested unsuccessfully at
several surface coal mines in Canada. Truck
load monitoring systems were introduced by
several truck manufacturing companies in the
past, or by truck accessories companies. Only
one system, OBDAS, developed by Philippi-
Hagenbuch, is operational at present at the
Gregg River mine. Two new systems were
introduced at the Minexpo '88 mining show held
in Chicago in April 1988. One is PMS
(Payload Monitoring System) developed for
Caterpillar off-highway vehicles, another is VSM
(Vital Signs Monitor and Load Weighing System)
developed for Marathon Letourneau L-1000
loaders and Titan-2000 series trucks. Both
systems are introduced in this report.

A New method of making waferboard by auto-bonding

prepared for Dept. of Supply and Services :
by K.C. Shen Technology International Ltd.
Ottawa : Canada Mortgage and Housing
Corporation, 1987. xi, 63 p. : ill. Bibliogr.
MICROLOG 89-04400 1 fiche

The waferboard industry has so far relied
upon highly developed synthetic resin binders
(phenol formaldehyde) and slack wax as the
essential components. Since phenolic resin is
derived from petrochemicals, it has become
increasingly expensive. This report describes
the process of auto-bonding which eliminates
the need for phenolic resin and wax altogether.
It describes the methods and materials and
discusses such technical considerations as the
effect of steaming condition, wafer thickness,
size and length, press condition, and board
density. Economic considerations of steam
consumption, economic prospects, and
environmental considerations are also included

The NGD staff planning model : a spreadsheet application for generating divisional staffing plans

by R. Sue. Toronto : Ontario Hydro, Research Division, 1988. 184 p. : ill. (Report ; no. 88-191-K)
 MICROLOG 89-04561 2 fiche

The Planning and Administration Section of the Central Nuclear Training Department produces staffing plans for the Nuclear Generation Division using several Lotus 1-2-3 spreadsheets. Since Lotus 1-2-3 does not have the capability to conveniently link the spreadsheets together, any changes to the staffing plans require the spreadsheets to be manually updated, a very time-consuming and error-prone process. The NGD Staff Planning Model was designed to automatically maintain data consistency throughout the staff planning process, and to reduce the manual effort needed to generate the NGD staffing plans. The application was developed on a Macintosh SE computer using Microsoft Excel. This report includes a user's guide and a technical reference manual which explains how to use the package, and describes the design features of the application.

No one way of being : a study of the practical knowledge of elementary arts teachers

by R. Courtney. Toronto : Ministry of Education, 1988. vi, 136 p. Bibliogr. *French ed. (Une Diversité de perspectives...) 89-00303/4. ISBN 0-7729-3556-4*
 MICROLOG 89-00302 2 fiche

It is not immediately evident how good arts teachers operate since it has been found that good arts teachers cannot articulate their knowledge and their expertise. This study discovers the practical, personal, and intuitive knowledge by which good elementary arts teachers are guided and the body of beliefs that is transmitted in the profession. It ascertains the assumptions of elementary arts teachers; the nature of their practical knowledge; their procedures that reveal assumptions and practical knowledge; and whether a practical theory of arts teaching could be revealed that was understandable at all levels of the education profession.

NOGAP B.6, vol. 4 : chemical data collected in the Beaufort Sea, summer, 1987

by R.W. Macdonald. Sidney, B.C. : Dept. of Fisheries and Oceans, Institute of Ocean Sciences, 1988. v, 193 p. : ill. Bibliogr. (Canadian data report of hydrography and ocean sciences ; no. 60) ISSN 0711-6721
 MICROLOG 89-00722 2 fiche

As part of a major inter-disciplinary study to measure the transport and fate of hydrocarbons over the Beaufort Shelf and the primary productivity of these coastal waters, a sampling program was conducted out of Tuktoyaktuk with aircraft support and a shelf-wide cruise. Water properties were measured on several transects extending from inshore waters to the shelf break, and one deep station (3500 m) in the southwestern Canada Basin. Samples were collected during July-September 1987. Chemical measurements were made on bottle samples, including salinity, temperature, dissolved oxygen, phosphate, nitrate, reactive silicate, chlorophyll a, total suspended solids, and particulate organic carbon and nitrogen.

Non destructive examination of non metallic materials : research needs and opportunities

by J.M. Braun. Toronto : Ontario Hydro, Research Division, 1988. iii, 16 p. Bibliogr. (Report ; no. 88-2-K)
MICROLOG 89-02604 1 fiche

Overview of the current status of non-destructive examination of non-metallic materials, the possibilities for applications, and the necessary steps to develop a program. The review identifies both the more promising application domains and the techniques likely to be of assistance in the evaluation/characterization/assessment of non-metallics, initially in a laboratory setting, but ultimately for field application. Potential techniques discussed are divided into electromagnetic (radiography, optical interference, thermography, microwave inspection, magnetic resonance) and mechanical (ultrasonic, acoustic emission).

Not a long shot : Canadian industrial science and technology policy : summary

by G.P. Steed. Ottawa : Science Council of Canada, 1989. 12, 13 p. (Background study ; 55) *Bilingual (Un Coup sûr...)*.
MICROLOG 89-05559 1 fiche

Outline of the fundamental changes in the world economy as a result of advances in science and technology. These changes profoundly influence the international competitiveness of Canadian industry and, consequently, the economic wellbeing of Canadians. The study reviews the science and technology policies of industries and governments in Canada and suggests changes that would help this country, through economic renewal, to maintain its standing as one of the world's advanced industrial nations.

Notes on corporate concentration and Canada's income tax

by M.C. Wolfson. Ottawa : Statistics Canada, Analytical Studies Branch, 1987. 30 p. : ill. Bibliogr. (Research paper series ; no. 8) *French ed. (Notes sur les groupements...) on the same fiche*.
MICROLOG 89-02381 1 fiche

Exploration of the relationship between the corporate income tax and tendencies toward corporate concentration. The study considers tax provisions relating directly to mergers and takeovers such as interest deductibility and capital gains rollovers, relying mainly on anecdotal evidence. The larger part of the study draws on a detailed sample of 20,000 corporate income tax returns for 1983 and looks at the effective average rate of taxes paid, net of government transfers received.

Notes sur les groupements de sociétés et l'impôt sur le revenu au Canada

par M.C. Wolfson. Ottawa : Statistique Canada, Direction des études analytiques, 1987. 44 p. Bibliogr. (Documents de recherche ; no. 8) *L'éd. anglaise (Notes on corporate...) sur la même fiche*.
MICROLOG 89-02381 1 fiche

Etude sur le rapport qui existe entre l'impôt sur le revenu des sociétés et les tendances vers les groupements de sociétés. Elle se divise en deux parties: les dispositions fiscales directement liées aux fusions et aux acquisitions, comme la déductibilité des intérêts et les roulements de gains en capital, et les taux effectifs moyens d'imposition payés. On y examine les rapports qui existent entre la taille de l'entreprise, les taux effectifs d'imposition et l'utilisation de diverses dispositions fiscales.

Notification and surveillance of occupational diseases in Canada and other countries

prepared by Ian Easson...et al. ; for the Federal-Provincial Advisory Committee on Environmental and Occupational Health. Hamilton, Ont. : Canadian Centre for Occupational Health and Safety, 1984. ix, 98 p. Bibliogr. ISBN 0-660-11686-3
MICROLOG 89-03649 2 fiche

This report is a detailed look at each Canadian jurisdiction's present legal requirements and actual practices regarding notification of occupational diseases. It reviews the existing state of affairs regarding notification and surveillance in three countries, Finland, the United Kingdom, and the Soviet Union, to provide contrast with the Canadian situation. It also provides a critique of the Report of the Federal-Provincial Working Group on Occupational Health, together with the authors' summary and recommendations.

NOx emissions from soils

by M. MacKay. Toronto : Ontario Hydro, Research Division, 1988. 20 p. Bibliogr. (Report ; no. 88-209-K)
MICROLOG 89-04297 1 fiche

Nitrogen oxide is considered a critical component of global atmospheric chemistry as it

is involved in the mechanisms that regulate the production of ozone and the OH radical, the most important oxidants in the troposphere. There are several known sources of tropospheric nitrogen oxide, but the contributions of each to the global nitrogen oxide budget is not accurately known. The most uncertain nitrogen oxide source term is thought to be biogenic production, due in part to the relatively few number of studies undertaken to accurately measure soil emissions. This report reviews soil flux measurements over a range of environmental conditions. Factors affecting the emission of nitrogen oxide from soils are also examined.
EV ON PR SC

**NOx formation and control during
fossil-fuel combustion**

by F. Northrup. Toronto : Ontario Hydro, Research Division, 1988. i, 42 p. Bibliogr. (Report ; no. 88-213-K)
MICROLOG 89-04441 1 fiche

The emission of NOx (NO and NO2) into the atmosphere, as a result of fossil-fuel combustion, is of concern because of its potential effect on the environment. A comprehensive survey of the available information on the various NOx formation and destruction mechanisms occurring during fossil-fuel combustion was carried out and this information was used to review the methods available for NOx reduction, including both in-furnace NOx removal techniques and flue gas treatments.

**NRC Workshop on Water
Colorimetry : proceedings**

edited by C.K. Ross and N.V. Klassen. Ottawa : National Research Council Canada, Division of Physics, 1988. x, 139 p. : ill. Bibliogr. ISBN 0-660-12942-6
MICROLOG 89-03243 2 fiche (Available on fiche only)

The need for improved high energy absorbed dose standards for photon and electron beams used for radiation therapy has been recognized for a long time. For radiation therapy purposes, the reference material for specifying the absorbed dose is usually water, and so the most direct way of establishing a suitable absorbed dose standard is with a water calorimeter. This workshop is presented as a state-of-the-art series of presentations and discussions describing current research and future trends.

Nuclear-powered submarines : potential environmental effects

by T. Curren. Ottawa : Library of Parliament, Research Branch, 1988. 8 p. Bibliogr. (Background ; BP-181E) *French ed. (Les Sous-marins à...) on the same fiche.* ISBN 0-660-13225-7
MICROLOG 89-05461 1 fiche

The proposed acquisition of nuclear-powered submarines by the Canadian Armed Forces raises a number of legitimate concerns, including that of their potential impact on the environment. This background paper deals principally with environmental concerns related to the normal operation of the submarines. A secondary concern is related to the possibility of a reactor accident. Data on radioactive releases from the vessel is taken from experience by the U.S. Navy as presented to a Congressional committee. Environmental safeguards are also examined.

Numerical simulation of steam injection in bitumen and heavy oil reservoirs, phase II

by P.G. De Buda and D.E. Cormack. Toronto : University of Toronto, Dept. of Chemical Engineering and Applied Chemistry, 1988. 2 v. : ill. *CANMET contract: OST85-00427.*
MICROLOG 89-03119 3 fiche

Numerical simulation is an essential tool in the design and development of oil recovery strategies, and is particularly important for the more costly and marginally economic recovery schemes contemplated for heavy oil and bitumen recovery. One process that has shown excellent promise is the horizontal-well gravity-drainage steam injection process. In field trials, it was found that the formation is heated only in a spherical zone around the injection well. To resolve these problems, this report develops a two-dimensional simulator to track the location of the steam front explicitly within a finite-difference procedure, so that the phenomena at the steam front can be more accurately simulated. The report presents details of the mathematical analysis required to incorporate the time-dependent coordinate transformation and the finite-difference representation.

A Nurseryman's primer on greenhouse computers

S.I. : Canadian Forestry Service - Maritimes, 1989. 11 p. : ill. (Technical note ; no. 212) ISSN 0820-8107
MICROLOG 89-04645 1 fiche

Traditional greenhouse climate control and monitoring systems are rapidly becoming obsolete because of the increasingly widespread application of microprocessor technology. For the first time, the computation power delivered by a good personal computer is more than sufficient to maintain not only the greenhouse environment but other associated functions, as well. A number of different climate computer systems with proven track records for performance are already available, each having different strengths and operating characteristics. This document provides general criteria by which all systems can be comparatively assessed.

Nutrient enrichment study of Shoal Lake (western Manitoba)

by A.E. Beck. Winnipeg : Manitoba Environment and Workplace Safety and Health, 1988. iv, 67 p. : ill. Bibliogr. (Water Standards and Studies report ; no. 88-3)
MICROLOG 89-03329 1 fiche

The Council of the Regional Municipality of Shoal Lake requested a water quality study on the lake to develop a realistic and effective strategy for rehabilitation of lake water quality to restore the aesthetic and recreational appeal of the lake. This study provides a baseline for such a strategy by defining the severity of the problem and by identifying and quantifying the causes of the problem. The study began in March 1987 and included sample analysis, trophic status, identification of the problem nutrient, and validation of a phosphorus budget.

Nutritional and soil compaction aspects of establishing forest cover on winter landings in the Fort St. James Area

by W.W. Carr. S.I. : Forest Resource Development Agreement, 1988. v, 6 p. Bibliogr. (FRDA report ; 047) ISSN 0835-0752 ISBN 0-7726-0873-3
MICROLOG 89-02956 1 fiche

Timber harvesting with ground-based equipment necessitates the construction of skid roads and landings which may alter the soil's chemical and physical characteristics and adversely affect

site productivity. The result is a complex interaction between soil texture, changes in soil properties, and tree species. This report presents the results of a study to measure selected soil physical and chemical parameters on landings and adjacent cutover areas in the Fort St. James areas to ascertain the relative effects of winter landing construction on soil properties, and the resulting effect on tree growth. Additionally, foliar nutrient status of the established plantations on landings and natural regeneration on off-landing areas was measured. Seedling height-growth data from the off-landing areas were collected to supplement the height data from the landing seedlings as reported in Arnott (1985).

Observation

by M. Chow. Ottawa : Public Works Canada, Architectural and Engineering Services, 1988. v, 22, v. 24 p. Bibliogr. (Building performance evaluation series ; Document D24) *Bilingual (Observation).*
MICROLOG 89-01911 1 fiche

Observation is the visual identification of building behaviour and use patterns (what the users are doing) and how the environment is being used without direct user participation. This manual provides an understanding of the observation techniques needed to gather information as part of a functional evaluation, and/or to assess the work of others conducting such an evaluation. The occupancy and use analysis stage illustrates how these types of observations are used, and how they relate to other techniques in functional evaluation test hypotheses.

Observations and measurements of containerized black spruce seedlings growing in a greenhouse

by A. Gonzalez and A.L. D'Aoust. Sainte-Foy, Que. : Government of Canada, Canadian Forestry Service, Laurentian Forestry Centre, 1988. vii, 70 p. : ill. Bibliogr. (Information report : LAU-X-79E) ISSN 0835-1589 ISBN 0-662-94664-2
MICROLOG 89-00442 1 fiche

Report covering a variety of the growing conditions generally encountered by the producer of containerized seedlings in a greenhouse and the identification of potential difficulties. Seedling production and most observations were carried out in a small (45 sq m) glass greenhouse with steam heating provided by tubular radiators running around the inside of the greenhouse at ground level; fan ventilation; and two different lighting systems. Spring (February to June) and summer (May to September) crops of black spruce seedlings were monitored for temperature, relative humidity, radiant energy, watering, fertilization, water content, soluble salts, pH, height, dry weight, diameter, nitrogen, phosphorus and potassium. Greenhouse production extended over 16 weeks, followed by 3-4 weeks in a shadehouse before planting.

Observed behaviour of a new medium span slab-on-girder bridge

by B. Bakht. Downsview, Ont. : Ministry of Transportation, Research and Development Branch, 1988. ii, 38 p. : ill.
MICROLOG 89-03145 1 fiche

Many tests on slab-on-girder bridges conducted in Ontario and the U.S. have led to the conclusion that these bridges are much stiffer than shown by calculations. The North Muskoka River bridge in Ontario was tested to determine its dynamic characteristics; it was observed that the longitudinal flexural rigidity of the bridge was much larger than could be rationalized analytically. In an attempt to find the reason for the discrepancy, the bridge was analysed by the grillage analogy method, which can take account of the variations of the girder movement of inertia along its length. All those factors which could have enhanced the longitudinal flexural rigidity of the bridge were incorporated in the analysis. This report describes the test, and includes most of the relevant data obtained, as well as an analysis.

The Occurrence of cyprinids and other small fish species in relation to pH in Ontario lakes

by J.E. Matuszek, J. Goodier and D.L. Wales. Toronto : Ministry of Natural Resources, 1988. ii, 109 p. : ill. Bibliogr. (Ontario fisheries acidification report series ; no. 88-14) ISSN 0832-7629 ISBN 0-7729-4947-6
MICROLOG 89-05975 2 fiche

Many common small fishes, especially members of the family Cyprinidae, are highly sensitive to acidic water and therefore are expected to play a substantial role in the observed decline of total species richness with decreasing pH. Data was compiled from 488 Ontario lakes which were extensively surveyed for both large and small fish species. Using this data set, the relationships between total number of fish species and lake area and pH are examined, followed by the ratio of cyprinid species in relation to lake area and pH. Differences between lakes in which a particular species is found, compared to those in which it is absent, are examined, and the utility of each species as an early indicator of acidification stress in the fish community is assessed.

The area considered is the block bounded by Front Street West, Bay Street, Wellington Street West and Yonge Street. This report provides a description of the planning policies and objectives relevant to the development of the block, and the principles on which the

proposed Part II Plan should be based. It also provides a description of the density bonus system proposed. Finally, it includes a brief description of the process for reviewing, approving, and implementing the Part II Plan.
MU ON PL

Official plan part II : Bay Street corridor residential intensification zone : proposals

Toronto : Toronto Planning and Development Dept., 1988. 43 p. : maps.
MICROLOG 89-01004 1 fiche

The report considers the future of the Bay Street corridor from College to Dundas Street. It examines the possible impacts of increased residential densities on such matters as population density and mix, transportation, sociological impacts, residential amenities, built form and urban design. It reviews options for density strategies and recommends a strategy for the area.

L'offre et la demande dans l'industrie du taxi au Québec : caractéristiques de l'offre et de la demande

par M. Trudel. Québec : Gouvernement du Québec, Ministère des transports, 1988. viii, 71 p. (Études et recherches en transports) (Systèmes de transport) ISBN 2-550-18519-6
MICROLOG 89-04709 1 fiche

Cette étude présente les résultats de deux sondages réalisés auprès des exploitants de taxi et fournit un relevé des appels reçus par les compagnies de service de taxi du Québec. Ces données permettent de préciser la disponibilité du service offert à la clientèle et

l'importance économique de cette industrie de transport. Les objectifs de ce projet visent à estimer l'offre et la demande de transport par taxi; mesurer l'impact de l'ouverture de nouveaux marchés sur l'offre et la demande en service de taxi; évaluer la demande minimale de transport public des personnes; et déterminer la qualité du service, la disponibilité, la productivité et la rentabilité.

L'offre et la demande dans l'industrie du taxi au Québec : demande journalière recensée sur une base annuelle

par L. Guimont. Québec : Gouvernement du Québec, Ministère des transports, 1988. vii, 87 p. : ill. (Études et recherches en transports) (Systèmes de transport) ISBN 2-550-18521-8
MICROLOG 89-04708 2 fiche

Ce document porte sur la demande journalière enregistrée par les associations de taxi sur une base annuelle et mesure l'influence de divers paramètres tels que: la période de l'année; le jour de la semaine; la taille de l'association; la taille de l'agglomération; et le climat. Après une présentation des sources de données, de leur traitement en termes de validation, de correction et d'estimation des données manquantes, on étudie l'influence de chaque paramètre pour l'extérieur de Montréal-Centre puis pour cette agglomération. Finalement, on compare les résultats de ces deux grandes subdivisions.

Oil-based drilling muds : off structure monitoring : Beaufort Sea

by P. Erickson, B. Fowler and D. Thomas.
Ottawa : Environmental Studies Research Funds, 1988. xii, 188 p. : ill. Bibliogr. (Environmental Studies Research Funds report no. 101) ISBN 0-921652-00-3
MICROLOG 89-06075 3 fiche

Oil-based muds (OBM) are drilling muds in which oil is the continuous phase, usually highly refined mineral oils such as naphthenic and paraffinic oils. Well cuttings become contaminated with drilling mud during the drilling process and treatment by mechanical means such as washing does not remove all the mud, thereby introducing it into the marine environment. This study was carried out to address the fate of oil-contaminated cuttings discharged from Minuk I-53 and Kaubvik I-43 in the Beaufort Sea, drilled by Esso Resources Canada Ltd. in the winters of 1985-86 and 1986-87 respectively. The study monitored the concentration of base oil in the vicinity of the well locations, and determined the areal extent of cuttings at both well locations over 2 years.

On smoothed estimates of unemployment rates from labour force survey data

by S. Kumar and J.N.K. Rao. Ottawa : Statistics Canada, Methodology Branch, Census and Household Survey Methods Division, 1985. 8 p.
MICROLOG 89-03710 1 fiche

The Canadian Labour Force Survey (LFS) provides precise estimates of monthly unemployment rates at the national level and also at the regional levels. However, the survey estimates of unemployment rates in cross-classifications are less precise, and the coefficient of variation for cells with small samples could be unacceptably high. By fitting a model to survey estimates of cell proportions, it is possible to obtain smoothed estimates which are considerably more efficient than the survey estimates. Smoothed estimates under a logistic regression model are given and the associated standard errors are obtained. An application to data from the October 1980 LFS is also given. The empirical results indicate that the smoothed estimates are considerably more efficient than the survey estimates, especially for cells with small samples.

On-land validation of the Underwater Metabolic Assessment System (UMAS)

by S.M. Fairburn, T.T. Romet and D. Eaton. Downsview, Ont. : Defence and Civil Institute of Environmental Medicine, 1988. 18 p. : ill. Bibliogr. (DCIEM research report ; no. 88-RR-47)
MICROLOG 89-02001 1 fiche

The recent increase in underwater research has produced an accompanying need for methods to assess energy and ventilatory requirements of diving activities. In response, the Underwater Metabolic Assessment System (UMAS) was built. UMAS consists of a low-resistance, open-circuit, bag-in-box breathing apparatus and its main feature is its compact size, which allows it to be worn on a diver's back in the water or in the air. This report presents the results of a study to validate its on-land (dry) performance by comparing the results to the performance of a commercially available standard metabolic cart.

The On-site septic system permit process

Victoria : Ombudsman of British Columbia, 1989. 60 p. Bibliogr. (Public report ; no. 18)
MICROLOG 89-05850 1 fiche

The Ombudsman's office, with the cooperation of the Ministries of the Environment, Health and Municipal Affairs, regional district officials and private consulting firms, conducted a study of

the process required to obtain a permit to construct a septic system (not including community on-site septic systems which serve 2 or more dwelling units). The study examined closely the process in order to determine the source of the public's confusion and its perception that the current system is unfair and accountable to no single government body. Information was gained from Chilliwack, Courtenay, Prince George and the Okanagan Valley as to their practices. A literature search was also conducted and those involved in the training of sewage professionals were contacted. The report also includes a history of complaints, historical methods of sewage disposal, principles of on-site sewage technology, and a discussion of the permit approval process.

Operating and emission guidelines for municipal solid waste incinerators

Ottawa : Canadian Council of Ministers of the Environment, 1989. vi, 37, vii, 39 p. *Bibliogr. Bilingual (Lignes directrices relatives...).* *ISBN 0-662-56854-0*
MICROLOG 89-06066 1 fiche

In response to the ever-increasing amounts of municipal solid waste generated in communities every day and the need to explore waste management options other than landfills, many municipalities are considering energy-from-waste incinerators. These guidelines consider acid gases, metals, organics, particulate matter, total hydrocarbons, and oxygen emissions. The guidelines evaluate other specific physical and chemical properties of each potential release stream, give information on the leaching characteristics of the ash residues, and describe processes to prevent leaching. The guidelines also consider limitations upon the types of units covered, give definitions of units of measurements for emission levels, review sampling and analytical methods, examine different incinerators and control systems; assess system performance, and review facility costs. The guidelines are considered as minimum requirements.

Operation of a cascade autoclave to study the liquefaction of wood chips

prepared for Bioenergy Development Program, Renewable Energy Branch, Energy, Mines and Resources Canada : by David G.B. Boocock and Asad Z. Chowdhury. Toronto : University of Toronto, Dept. of Chemical Engineering and Applied Chemistry, 1988. xiv, 88 p. : ill. MICROLOG 89-05648 2 fiche

Report of work on the liquefaction of poplar wood chips in a cascade reactor using steam at high temperature and pressure, continuing on previous work. Modifications were made to the unit for this study, which optimized steam temperature and reaction time to minimize aqueous phase solids (partially converted wood) and maximize oil yields; determined oil yields (w/w) and the carbon distribution in the products; and determined the effect of wood particle size on the products. The report gives a detailed description of the equipment as well. • CA EN SC

The Operation of the unsecured creditors' remedies system in Alberta

by C.R.B. Dunlop...et al. Edmonton : University of Alberta, Institute of Law Research and Reform, 1986. viii, 188 p. Bibliogr. (Research paper ; no. 16) MICROLOG 89-02011 3 fiche

This study answers questions about the Alberta system of remedies for unsecured judgment creditors. "Judgment creditor" refers to any plaintiff who obtained a judgment or order for the payment of a sum of money, excluding money judgments arising out of matrimonial disputes. The four questions are: Do plaintiffs who sue and obtain money judgments use any enforcement process? What remedies are commonly used and what remedies are rarely initiated? How do these remedies operate? (In the case of execution, how far is the remedy pursued?) Finally, how successful is the creditors' remedies process in collecting money for judgment creditors? An Optimal algorithm for weighted minimax flow centers on trees

by H.A. Eiselt and M. Gendreau. Montreal : Université de Montréal, Centre de recherche sur les transports, 1989. 9 p. : ill. Bibliogr. (Publication ; no. 634) MICROLOG 89-04686 1 fiche

This paper considers the problem of locating a facility so that the flow pattern which results from shipping all supplies to the facility is such that it minimizes the largest weighted flow on any individual edge. Some properties of such a facility are derived and a linear-time algorithm for their determination is given. PS SC TR

Optimization of fungal adsorption uranium : final report

by V.I. Lakshmanan, G. Heinrich and G.M. Freeman. Mississauga, Ont. : Ontario Research Foundation, 1988. 69 p. : ill. Bibliogr. *CANMET contract: 79222-01-SQ*. MICROLOG 89-01753 1 fiche

Study to prove repeat loading capacities of physically stabilized fungal biomass from *Penicillium* sp. for the recovery of uranium from Denison mine water. The testwork was carried out on a bench scale in small columns, using a sol-gel. A lifetime of 10 loading - eluting cycles of the sol-gel biomass product was obtained by alternating pretreatment with sodium carbonate, sulphuric acid and ethanol as well as by intermittent wet classification. • CA CM NR PS SC

Optimized linear program analysis of the effect of oxygenated fuels on Canadian oil refineries

Hycard Engineering Inc. Ottawa : Energy, Mines and Resources Canada, Transportation Energy, 1986. 139 p. : ill. *TE-86-5*. MICROLOG 89-05366 2 fiche

This study encompasses a wide variety of oxygenates under different octane requirement

scenarios, regions, and refinery types. Sensitivities to various blending octane values, volatility parameters, and capital costs are also explored. Although the impact of very low oil prices is not examined, the calculated breakeven values for the oxygenates should decrease proportionally. • CA EN SC TR

Ore characteristics that affect breakage during grinding

by W. Petruk and M.M. Smith. Ottawa : Energy, Mines and Resources Canada, Canada Centre for Mineral and Energy Technology, 1988. v. 20 p. : ill. Bibliogr. (CANMET report ; no. 88-5E) ISSN 0707-5196 ISBN 0-660-13121-8
MICROLOG 89-04459 1 fiche

The mechanics of ore breakage during grinding is not understood well enough to develop a liberation model that gives liberations. Existing models assume random breakage for predicting mineral liberations and show good correlations when random breakage is obvious and poor correlations when it is not apparent. The extent to which each type of breakage occurs during grinding of a base metal ore in a ball mill was studied by analyzing the ore from the Brunswick No. 12 deposit of Brunswick Mining and Smelting Corp. Ltd. near Bathurst, New Brunswick. Grinding tests were conducted, and polished sections of the screened fractions from the grinding tests as well as of unbroken ore pieces were analyzed with the image analysis system.

PANELMAX is a computer program model developed to assist industry in making informal management decisions on operating policies in the production of panel products. This study provides consistent experimental data from a single reliable source where all constants are known and the variables are closely controlled. Eighty test panels were manufactured using 3 resin contents and 4 density levels. A complete statistical analysis was undertaken. Response variables were measured for various combinations of 4 nominal resin content levels and 4 nominal density levels. Response variables considered included dry modulus of rupture, dry modulus of elasticity, modulus of rupture after 2 hour boil, internal bond, thickness swell, and linear expansion.

Outgassing and heat loss in polyurethane foam insulated electric hot water tanks

by G. Gowda. Toronto : Ontario Hydro, Research Division, 1989. 15 p. : ill. Bibliogr. (Report ; no. 89-150-K)
MICROLOG 89-06320 1 fiche

Polyurethane foam (PUF) is now used by some manufacturers as an alternative insulation for fiberglass in domestic water heaters, allowing a thinner, more rigid tank with less weight and higher thermal resistance. The municipal electric utilities are concerned about the use of PUF in these heaters for both safety and longevity. Safety is related to the degree, if any, of the outgassing of noxious chemicals and the concern over longevity is related to the degree, if any, of the gradual reduction over time of R value if the freon was to diffuse out of the foam cells. Experiments were designed to measure outgassing and loss of thermal resistance from 5 tanks operated in draw-down and continuous modes, representing worst case conditions. The change in thermal performance of the PUF insulation from aging was evaluated by measuring the standby energy loss, in accordance with CSA C191-M1983, before and after the experimental program.

Overwintering container seedlings using underground heat

by T.D. Ellis and A.W. Fedkenheuer. S.I. : Canada-Alberta Forest Resource Development Agreement, 1988. viii, 66 p. : ill. Bibliogr.

ISBN 0-662-16993-X
MICROLOG 89-05240 1 fiche

Overwintering of container-grown tree seedlings carries with it the risk of damage and mortality from low root temperatures and desiccation, an important consideration to many nursery operators, especially for those who need to carry a crop outside over winter. This study was undertaken to examine root temperatures associated with overwintering in an outdoor compound, to review the literature to obtain information on root temperatures at which reduced seedling viability results, and to evaluate the potential of underground heating for ameliorating container temperatures. Winter moisture stress was also considered. A test plot was set up over the 1987-8 winter at the Joffre nursery of Naval Enterprises, a commercial producer of tree seedlings. The plot was about 20 feet square and a centre area was heated from below by an electric heater. Moisture stress was monitored using a pressure chamber.

Oxygen and sulphur isotope fractionation during bacterial oxidation of metal sulphides

by H.R. Krouse. Calgary, Alta. : University of Calgary, Dept. of Physics, 1988. 50 p. : ill. Bibliogr. Bound with: *Oxygen isotope between arsenate and water. CANMET contract: 69197-01-ST.*
MICROLOG 89-01739 1 fiche

To provide a better data base to assess bacterial oxidation mechanisms, experiments were carried out with pyrite, sphalerite, chalcocopyrite, pentlandite, and ore from Hudson Bay Mining and Smelting in water with different oxygen isotope compositions. At one week intervals, SO₂ in the reaction flasks was sampled to determine the extent of oxidation, sulphur and oxygen isotope composition of the SO₂, and oxygen isotope composition of the water.

Oyster River water management plan

Victoria : Ministry of Environment, Vancouver Island Region : Planning and Assessment Branch, 1988. xii, 91 p. : maps. Bibliogr. ISBN 0-7726-0864-4
MICROLOG 89-00391 2 fiche

The Oyster River Water Management Plan was initiated to establish management strategies in a watershed where water resources are still relatively undeveloped, although forestry, mining, limited farming, and increasing residential development have already made inroads. Strategies are provided for surface and groundwater, instream requirements and water quality, present water allocation and use.

potential water use, and flood flows and flood protection. Recommendations are given.

Pacific Rim Resort : wind monitoring study

by K. Cooper. Burnaby, B.C. : SAR Engineering Ltd., 1987. ii, 17 p. : ill. MICROLOG 89-05638 1 fiche

The Pacific Rim Resort, on the west coast of Vancouver Island, wanted to develop its wind resource for electrical generation. Initial calculations of the wind energy potential of Lennard Island, 3.5 km offshore, indicated that it was marginally acceptable as a wind energy site. Wind monitoring was carried out at the Pacific Rim Resort for 6 weeks, using a data logger in conjunction with an anemometer and tower. Comparison with the hourly measurements from the nearby Lennard Island site were made to determine the relative wind strength at the measurement site.

Particulate emissions of a dual fuel caterpillar 3208 engine

B.C. Research, Division of Applied Physics and Engineering. Ottawa : Energy, Mines and Resources Canada, Transportation Energy, 1987. ii, 32 p. : ill. Bibliogr.
MICROLOG 89-05373 1 fiche

Particulate emissions have become a concern for diesel engine manufacturers and are an important factor to consider when evaluating diesel and dual fuel engines. There has been some speculation that the use of natural gas in diesel engines in dual fuel configuration can dramatically reduce the particulate emissions, since only a fraction of the normal diesel amount is burned. This report evaluates that speculation by determining particulate emissions for a Caterpillar 3208 diesel engine operating on both diesel and dual fuel. All data reported are based on steady state particulate tests.

Peatland inventory of Manitoba, III : Interlake region using Landsat V thematic mapper

by R. Dixon and J. Stewart. Winnipeg : Manitoba Natural Resources, Surveys and Mapping, Remote Sensing Centre, 1988. iv, 22 p. : ill., maps. Bibliogr. *Fold. maps not filmed.*
MICROLOG 89-00082 1 fiche

The vegetation cover, aerial extent and quality of the peatlands in Manitoba need to be defined before determining their potential for fuel, horticulture, agriculture and forestry. Resource data has been available since 1984 from the improved sensor technology of the LANDSAT V thematic mapper. Using this improved capability, a supervised classification of the bog and fen wetland classes in the southeastern portion of the interlake region was produced. Field observations were conducted during the first and last weeks of July and the first week of August 1986 to gather data on various wetland plant communities within the study area. An aerial survey was conducted during the last week of October 1986 to assess wetlands that were not accessible by road.

La Pêche du homard dans la région de Scotia-Fundy, phase 1 : problèmes et observations : rapport sommaire

Canada. Ministère des pêches et des océans. Région de Scotia-Fundy. Direction de la coordination de programme et de l'économie. Ottawa : Ministère des pêches et des océans, Région de Scotia-Fundy, Direction des communications, 1989. ix, 48 p. : ill. *L'éd. anglaise (The Scotia-Fundy lobster fishery...) sur la même fiche.* ISBN 0-662-95554-4
MICROLOG 89-05123 2 fiche

Ce rapport résume les principaux problèmes mis en évidence dans le cadre de la phase 1 d'une étude sur le homard de la région de Scotia-Fundy. La phase 2 de l'étude porte sur les moyens de régler les problèmes cernés. Les thèmes suivants sont abordés: le cadre régional de la pêche; la biologie et l'écologie du homard; le secteur de la récolte; le secteur de la transportation; les marchés; la gestion de la

pêche du homard, les consultations avec l'industrie; et les problèmes actuels de l'industrie.

Les Pêches canadiennes : revue statistique annuelle, 1985

Ottawa : Ministère des pêches et des océans, Direction générale de l'analyse économique et commerciale, Division de l'analyse économique et des statistiques, 1989. 185 p. *Bilingue (Canadian fisheries annual...1985)* CSI 21105.007. ISSN 0713-2158 ISBN 0-662-56223-2
MICROLOG 89-05089 2 fiche

Ce document donne une vue d'ensemble de la structure et du rendement des pêches commerciales au Canada, en 1984 et 1985, et indique la place qu'occupe l'industrie canadienne dans le monde pour le commerce des produits de la pêche et la production du poisson par rapport aux autres principaux pays pêcheurs. On y décrit la position du Canada sur le plan international, la demande des produits de poisson au Canada et aux États-Unis, l'importance de l'industrie de la pêche par rapport à d'autres secteurs de l'économie canadienne et la participation du Canada et d'autres pays aux pêches du nord-ouest de l'Atlantique et du nord-est du Pacifique. Finalement, on se penche sur la structure des débarquements et des revenus bruts des pêcheurs, de la production et des recettes brutes tirées des produits de la pêche canadienne, de l'emploi des pêcheurs et des travailleurs d'usine, et le nombre de bateaux que représente la flotte de pêche canadienne, ainsi que des importations et des exportations des produits de la pêche par les principaux pays.

Performance of engineered barriers for low-level waste

by D. Taplin and F.B. Claridge. Ottawa : Atomic Energy Control Board, 1987. vi, 79 p. Bibliogr. (Research report ; INFO-0274)
MICROLOG 89-00742 2 fiche

This report on the long-term performance of engineered barriers for low-level radioactive waste includes a search of literature from Canadian, US and European sources. Barrier materials assessed included natural clays, concrete and cement, metals, bentonite-sand admixes, bitumen and bituminous admixes, soil cement and polymeric membranes, and general geology and geological conditions encountered within the soil and rock host media under consideration for disposal sites in southern Ontario were summarized. Both internal and external barriers to limit the migration of contaminants were examined. Microbial activities within the waste forms were analyzed, including cellulose degradation, methanogenesis and bicarbonate and organic reactions. Microbial interactions with the various engineered materials were assessed and the anticipated long term performances were evaluated, along with the general suitability of the geological host media.

Performance of sulfation and nitration plates used to monitor atmospheric pollutant deposition in a real environment

by D. Noel, J.-J. Hechler and H. Roberge.

Boucherville, Que. : National Research Council Canada, Industrial Materials Research Institute, 1988. 26 p. : ill. Bibliogr.
MICROLOG 89-00544 1 fiche (Available on fiche only)

Metallic objects exposed outdoors are subject to deterioration due to atmospheric pollution. In 1984, a joint U.S.-Canadian atmospheric corrosion program was initiated to evaluate the impact of pollutants in the atmosphere on the corrosion of common metals. In Canada, the Experimental Lakes Area (Ontario) was selected as a baseline site. This report verifies the performance of sulfation and nitration plates in a real environment with respect to their efficiency for evaluating the deposition of corrosive pollutants. A series of plates was exposed outdoors for anywhere from 2 weeks to 3 months. Single-column ion chromatography was used to measure the amount of anions deposited. Specific problems related to this technique were observed for the analysis of plates exposed to an atmosphere with a very low degree of pollution.

Permeation of tritiated water vapour through plastic packaging material

by T. Jarv. Toronto : Ontario Hydro, Research Division, 1989. 10 p. Bibliogr. (Report ; no. 89-194-K)
MICROLOG 89-06321 1 fiche

A replacement for the Stephenson respirator, used for protection against low-level tritiated water vapour at nuclear generating station sites, was selected. The new respirator is a modified version of the Comfo-II dual cartridge respirator. After manufacturing each cartridge pair is placed into a pouch and heat sealed shut to prevent the egress of moisture during storage. After sealing the respirator cartridges into the pouch, a small amount of moisture from the cartridges was found to wet the inside. Since these packages could be stored for extended periods in areas where chronic exposures to levels of tritiated moisture up to 100 MPa is possible, this was a matter for concern. A passive permeation experiment simulating field exposure conditions in a tritiated

water vapour environment was designed and completed. This report presents a description of the experiment and the results and recommendations.

The Persistence of triclopyr and its pyridinol metabolite in a coastal British Columbia stream

by M.T. Wan. West Vancouver, B.C. : Environment Canada, Conservation and Protection, Environmental Protection, Pacific and Yukon Region, 1987. vi, 21 p. Bibliogr. (Regional program report : 86-24)

MICROLOG 89-00460 1 fiche

Triclopyr (Garlon 4TM) is a selective post-emergent herbicide used for the control of unwanted broadleaf vegetation in agriculture and woody plants in forestry. In the coastal forest areas of British Columbia, it has the potential to replace the phenoxy herbicides 2,4-D and 2,4,5-T for conifer release programs. However, Garlon 4TM is presently not registered for forestry use in Canada. Most of the data on environmental fate submitted for the registration evaluation of this herbicide in Canada was produced in the United States where conditions are warmer and dryer than in Western Canada, particularly in B.C. Therefore a study was conducted in 1984 to determine the persistence of this herbicide and its metabolites in a coastal B.C. stream. A literature review was also conducted.

Person to person : an Alberta dialogue on economic equity for women

Edmonton : Alberta Women's Secretariat, 1989. 23 p.

MICROLOG 89-01769 1 fiche

Launched by the provincial government in June 1988, the Dialogue surveyed Albertans as to what they felt were priorities, challenges and issues facing women, both in the home and in the workplace. This document presents a social policy statement through a summary of economic issues such as the double duty of women working both in the home and at a job outside the home, the inflexibility of most workplace environments to adjust to double duty women, lack of respect afforded homemaking, women as sole supporters of a family, discrimination and stereotyping, pay equity, and subsidized daycare. The document is in three parts with the first part surveying women's attitudes, the second section presenting discussions and possible solutions, and the third section contains a survey of employers on these issues and recommendations.

Personal autonomy and the criminal law : emerging issues for women

by E.A. Sheehy. Ottawa : Canadian Advisory Council on the Status of Women, 1987. 84 p. Bibliogr. (Background paper) *French ed. (Autonomie personnelle et...)* : 89-02729/1.

MICROLOG 89-02730 1 fiche

Women come to the criminal law with seemingly conflicting demands. In some arenas, the state is asked to protect women's interests in safety. Yet it is asked to withdraw from other arenas in order to safeguard women's interests in bodily integrity. The theme that unites these demands is a vision of a society where women enjoy relative equality in terms of their ability to pursue autonomous lifestyles, free from the fear of pervasive violence and the threat of state control over sexuality and reproductive destiny. This background paper assesses those demands which have been met by the Canadian government to date. It also identifies emerging criminal law issues that have the potential to empower or oppress women.

Le Personnel des cégeps en 1986-1987 selon les catégories et les corps d'emploi, le sexe, l'âge, les années de service et le salaire moyen

par L.-H. Castonguay. Québec : Gouvernement du Québec, Ministère de l'enseignement supérieur et de la science, Direction générale de l'enseignement collégial, 1988. 80 p. (Bulletin statistique : recherche et développement ; v. 13 no 4) *CSI 66131.009*. ISSN 0229-0766

MICROLOG 89-03067 1 fiche

Cette publication fournit, pour l'ensemble du réseau des cégeps, des données statistiques sur le personnel à temps plein à l'emploi des collèges d'enseignement général et professionnel durant l'année scolaire 1986-1987. Le dénombrement du personnel est présenté sous deux formes différentes: en nombre d'individus et en équivalent temps plein. Dans chaque cas, on fournit les données pour l'ensemble du réseau, par catégorie d'emploi, par sexe, par groupe d'âge, par année de service et par salaire moyen.

Perspectives on distance education

Edmonton : Alberta Education, 1987. iv, 69 p. ill. Bibliogr.
MICROLOG 89-02265 1 fiche

During the past three years, there has been a 50% increase in enrolment at the Alberta Correspondence School. To meet this enrolment growth new ways of developing and delivering distance education are being explored. This publication provides information on developments in distance education as input to decision making. It surveys the alternative technological systems available and evaluates their potential for use in Alberta. In addition, it assesses the distance education needs of client groups, with special reference to support systems and co-operative relationships. Finally, it considers the background information and data in terms of issues for discussion and

resolution prior to decision making.

Perte d'un emploi et adaptation au marché du travail dans l'économie canadienne

par G. Picot et T. Wannell. Ottawa : Statistique Canada, Direction des études analytiques, 1987. 51 p. : ill. Bibliogr. (Documents de recherche : no 5) L'éd. anglaise (Job loss and...) : 89-02310/1. CSI 01100.223F.
MICROLOG 89-02309 1 fiche

Ce document vise à évaluer les expériences d'adaptation au marché du travail des travailleurs canadiens qui ont été licenciés définitivement entre 1981 et 1984. Ces licenciements pouvaient être attribuables à des causes structurelles ou cycliques. On se sert de données provenant d'une enquête spéciale afin de répondre à un certain nombre de questions comme: Quels genres de travailleurs étaient plus susceptibles de perdre leur emploi et dans quelle branche d'activité oeuvraient-ils ou quelle profession exerçaient-ils? Qu'est-il arrivé à ces travailleurs lorsque leur emploi a été aboli? Se sont-ils adaptés assez rapidement et avec relativement de succès en trouvant peu de temps après un emploi au même niveau de revenu?

Pesticide container disposal site assessment project : report summary

Regina : Land Protection Branch, 1987. 11 p. MICROLOG 89-05328 1 fiche

Perception of pesticide container disposal program (PCDP) sites as potential sources of contamination coupled with increased public awareness of chemical related hazards and their environmental consequences prompted the Department to conduct the pesticide container disposal site assessment project in 1986. Specific information for each site was evaluated

to determine if there was any potential public health or environmental contamination program. Field inspections and studies at selected sites were conducted to determine the actual extent of contamination caused by the ongoing storage and handling of the containers; to determine how effectively the operational practices, physical characteristics and site locations had actually reduced the effects or slowed the movement of pesticide residues; and to redefine the guidelines for the establishment of new PCDP sites. A total of 78 sites were investigated. This report provides a summary of the investigation results.

Petrographic analyses of coal conversion feedstocks and residues, phase III, 1981-82 : final report

University of Regina. Energy Research Unit. Regina : The Unit, 1983. 115 p. : ill. Bibliogr. CANMET contract: OSU81-00248. MICROLOG 89-02178 2 fiche

Three representative coals were studied, a lignite from Saskatchewan (Estevan), a sub-bituminous coal from Alberta (Whitewood), and a bituminous coal from Alberta. Each coal was oxidized at 100C for 60 hours, 225C for 20 hours, and 225C for 60 hours. The feedstocks and the oxidized coals were gasified in a laboratory scale isothermal gasification apparatus in an air/stream atmosphere at 1 atm (0.1 MPa) for 3 residence times. The feedstocks, and the coals oxidized at 225C for 20 minutes, were also charred under nitrogen at 500C. The chars were gasified at 800C in an air/stream atmosphere. Petrographic analyses were made of the feedstocks, oxidized coals, charred coals and the residue chars from the gasification experiments. The gaseous and solid products of the gasification experiments were also chemically analysed. The petrographic analyses are correlated with the preoxidation and gasification conditions.

Petrology and geochemistry of the Canadian Shield of northeastern Alberta

by S.P. Goff, J.D. Godfrey and J.G. Holland. Edmonton : Alberta Research Council, Natural Resources Division, Alberta Geological Survey, 1986. iv, 60 p. : ill. Bibliogr. (Bulletin ; no. 51)
MICROLOG 89-00788 1 fiche

Part of a series of publications on the geology of the Precambrian Shield of northeastern Alberta, mapped from 1957-75. This report summarizes the petrology and geochemistry of the area, excluding the Helikian sediments of the Athabasca Group. The gneisses, plutonic complexes and amphibolites were first classified petrologically and attempts were then made to place constraints on their petrogenesis through major and trace element models. A combination of detailed mapping and aeromagnetic interpretation of covered areas allowed a precise estimate to be made of the chemical composition.

Photoelectrochemical and solid state investigations of sputtered lead oxide films

by L.C. Schumacher. Toronto : Ontario Hydro, Research Division, 1989. v, 30 p. : ill. Bibliogr. (Report ; no. 88-47-K)
MICROLOG 89-04303 1 fiche

Advances in the design and development of economical, efficient and stable electrocatalysts will have a significant impact in those energy intensive electrolytic industries where power costs are the determining factor. To maximize the chances for success in the development of economical O₂ electrode materials

demonstrating both longevity and stability, a rapid, routine and reproducible method must be employed to fabricate the material in a readily characterizable form. This preliminary study assesses atomic sputtering as a method of fabricating metal oxide materials to be screened as O₂ reduction catalysts. This study characterized reactively sputtered lead oxide films.

Physical and geochemical observations on land reclamation of open-pit coal mines, Alberta and British Columbia

by L.E. Jackson. Ottawa : Energy, Mines and Resources Canada, Geological Survey of Canada, 1989. iv, 33 p. : ill., maps. Bibliogr. (Paper : 88-12) *Fold. maps not filmed* ISSN 0068-7650 ISBN 0-660-13244-3
MICROLOG 89-05778 1 fiche

Open-pit coal mining in the Rocky Mountain Front Ranges and Foothills unavoidably disrupts soil and underlying bedrock and totally eliminates vegetation within the mine site. Reclamation seeks to restore disrupted lands to a state in which they can again support a self-perpetuating vegetal cover. This study investigates the chemistry, mineralogy, and physical properties of materials available for reclamation in and around present, past and future open-pit coal-mining sites. The study aimed at more effective evaluation of natural soils and rock waste as materials upon which vegetal covers could be established and evaluation of the length of time required for reclaimed rock wastes to approach the physical properties of undisturbed soils.

Physicochemical investigation of the compatibilization of polyolefin/polyamide blends : morphology, thermal analysis and specific interactions

by J.M. Willis and B.D. Favis. Boucherville, Que. : National Research Council Canada, Industrial Materials Research Institute, 1988. 43 p. : ill. Bibliogr. *Presented at the Polymer Processing Society Conference.* MICROLOG 89-03250 1 fiche (Available on fiche only)

Polyamide/polyolefin blends compatibilized with an ionomer have potential applications as barrier materials, particularly with respect to hydrocarbon solvents. The control of the morphology of the blend and the enhancement of interfacial interactions between the dispersed phase and the matrix are critical in order to improve the barrier properties of the blend. This article is one of a series of papers which considers the influence of interfacial modification on the morphology/processing relationships of compatibilized blends. Binary blends of the ionomer compatibilizer with each of the polyolefins and the polyamide were prepared to more favourably observe the interactions between the ionomer and these polymers. A Fourier transform infrared spectrometric study was performed on these binary blends.

Phytotoxicology assessment survey investigation in the vicinity of Morterm Ltd., Windsor, 1986

by G.N. Vasiloff. Toronto : Ministry of the Environment, Air Resources Branch. Phytotoxicology Section, 1988. 8 p. : ill. ISBN 0-7729-3813-X MICROLOG 89-00125 1 fiche

Since 1976, the Phytotoxicology Section has conducted an annual surveillance of grasses at 10 established sites in the vicinity of Morterm Limited in order to monitor levels of fluoride. An additional site was added in 1985. In addition to the handling of other commodities, this port facility is involved with the transfer of bulk fluorspar from ships to temporary open storage on the terminal property. At each of the previously established 11 sample locations, true triplicate samples of grass were collected for chemical analysis. Samples were submitted for pre-analysis processing according to a standardized not-wash procedure. Processed samples were forwarded for fluoride, calcium, sodium and chloride determinations.

EV ON PR SC

Phytotoxicology assessment survey investigation in the vicinity of Suncor, Ltd., Sarnia, Aug. 18, 1987

by R.D. Jones. Toronto : Environment Ontario, 1989. 6 p. Bibliogr. ISBN 0-7729-4483-0 MICROLOG 89-05702 1 fiche

The Alkylation Unit at the Suncor Sarnia refinery produces a hydrocarbon waste product that contains organic and inorganic fluoride material. The burning of this waste product results in emissions of fluoride to atmosphere. Stack sampling and subsequent modelling had indicated that the half hour point of impingement limit was being exceeded. In September of 1986 a limited vegetation study was conducted to determine if fluoride emissions from the company were affecting vegetation. The results of this survey did not agree with the model, therefore a more extensive survey was conducted in August 1987. This report presents the results of that 1987 survey.

Phytotoxicology assessment survey of lead and other metals in soil and vegetation in the vicinity of Westmount Avenue and the Queensway Highway (Hwy. 417), Ottawa, July, 1987

by R.N. Emerson. Toronto : Ministry of the

Environment, Air Resources Branch, 1988 14 p. (Report ; ARB-018-88-PHYTO) ISSN 0824-880X ISBN 0-7729-4016-9 MICROLOG 89-01541 1 fiche

On July 28-29, 1987, properties on Westmount Avenue and in other neighbourhoods nearby were sampled to determine the status of lead and other metals in soil and vegetation. Soil and foliage samples were analysed for lead, cadmium, chromium, copper, vanadium, and zinc which could be potentially emitted by vehicle traffic. This report presents the results of that analysis.

Phytotoxicology assessment surveys in the vicinity of C-I-L and Domtar, Cornwall : 1984, 1985, 1986

by R.J. Rinne. Toronto : Ministry of the Environment, Air Resources Branch, 1988. 27 p. : maps. Bibliogr. ISBN 0-7729-3434-7 MICROLOG 89-03053 1 fiche

Surveys of mercury contamination of soil and/or vegetation in the vicinity of C-I-L Inc., Cornwall, have been conducted annually since 1976. In 1985, this study was combined with a survey of vegetation contamination and injury due to chlorine emissions from Domtar Ltd., located immediately south of C-I-L. This report presents the results of the C-I-L/Domtar surveys undertaken in 1984, 1985, and 1986.

Phytotoxicology investigation in the vicinity of Ethyl Corporation, Corunna, Ontario, June 24, 1987

by D.S. Harper. Toronto : Ministry of the Environment, Air Resources Branch, 1988. 2 p. (Report ; ARB-205-87-PHYTO) ISSN 0824-880X ISBN 0-7729-4015-0 MICROLOG 89-01456 1 fiche

On June 17 and 22, 1987, releases of lead to air from Ethyl Corporation's Corunna plant were alleged to have contaminated vegetation growing on properties downwind of that company. Triplicate samples of silver maple tree foliage were sampled at each of 6 sites along a transect running roughly south from the Ethyl plant. Samples were analysed for lead, cadmium, chromium, copper, nickel, and zinc. This report presents the results of that analysis.

Pickering NGS 'A' pressure relief duct : condition survey of exterior concrete

by E.J. McCole. Toronto : Ontario Hydro, Research Division, 1989. i, 32 p. : ill. (Report ; no. 88-295-K) MICROLOG 89-04842 1 fiche

In September/October 1988, a condition survey of the exterior concrete of the pressure relief duct at Pickering Nuclear Generating Station A was carried out. The survey included a detailed inspection of the top surface and consisted of crack mapping, impact hammer readings, and examination of the joint sealant material. Access to the bottom surface, the north and south elevations and the bearing pads was not provided; therefore these areas were only visually inspected with aid of binoculars. This report summarizes the results of the condition survey.

Pickering NGS 'A' unit 1, ECIS commissioning flow tests : moderator pumpset vibration analysis : executive summary

by F. Perricone, W. Morgan and N. Jagan. Toronto : Ontario Hydro, Research Division, 1988. ii, 88 p. : ill. Bibliogr. (Report ; no. 88-279-K) MICROLOG 89-04313 1 fiche

To improve plant safety in the event of a loss-of-coolant accident (LOCA), the emergency coolant injection system (ECIS) was extensively modified. The most significant modification was the addition of the Pickering B high pressure injection system whose purpose is to be the heat sink in the early stages of a LOCA. These modifications resulted in significant piping changes as well as a number of procedural changes in the operating instructions. Commissioning tests were carried out in December 1986 and January 1987 to test the ECIS and to establish confidence that the moderator/recovery system can provide a safe and reliable long term heat sink. Throughout the tests the vibration levels on the Pickering Nuclear Generating Station A Unit 1 moderator pumpsets were monitored to record vibration data for future analysis and to minimize the chance of moderator pump-motor damage during the tests. This report provides a record of the vibration data and analysis of the pumpsets during the tests.

Pickering NGS 'B', units 5 and 8 : moderator piping vibration study

by H.L. Anderson. Toronto : Ontario Hydro, Research Division, 1988. 31 p. : ill. Bibliogr. (Report ; no. 88-180-K) MICROLOG 89-04438 1 fiche

Following the failure by fatigue of the moderator inlet piping at the penetration to the shield at Pickering Nuclear Generating Station B unit 6, an extensive vibration monitoring program was carried out on the moderator piping in, sequentially, units 6, 8 and 5 during unit outages. This report documents the results of the unit 8 and unit 5 vibration monitoring program, composed of a modal analysis using impact testing (all pumps off), vibration and pressure monitoring at various operating conditions, vibroacoustic monitoring for flow phenomena such as cavitation, and ultrasonic flow measurements. The monitoring comprised surveys on the segments of the inlet moderator lines leading from the heat exchangers to the shield penetrations, and the outlet moderator lines from the shield penetrations through the moderator pumpsets to the heat exchangers.

Plains Hydrology and Reclamation Project : investigation of the settlement behaviour of mine backfill

compiled by D.R. Pauls ; prepared for the Plains Coal Reclamation Research Program. Edmonton : Alberta Land Conservation and Reclamation Council, Reclamation Research Technical Advisory Committee, 1988. xxi, 135 p. : ill. Bibliogr. (Report ; RRTAC 88-4) MICROLOG 89-02226 2 fiche

Final report on a program of tests to simulate the subsidence that occurs in newly reclaimed mine spoil to better understand the mechanisms of subsidence phenomena. A series of large diameter consolidation tests were performed on

spoil from the Vesta Mine site located near Forestburg, Alberta. The spoil samples, from soil grain size to 30mm lumps, were considered representative of the overburden handled at the Vesta Mine, a heterogeneous mixture of medium soft dark grey clay, hard shale lumps, light grey clayey sand, and weakly cemented clayey sandstone. The laboratory program consisted of a series of 10 tests in which samples were placed in an oedometer and subjected to loads ranging from 25 kPa-460 kPa to simulate settlement under overburden loads. After stabilizing under the maximum test load, the sample was exposed to a resaturation fluid, which was either distilled water or groundwater taken from Alberta Research Council wells located on mine property to simulate saturation of the spoil by surface infiltration or by rise of the groundwater table.

Planning for large-scale construction projects : a socio-economic guide for communities, industry, and government

by K. Storey and M. Shrimpton. Ottawa : Environmental Studies Research Funds, 1987. v. 78 p. Bibliogr. (Environmental Studies Research Funds report : no. 087) ISBN

0-920783-86-4

MICROLOG 89-00755 1 fiche

Large-scale construction projects bring both benefits and problems for communities near the project sites. Those communities need to know about possible socio-economic effects and ways to deal with them. This guide provides information that will help local people, government officials, and developers to develop plans for the successful management of large-scale construction projects. It adopts a traditional planning model in which impact issues are identified, strategies to deal with them are selected and implemented, outcomes monitored, and adjustments are made as necessary. It describes the planning process, outlines the impact assessment and screening process and a number of possible management strategies dealing with issues such as employment, transportation, accommodation, community services, funding, and wind-down, and provides a list of supplementary sources of information about community planning, impact assessment, and growth management.

A Plant for immobilizing low level liquid waste in water extendible polymer, part 2

by A. Hussain. Toronto : Ontario Hydro, Research Division, 1988. iii, 20 p. : ill. Bibliogr. (Report ; no. 88-44-K)
MICROLOG 89-02613 1 fiche

Aqueous low level radioactive wastes at the nuclear stations arise from routine decontaminations of equipment and present a problem in disposal. Previous investigations using water extendible polyester as an immobilization agent demonstrated that a satisfactory waste form with good leaching resistance could be obtained. A prototype plant was fully commissioned manually and was described in a previous report. This report concludes the activities undertaken to make the plant fully operational (semi-automatic). Experience in immobilizing simulated inactive decontamination wastes is described, including the production of wasteforms up to 100L in volume.

Platinum group element distribution in the Kanichee Intrusion, District of Nipissing

by D.J. Good. Toronto : Ministry of Northern Development and Mines, Mines and Minerals Division, 1989. xv, 42 p. : ill. Bibliogr. (Ontario Geological Survey open file report ; 5705) ISBN 0-7729-5117-9
MICROLOG 89-06130 1 fiche

Exploration interest in the platinum group elements (PGE) was renewed in the mid-1980s by anticipation of increased demands and concern over security of supply. In Ontario, this renewed interest was focused on mafic and ultramafic intrusive rocks of the Superior Province. One commonly used exploration model was developed on the hypothesis that the PGEs were concentrated by magnetic processes during the crystallization of these intrusive rocks. The Kanichee intrusion in Strath Township, which is one of these mafic-ultramafic plutons, has long been known as a host of sulphide mineralization. This report presents the results of a brief assessment of the potential of the Kanichee Intrusion, and others like it, to host concentrations of the PGEs. It identifies geochemical signatures that might prove useful in exploration for other similar PGE-bearing sulphide deposits.

Police complaint process : the Fullerton complaint

Victoria : Ombudsman of British Columbia, 1989. 6 p. (Public report ; no. 16)
 MICROLOG 89-01776 1 fiche

Robert and Francine Fullerton claim that they were treated improperly by various members of the Matsqui police service during an incident on July 15, 1985 which began at a local gravel pit and ended at the police station. The Fullerton's subsequent civil action calling for damages for assault has prompted the Ombudsman's Office to assess the public complaint process of police conduct complaints. This paper discusses whether in the Fullerton's case the process was fairly instituted. Specific issues include the adequacy of the initial police investigation, reasonableness of the Chief Constable and Police Board panel's decision that the Fullerton's allegations were "vexatious and not made in good faith", the need to resolve the matter, the insufficiency of civil remedy, and the procedure for a public inquiry.

Police screening patterns in five western Canadian cities : looking at data a different way

by J. Hackler and D. Cossins. Edmonton : University of Alberta, Centre for Criminological Research, 1989. 29 p. Bibliogr. (Discussion paper ; 20)
 MICROLOG 89-04083 1 fiche

This paper examines police statistics on theft in 5 Western Canadian cities. The primary concern is on the interpretation of data dealing with juveniles and the impact of the Young Offenders Act. The conventional way of using such data is to assume that police and prosecutor behaviour is a constant and that any changes in statistics reflect changes in the underlying behaviour of juveniles. This paper argues that focusing on local information permits a more intelligent interpretation of these data.

Politique sur l'élimination des neiges usées

Québec : Gouvernement du Québec, Ministère de l'environnement, 1988. 15 p. ISBN 2-550-19246-X

MICROLOG 89-04979 1 fiche

Ce document présente une politique sur la gestion des neiges usées, visant à éliminer progressivement le déchargement, dans les cours d'eau ou en bordure de ceux-ci, des neiges usées qui n'auront pas été traitées et à réduire les impacts de leur élimination. On y examine l'état de la situation, les effets des pratiques actuelles sur l'environnement, les méthodes d'élimination acceptables, les pressions sociales, les contraintes économiques, les buts visés et les objectifs généraux et spécifiques poursuivis, l'approche retenue et les moyens de mise en oeuvre.

Pollutant evaluation

by G. Kerr. Ottawa : Public Works Canada, Architectural and Engineering Services, 1988. xii, 82, xii, 92 p. Bibliogr. (Building performance evaluation series ; Document D01) *Bilingual (Evaluation de polluants)*.

MICROLOG 89-01926 3 fiche

Outline of the causes of pollution of ambient air in conditioned environments and the problems associated with each of the pollutants (carbon dioxide, carbon monoxide, formaldehyde, particulates, radon, volatile organic compounds, biological materials). Methodology of testing, from a simple walkthrough assessment to specialized in-depth monitoring, is given. Each test description is accompanied by a list of applicable air quality standards and guidelines. CA PL PW SC

Pollution control in Canada : the regulatory approach in the 1980s

by K. Webb. Ottawa : Law Reform Commission of Canada, 1988. 91, 101 p. Bibliogr. (Administrative law series) *Bilingual (La Lutte contre...)*. At head of title: *Study paper*. ISBN 0-662-56160-X
MICROLOG 89-01609 3 fiche

Paper on the implementation of pollution control legislation, focusing on the federal view and industrial emissions control. A brief historical examination of the shift in legislative approach to pollution abatement, from total prohibition to the current 'control' model, with causes and implications, are discussed. Problems with current legislation are identified and examined, including the tendency of legislators to draft laws in unrealistic language which fail to reflect operational realities. The role of the courts is examined and court pronouncements on the fairness of the control process are analyzed. Extra-legal factors which contribute to the implementation gap are identified, including deficiencies in the political process, pro-development biases of government, and the proclivities of bureaucrats which can interfere with effective implementation. Pollution control trends, including increasing public participation, are identified and analyzed. The Commission's proposal for a new crime against the environment, and potential enforcement problems, are reviewed. CA EV PA SC

Pollution migration

by T.A. McKenna. Ottawa : Public Works Canada, Architectural and Engineering Services, 1988. vi, 29, vi, 32 p. : ill. Bibliogr. (Building performance evaluation series : Document D02) *Bilingual (Migration de la pollution)*.
MICROLOG 89-02047 1 fiche

To evaluate and control pollution migration it is necessary to understand the routes and the extent to which pollutants move from their source to other parts of the building. This document describes 3 stages of testing for the investigation of pollutant migration, involving a preliminary assessment, simple measurement techniques, and detailed testing using the tracer gas technique. Port Hope TS : grounding studies

by R.P. Pillai. Toronto : Ontario Hydro, Research Division, 1988. 15 p. : ill. Bibliogr. (Report : no. 88-271-K)
MICROLOG 89-04316 1 fiche

Port Hope transformer station is an old 115kV station located on the north side of Highway No. 2, in the township of Port Hope. New 230kV and 44kV facilities are being added to the station and will be in service by the end of 1988. The ground potential rise and touch and step potentials at the station were of concern, especially with the addition of the new facilities. Therefore measurements were done under simulated fault conditions to confirm the adequacy of the grounding system performance of the station. Soil resistivity was also tested and models were developed to generalize the results.

Post-harvest quality determination of on-farm stored potatoes, 1984-1989

by G.C. Misener...et al. S.I. : Canada-New Brunswick Agri-Food Agreement, 1989. 15, 16 p. Bilingual (*Evaluation après la récolte...*). MICROLOG 89-05312 1 fiche

Evaluation of the effects of mechanical injury of potatoes, based on post-harvest market quality of the potatoes. Ten commercial potato farms,

growing the Russell Burbank variety, were selected in New Brunswick to include a cross section of cultural management techniques and storage types. Potatoes were hand dug from the field, randomly picked from the bulk truck as it unloaded (normal), and damaged tubers were selected from the base of the pile (harsh) to obtain varying levels of mechanical injury. For each treatment, three 10 kg samples and two 5 kg samples were taken, placed into meshed bags and weighed. Two 10 kg samples were randomly distributed in the bulk storage while the two 5 kg samples were placed into a control storage. The third 10 kg sample was stored at room temperature for 15-20 days and then analysed for marketability and mechanical injury. This procedure was repeated 5 times on each farm at different dates and times. All samples at the control storage were weighed and graded for marketability in mid March. • AG AP CA PR SC

The Post-impoundment area and bathymetry of Cedar Lake, Manitoba

by D.J. Green and A.J. Derksen. Winnipeg : Dept. of Natural Resources, 1980. iv, 16 p. : maps. Bibliogr. (Manuscript report ; no. 80-10). MICROLOG 89-00693 1 fiche

Cedar Lake lies on the northwestern corner of Lake Winnipeg, with Cross Bay the eastern extension. The Grand Rapids Hydro-Electric Generating Station and spillway, completed in 1965, are situated at the eastern end of Cross Bay a short distance upstream from Lake Winnipeg and regulate Cedar Lake within 3.05 m of its pre-flooded long-term average elevation. This report also estimates the post-flooded area of Cedar Lake. EV MS PR SC

The Potential for larch in Nova Scotia : a literature review

Truro, N.S. : Dept. of Lands and Forests, 1989. 11 p. : ill. Bibliogr. (Forest research report ; no. 14). MICROLOG 89-04150 1 fiche

Larches are known for their rapid juvenile growth and adaptation to marginal sites, especially those that are excessively moist. Available information from scattered trials within the region indicates that by planting larch, forest productivity could be increased by up to 50% and rotations reduced to 30 years or less, making larch a potentially valuable reforestation species. Before detailed reforestation prescriptions can be developed for this species, existing information needs to be summarized and gaps in current knowledge identified. This report presents a review of the literature undertaken on the silvics, growth characteristics and wood properties of tamarack and 5 promising exotic larches. AP FO PR SC

Potential utilization of fish wastes in northeastern New-Brunswick : final report

Biorex Atlantic Inc. Fredericton : Dept. of Commerce and Technology, 1989. ii, 89 p. French ed. (*Utilisation des résidus...*) : 89-05305/2. MICROLOG 89-05306 1 fiche

Herring de-roeing has become a major activity of the fish processing industry in northeastern New Brunswick between the Restigouche and Miramichi Rivers and is done mainly in 6-8 weeks in late summer, using only 4-5% of the landed herring. The remaining carcasses can only be processed into fish meal or oil or spread on agricultural land. However, due to

the large amount produced at one time, about 50% of the wastes are discarded in land fill sites, in dumps, or at sea. This study was conducted to identify one or more economically and environmentally viable options for a better utilization of fish wastes produced. Only solid fish wastes are considered. The report describes the current status of fish waste production, disposal and utilization; the composition of the wastes; different products and by-products obtainable from the wastes, processing methods, possible utilization for these products and constraints related to utilization and processing; and a selection of feasible options, with a financial analysis of each.

Pour mieux comprendre l'autonomie des aînés, 1er rapport : les obstacles et les avenues de solutions

Canada. Conseil consultatif national sur le troisième âge. Ottawa : le Conseil, 1989. 109 p. Bibliogr. L'éd. anglaise (Understanding seniors' independence...) : 89-05358/2. ISBN 0-662-95416-5
MICROLOG 89-05357 2 fiche

Ce rapport donne les résultats d'une étude sur le troisième âge afin de mieux comprendre à

quels obstacles font face les aînés dans la collectivité et leurs conséquences au plan de l'autonomie. Le rapport renferme des suggestions de solutions qui devraient aider ou éliminer les obstacles les plus importants. Le rapport donne aussi un aperçu général des principaux secteurs problèmes recensés dans le cadre de l'étude du CCNTA. De plus, il renferme une analyse détaillée des sept secteurs problèmes les plus importants ainsi qu'une description des obstacles précis mentionnés dans chaque cas. Des suggestions de solutions pour aider les personnes âgées à vaincre ou à réduire ces obstacles suivent les définitions des problèmes.

Pour une approche éducative des besoins des jeunes enfants

avis au Ministre de l'éducation par le Conseil supérieur de l'éducation. Québec : le Conseil, 1989. 67 p. ISBN 2-550-14767-7
MICROLOG 89-05171 1 fiche

Cet avis trace un portrait global des jeunes enfants du Québec: leur nombre, leurs besoins généralement reconnus et les enjeux propres à cette étape de la vie. On y décrit la manière dont la famille assiste ces derniers dans leurs diverses tâches de croissance; on traite de la contribution complémentaire de partenaires sociaux autres que la famille; et on propose certaines orientations susceptibles de renforcer et d'améliorer la réponse collective, celle de la famille et celle des autres intervenants aux besoins éducatifs des jeunes enfants.

Precision acoustic velocity measurement and elastic constant determination by laser-ultrasonics

by J.-D. Aussel and J.-P. Monchalain. Boucherville, Que. : National Research Council Canada, Industrial Materials Research Institute, 1988. 41 p. : ill. Bibliogr.
MICROLOG 89-00539 1 fiche (Available on fiche only)

Laser-ultrasonic method to measure the acoustic velocities and the elastic constants of solid materials based on the crosscorrelation of successive echoes. Measurements are performed in the thermoelastic regime or slight ablation regime, which permits simultaneous measurement of longitudinal and shear velocities and an unlimited number of shots at the specimen. Diffraction correlations are calculated, and dispersion effects are evaluated by frequency analysis. The precision and accuracy of the technique are estimated by sampling rate, thickness of the sample, signal-to-noise ratio, frequency bandwidth and laser-beam alignment. Examples of applications of the technique are given for PZT ceramic, metal-ceramic composites and single crystal Germanium.

Predictive hypsometry incorporating lag (PHIL) : final report

by A.M. Coode...et al. S.I. : Canada-Saskatchewan Mineral Development Agreement, 1988. viii, 53 p. : ill. Bibliogr. CANMET contract: 69120-01-SQ
MICROLOG 89-05079 1 fiche

Saskatchewan potash producers presently mine potash at extraction ratios ranging from 25%-40%, resulting in approximately a half metre of surface subsidence. The industry recognizes that increasing the present extraction ratios to 50%-60% would double reserves, minimize capital outlay, and decrease unit costs, as well as increasing subsidence. It is thus essential to be able to predict the magnitude of the increased subsidence. This report describes the analytical/mechanistic and empirical techniques of prediction, the applicability of the zone area method and SPASID to potash mining, and the final developed model, combining elements of both.

Prejudgment remedies for unsecured claimants

Edmonton : University of Alberta, Institute of Law Research and Reform, 1988. xvii, 251 p. Bibliogr. (Report ; no. 50) ISSN 0317-1604 ISBN 0-8886-4150-8
MICROLOG 89-02038 3 fiche

This report concerns legal mechanisms the purpose of which is to make it more likely than it otherwise would be that a person who has a claim which could result in a money judgment against another person, but who cannot rely on any security interest in property of the defendant, will be able to enforce a judgment. After describing the prejudgment remedies which currently exist in the province, the report concludes that they do not provide Albertans with as effective, coherent and fair a system of provisional relief as they could reasonably expect to have. It provides recommendations for a legislative solution to the inadequacies identified.

Preliminary assessment of a Bird River chromite deposit

by P.R.A. Andrews and D.P. O'Shaughnessy. Ottawa : Canada Centre for Mineral and Energy Technology, Mineral Sciences Laboratories, 1987. ii, 21 p. : ill. Bibliogr. (Report ; MSL 87-143(IR))

MICROLOG 89-02633 1 fiche

In the manufacture of stainless steel, the chromium content is provided in both a primary form as chromium ferroalloys and in a secondary form as stainless-steel scrap. The chromite of the Bird River deposits in south-eastern Manitoba is low grade and unsuitable for use in the manufacture of any of the commonly traded grades of ferrochromium alloys. An economic assessment of the Chrome deposit, which comprises a part of the Bird River chromite deposits, was conducted as part of the Canada-Manitoba Mineral Development Agreement. The study included a geological assessment of the Chrome deposit, development of both a mining plan and a gravity concentration circuit as well as processes to smelt the chromite to ferrochromium and convert this product directly to stainless steel. In addition, a preliminary review of North American consumption patterns of various chromium products was completed.

Preliminary CERCHAR abrasivity data, Sydney Coalfield, N.S.

by M.L. Musial, G.R. Corbett and T.R.C. Aston. Ottawa : Canada Centre for Mineral and Energy Technology, Coal Research Laboratories, 1989. v, 17 p. : ill. (Report ; CRL 89-2(TR))

MICROLOG 89-04466 1 fiche

Information regarding the abrasivity of potential rock types to be cut is invaluable for the selection of mining equipment such as roadheaders and TBMs. The use of rock cuttability data (abrasivity and hardness indices) can aid in the optimum selection of equipment, thereby lowering costs and increasing production rates. In 1987, a multi-year research program was established to investigate rock cuttability and machine performance in the Sydney Coalfield, Nova Scotia. This report presents preliminary abrasivity tests conducted on core samples of sandstone, siltstone and mudstone obtained from the Lingan Mine, describes the application of 'smooth versus irregular surface' testing and multiple testing using a single stylus, and makes a comparison between the data obtained from different microscopes used to measure stylus tip wear.

CA EX PS SC

Preliminary investigation of the potential effects of icing on wind energy system performance

by R. Kolomeychuk and A. Silis. Ottawa : Energy, Mines and Resources Canada, Renewable Energy Branch, 1988. iv, 29 p. Bibliogr.

MICROLOG 89-05627 1 fiche

The more promising geographical regions of Canada for utilization of wind energy conversion systems (WECS) are isolated communities in Arctic, sub-Arctic, and coastal areas. Little work has been done to investigate what effects

atmospheric icing will have on the performance of WECS in these regions and little information exists from which to quantify the effects of ice accumulation on wind turbine performance and behaviour. An analysis of freezing rain and potential in-cloud icing was undertaken to investigate potential performance degradation of WECS in these areas. Hourly climatic data for the selected observing stations was obtained for 1967-76. Data analyses were conducted for icing event occurrence and duration, duration of temperatures less than 0°C after an event, and solar radiation after an event. The number of hours of freezing precipitation (freezing rain and freezing drizzle combined) were compiled for each station along with the frequency of duration of the events. Potential icing due to supercooled fogs or clouds was considered to have occurred when air temperature was less than 0°C, visibility was less than 1 km, and fog was present.

Preliminary observations on the mechanical extraction of meats from the sea and Iceland scallop

by K.S. Naidu. St. John's : Dept. of Fisheries and Oceans, Science Branch, 1989. v, 10 p. : ill. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2023) ISSN 0706-6473

MICROLOG 89-06227 1 fiche

Of the two scallop species found in Newfoundland, only the sea scallop is presently fully exploited. The smaller Iceland scallop frequently is discarded, since the tight shell closure of freshly-caught Iceland scallops make them more difficult to shuck than the sea scallop. Like oysters, hand shucking of this species is more difficult, tedious and somewhat hazardous from shell lacerations. This report gives the results of subjecting sea scallops and Iceland scallops separately to a prototype mechanical shucking device used normally for calico scallops. Gaping was effected with pressurized steam and separation of viscera from shells was induced mechanically on a perforated vibrator plate. Estimates were taken of loss with both hand and mechanical shucking.

Preming groundwater conditions at the Highvale Site

by M.R. Trudell and R. Faught. Edmonton : Alberta Land Conservation and Reclamation Council, Reclamation Research Technical Advisory Committee, 1987. xi, 83 p. : ill. Bibliogr. (Report ; RRTAC 87-12) MICROLOG 89-00373 2 fiche

This is one of a series of reports that presents the findings of the Plains Hydrology and Reclamation Project (PHRP), an interdisciplinary study that focuses primarily on hydrologic aspects of reclamation of surface coal mines in the Plains of Alberta. This report presents a description of the study of the Highvale Site, followed by a detailed discussion of the premining flow patterns, hydraulic properties, and isotopic and hydrochemical characteristics for five hydrostratigraphic units within the Paskapoo Formation, the underlying sandstone beds of the Upper Horseshoe Canyon Formation, as well as for the glacial drift. As part of this characterization extensive use was made of existing instrumentation reports, and data prepared by Monenco Consultants Ltd. The hydrostratigraphic units studied for the report include the surficial material, through the bedrock overburden and the Ardley Coal Zone, to sandstone horizons, roughly 100m deep, below the base of mining.

Preparation and evaluation of Nova Scotia industrial minerals as fillers and extenders

by R.K. Collings. Ottawa : Magstone Development Inc., 1988. 49 p. : ill. Bibliogr. *CANMET contract: 69163-01-SQ* MICROLOG 89-01732 1 fiche

Examination and evaluation of industrial mineral samples from Nova Scotia, including limestone

from Glencoe and Marble Mountain, dolomite from Kelly's Cove and Cape Dauphin barite from Scotsville, Pine Brook, and Lake Anslie, celestite from the MacRae deposit, kaolin from Musquodoboit, and talc from the Sterling mine. Major study was done on the Glencoe limestone to provide calcium carbonate filler for use in paints, plastics, paper products, and pharmaceuticals. While the report outlines the test work done on each of the minerals, and gives an evaluation of the market potential, there are no chemical and physical analyses. A preliminary costing for the establishment of a calcium carbonate plant is also included.

Preparation of high temperature superconductors

by I.S. Balbaa and V. Da Rosa. Toronto : Ontario Hydro, Research Division, 1988. 15 p. : ill. Bibliogr. (Report ; no. 88-192-K)

MICROLOG 89-04314 1 fiche

Potential applications of superconductors in the Ontario Hydro system appear more realistic with the discovery of high temperature superconductors (HTSC). Since the new HTSC are more complex than the metallic superconductors, and because their properties and therefore their performance depends on processing parameters, it is important to develop Ontario Hydro's capabilities in the various aspects of HTSC material technology. This report summarizes the results of the work undertaken in the materials area of HTSC. Ceramic superconductors based on the yttrium-barium-copper oxide system were prepared consistently. Some of the properties of these materials were determined, analyzed, and compared to results reported in the literature. Recommendations for future work in the materials area of HTSC are suggested.

The Preparation of reports of a significant event at a uranium processing or uranium handling facility

Ottawa : Atomic Energy Control Board, 1988. 4 p. (Regulatory document ; R-89) French ed. (Présentation des rapports...) on the same fiche.

MICROLOG 89-04596 1 fiche

Licences to operate uranium processing or uranium handling facilities require that certain events be reported to the Atomic Energy Control Board and to other regulatory authorities. Reports of a significant event describe unusual events which had or could have had a significant impact on the safety of facility operations, the worker, the public or on the environment. The purpose of this guide is to suggest an acceptable method of reporting a significant event to the Board and to describe the information that should be included.

The Present and potential effects of acidic and acidifying air pollutants on Alberta's environment : critical point I, 1988 : summary report

submitted by the Kananaskis Centre for Environmental Research. Calgary, Alta. : Acid Deposition Research Program, 1988. x. 79 p. : ill. (Acid Deposition Research Program: biophysical research ; ADRP-B-16-88) Principal investigator: A.H. Legge ; science advisors: S.V. Krupa, J.P. Lodge. ISBN 0-921625-23-5

MICROLOG 89-00374 1 fiche

In 1983, the Alberta Government and industry jointly established the Acid Deposition Research Program. In 1985, the biophysics research effort was initiated in two phases, the first being to establish if there are at present observed or measurable adverse effects of acidic or acidifying pollutants on Alberta's vegetation, soils, and surface waters. It was also initiated to characterize Alberta air quality (background and polluted) and to apply the resulting data in the assessment and prediction of regional-scale effects of various air pollutant exposure scenarios on sensitive environmental components. This summary report presents the results of that program, including the establishment of a background air quality monitoring station at Fortress Mountain and other monitoring sites at Crossfield, near a natural gas processing plant.

Prevalence of idiopathic liver lesions in English sole and epidermal abnormalities in flatfish from Vancouver Harbour, B.C., 1986

by D. Goyette, D. Brand and M. Thomas. Ottawa : Environmental Protection Service, Pacific and Yukon Region, 1988. viii, 48 p. : ill. Bibliogr. (Regional program report ; 87-09)
MICROLOG 89-03658 1 fiche

English sole are relatively ubiquitous along the Pacific northwest coast and are particularly sensitive to the development of idiopathic liver lesions, including neoplasms. This report describes the types and prevalences of histologically detectable pathologic conditions with emphasis on idiopathic liver lesions, for Vancouver Harbour outer area, which is under the influence of outflows from Vancouver Harbour, the Fraser River, and Howe Sound; four areas within the inner harbour (Burrard Yards, Coal Harbour, Sterling, and Centre Channel); and two areas in Port Moody Arm (Port Moody and loco), which has a long history of petroleum refining operations, bulk loading facilities and light industry. This study is part of a larger study being conducted to determine benthic environmental quality in the Harbour. Concurrent with the histopathological studies, benthic sediment and tissue samples were taken for trace metal and organic contaminants analysis.

Private-sector unions' decline in North America : a paradigmatic explanation

by Y. Reshef and A.I. Murray. Edmonton : University of Alberta, Dept. of Sociology, Population Research Laboratory, 1988. 28 p. : ill. Bibliogr. (Edmonton area series report ; no. 63) ISSN 0703-8763
MICROLOG 89-01431 1 fiche

In 1987, only 17% of the U.S. labour force was unionized as opposed to one third just after World War II. This paper explains the decline of private-sector unions in light of Murray and Reshef's paradigm model of union decline. It relates one economic and two attitudinal measures to union membership, and simultaneously estimates both the influence of these measures on the likelihood that a person is a union member and union membership's impact upon these measures.

Privatization : adopt or adapt?

by L. Soderstrom. Québec : Commission d'enquête sur les services de santé et les services sociaux, 1987. viii, 242 p. Bibliogr. (Synthèse critique ; 36) ISBN 2-551-08482-2
MICROLOG 89-00926 3 fiche

Currently there is interest in a variety of proposals aimed at reducing the government's role in Quebec's health system. This paper evaluates a variety of possible ways to privatize various aspects of the province's health system. It argues that these privatization schemes should be evaluated by assessing their effects on the efficiency and equity of Quebec's health system. The paper then evaluates various privatization proposals. Finally, it summarizes briefly the results and speculates on the impact the various proposals would have on major problems now plaguing Quebec's health system.

The Privatization putsch

by H. Hardin. Halifax : Institute for Research on Public Policy, 1989. xiii, 224 p. Bibliogr. ISBN 0-88645-084-5
MICROLOG 89-03232 3 fiche

The author addresses what he sees as an imbalance in a literature strongly oriented toward the language of privatization. He suggests the definitions of "business" have too often been confused with concepts of "enterprise" -- that motivations for public enterprise may well go far beyond the profit motive. He argues that the motivation of public enterprise may be to provide the best possible service at cost, be competitive, excel as an enterprise, innovate, grow, thrive, and contend.
CA CI CO PA

Privatization, public policy and public corporations in Canada

edited by Allan Tupper and G. Bruce Doern.
Halifax : Institute for Research on Public
Policy, 1988. xviii, 434 p. Bibliogr. ISBN
0-88645-082-9
MICROLOG 89-03238 5 fiche

Privatization encompasses the whole or partial
sale of state-owned companies as well as
actions to reduce the role of government and
enhance market forces to produce a more
competitive economy. This document examines
the role of public enterprise in Canadian public
policy in the context of international and
domestic pressures to privatize. The volume
comprises an editors' introduction, eight case
studies and an overview of recent
developments in three provinces.

**Probabilistic assessment of the
Pickering unit 4 core for pressure
tube cracking due to hydride blister
formation**

by M. Leger, D.V. Leemans and T.P. Byrne.
Toronto : Ontario Hydro, Research Division,
1989. i, 25 p. : ill. Bibliogr. (Report ; no.
88-324-K)
MICROLOG 89-04571 1 fiche

Detailed documentation of the work carried out
for the Deuterium Ingress Task Group for the
assessment of the remaining life in the
Pickering reactors. The probability of having
pressure tubes in the central core containing
blisters sufficiently large that initiation of delayed
hydride cracking could occur was computed
based on a refinement of a previous computer
model and a new treatment of some of the
input parameters. Key assumptions are that
the deuterium pickup rate underwent a
transition after 91000 EFPH and that the
deuterium measurements obtained in the
microsampling campaign on P4 at the end of
1987 were representative of the entire core.

**Probabilistic framework for ice loads
on fixed marine structures**

by M. Nessim and A. Corneau. Ottawa :
Public Works Canada. Architectural and
Engineering Services, 1988. 2 v. : ill.
Bibliogr. Contents: Vol. 1 : *Study description*
-- vol. 2 : *User's guide to ice load computer
package*. ISBN 0-662-16557-8
MICROLOG 89-02022 3 fiche

Probabilistic models were developed for the
estimation of global and local ice for fixed
marine structures. The model produced load
descriptions which are compatible with
probability-based design code requirements. Ice
loading is estimated by using probabilistic
environmental inputs in appropriate ice-structure
interaction models to produce a probabilistic
distribution of the load. This is then used in
extremal models to calculate the probability
distribution of the maximum annual load or
pressure. The study included the statistical
analysis of environmental data and ice
mechanical properties. Ice-structure interaction
models were selected from available
approaches and new models were developed
around ice feature collisions in open water and
winter conditions, including stochastic process
models for different ice load scenarios, for the
exposure levels of the structure to a given
scenario, and for estimating the load magnitude
during each interaction event. Extremal models
for the discrete Poisson process and for
stationary continuous processes were also
used.

**Proceedings of the Workshop :
applying 15 years of Carnation
Creek results**

T.W. Chamberlain, editor. Nanaimo, B.C. :
Carnation Creek Steering Committee, 1987.
viii, 239 p. Bibliogr. ISBN 0-7726-0831-8
MICROLOG 89-03235 3 fiche

The proceedings, representing 17 years of
results from the Carnation Creek watershed
study, contains 17 technical papers about the
physical and biological processes of the
Carnation Creek ecosystem. After each
session of technical papers, the proceedings
contain commentaries from 6 panels of fish and
forest agency staff and forest industry
representatives. Finally, the verbatim questions
and answers of the audience to each session

of technical papers and panelists are also included so that the extent of understanding or uncertainties is preserved.

Process development of an integrated extractive fermentation system, part of the Bioenergy Development Program (BDP)

prepared for Bioenergy Development Program, Renewable Energy Division, Coal and Alternative Energy Branch, Energy, Mines and Resources Canada ; by A.J. Daugulis, Kingston, Ont. : Queen's University, Dept. of Chemical Engineering, 1987. x, 35 p. Bibliogr. MICROLOG 89-05746 1 fiche

A demonstration unit of the prototype extractive fermentation process previously developed at Queen's University was designed and operated to verify the technical advantage of producing ethanol by this means. In addition to further developing and refining the process, operating data were generated which served as part of the basis for determining the cost of producing ethanol by extractive fermentation at a scale of 20 X 10 to the 6 L/yr of azeotropic (95% by weight) ethanol. Recommendations for process and economic optimization are suggested to maintain the Canadian lead in the development of this technology.

Process furnaces, dryers, and kilns

Ottawa : Energy, Mines and Resources Canada, 1987. 46 p. : ill. (Energy management series for industry, commerce and institutions ; 7) French ed. (*Fours, sècheurs et fours...*) : 89-00291/1. ISBN 0-662-14159-8 MICROLOG 89-00275 1 fiche

Furnaces, dryers and kilns are used extensively in industry for diverse applications such as melting and heating metal, evaporating water or solvents, and manufacturing lime for cement and pulp industries. This manual shows how to apply energy management techniques to save energy and dollars in the installation and operation of process furnaces, dryers and kilns. Coverage includes the fundamentals of their operation, the combustion process, and the transfer of heat from the energy source to the product, calculation of energy losses and the measurement of energy input and losses, control systems and their role, and the concept of the energy audit: types of fuel-fired and electrically-heated furnaces, dryers and kilns with their energy management possibilities; and specific energy management opportunities, with worked examples illustrating the determination of energy savings and the resulting returns on expenditures.

Processing-morphology relationships of compatibilized polyolefin/polyamide blends, part 1 : the effect of an ionomer compatibilizer on blend morphology

by J.M. Willis and B.D. Favis. Boucherville, Que. : National Research Council Canada, Industrial Materials Research Institute, 1988. 44 p. : ill. Bibliogr. MICROLOG 89-00596 1 fiche (Available on fiche only)

Study to determine the emulsifying effect of an ionomer (polyethylene-methacrylic acid-isobutyl acrylate terpolymer), on the morphology of polyolefin/polyamide blends. The mixed resin pellets were dry blended and dried under vacuum, then melt blended, then transformed to a mould and studied on the scanning electron microscope. Image analysis was conducted, and the reduction in the dimensions of the dispersed phase was studied as a function of the quantity of ionomer added to the blend during compounding. Particle size distribution and blend viscosities were also studied.

Production of regional biomass yield tables for Canada : a feasibility study

by H.W.F. Bunce and G.M. Bonnor. Victoria : Government of Canada, Canadian Forestry Service, Pacific Forestry Centre, 1989. vii, 30 p. Bibliogr. (Information report ; BC-X-307) ISSN 0830-0453 ISBN 0-662-16820-8
MICROLOG 89-05118 1 fiche

The production of biomass requires specialized new processes and equipment to convert basic biological material to useful energy. The designer of such processes and equipment must therefore know what material will be available and where. This report relates the acquisition of forest biomass inventory data to the description of specific feedstock supply sources for the future. The inventory provides summaries of total quantities of material available for conventional use (sawlogs, pulp, peeler, etc.) with the remaining unused material available for conversion to energy or other uses. The yield tables describe forest biomass by species, parts of the tree (stem, branch, foliage, etc.), forest condition (site, age, stand density), and distribution according to location and availability.

Production of SiC in a thermal plasma

by H. Choi...et al. Boucherville, Que. : National Research Council Canada, Industrial Materials Research Institute, 1988. 7 p. : ill. Bibliogr. MICROLOG 89-00554 1 fiche (Available on fiche only)

The needs of high temperature structural ceramics have rekindled great interest in developing methods for producing high-purity, ultrafine powders. A continuous thermal plasma process was developed to produce ultrafine SiC powders by phase synthesis from silicon tetrachloride and methane in an argon and argon plus hydrogen plasma jet. The reaction conditions to control the physical and chemical properties of the powders were investigated. Bulk properties of SiC powders were determined by X-ray diffraction and Fourier transform infrared spectroscopy. Surface characteristics and particle size were examined by scanning electron microscopy.

Productivity and profitability of grapple yarding B.C. coastal second growth timber

by J. Macdonald. S.I. : Forest Resource Development Agreement, 1987. viii, 35 p. (FRDA report ; 015) ISSN 0835-0752
MICROLOG 89-04518 1 fiche

As high-quality, old-growth timber becomes more scarce, logging operators are looking at second-growth stands for part of their timber supply. This study examined the profitability of grapple yarding in second-growth timber, and examined the factors which determined the marginal log, the one for which its variable yarding cost is equal to its value at roadside. The study also evaluated the Madill 122 yarding crane on a shift-level basis for 2 months, and at a detailed-timing level for 3 weeks. During the detailed-timing period, individual logs were scaled and graded, and their yarding time recorded. The yarding costs and profits of these logs were calculated using marginal economics analysis techniques. The study block was located approximately 15 km northwest of Sooke, BC, and the stand composition was mainly second-growth Douglas-fir.

Productivity and profitability of grapple yarding bunched B.C. coastal second-growth timber

by A.J. MacDonald. S.I. : Forest Resource Development Agreement, 1988. vi, 30 p. : ill. Bibliogr. (FRDA report ; 048) ISSN 0835-0752 ISBN 0-7726-0885-7
MICROLOG 89-01779 1 fiche

Yarding cranes have played an increasingly important role in coastal harvesting operations over the last 15 years. However, one of their shortcomings has been their inability to yard multiple-piece turns consistently. This study examined the effect of bunching on yarder productivity and determined the optimum bunch volume and marginal-log size. A Washington Model 118A yarding crane was monitored on a shift-level basis for five weeks and at a detailed-timing level for two weeks.

Profil de l'industrie : pêche : poisson pélagique de l'Atlantique

Ottawa : Ministère de l'expansion industrielle régionale, 1988. 8, 8 p. *Bilingue (Industry profile : fishery products...)*. CSI 21109.209. MICROLOG 89-00045 1 fiche

Par espèces pélagiques, on entend des poissons tels que le hareng, le capelan, le maquereau, le thon, et le saumon de l'Atlantique. En 1986, la production de poissons pélagiques s'élevait à 309 millions de dollars et le hareng comptait pour la moitié des prises. Ce document présente une évaluation sommaire de cette industrie (pêche et traitement) par une analyse de sa structure et de son rendement, de ses forces et de ses faiblesses, de l'évolution de son environnement et de l'évaluation de la compétitivité.

Program for the transportation of the mobility disadvantaged in rural Manitoba : a study of user needs and benefits

by D. Kelly and A. Swiderski. Winnipeg : Manitoba Highways and Transportation, Transportation Division, 1988. xiii, 135 p.
MICROLOG 89-03336 2 fiche

This study determines: the extent to which the handivan service meets the transportation needs of the mobility disadvantaged in rural Manitoba, the benefits to communities of establishing mobility disadvantaged transportation services in

relation to the cost to the community and to the province for providing this service; and the extent to which the service offered may be improved within existing financial resources. It also reviews the direct and indirect real and social costs and benefits of providing the program, and assesses the extent to which costs are reduced for providing other essential government services. Finally, it determines how the program improves the quality of life of those availing themselves of the program.

Progress report of the National Task Force on Environment and Economy -- Draft

National Task Force on Environment and Economy (Canada). Winnipeg : Annual Meeting of the National Council of Resource and Environment Ministers, 1988. 12, 14 p. Bilingual (*Rapport d'étape du groupe...*). MICROLOG 89-03351 1 fiche

In September 1987, the Canadian Council of Resource and Environment Ministers (CCREM) unanimously endorsed the report and recommendations of the National Task Force on Environment and the Economy. This report documents progress in responding to those recommendations in the first year following their endorsement, identifying achievements by both the public and private sectors, as well as obstacles which must be overcome. The report first addresses those recommendations which call for immediate action: the creation of multi-sectoral Round Tables on Environment and Economy; the preparation of government Action Plans; and the development of Conservation Strategies. Longer term recommendations are then discussed in less detail, with an emphasis on identifying exemplary initiatives.

Proposal for studies on cutting technology for evaporite mining to reduce airborne dust, energy consumption, and other costs, and increase productivity. The first phase would consist of gathering together studies carried out in Canadian evaporite mines and making them available for application throughout the mining and machine manufacturing industry and as a basis for the design of further research. This proposal also presents background information on the need for such research, the technical approach to be taken, the anticipated benefits, the estimated costs and time involved, and a work plan.

Proposal for evaluation of the Provincial Trial Coordination Program

by E.M. Finnogason. Winnipeg : Manitoba Attorney General, Research, Planning and Evaluation, 1988. 17 p.
MICROLOG 89-02249 1 fiche

The Program's purpose is to improve upon existing methods of case management within the Provincial Court system. This document describes the Program, outlines its objectives, and presents the design for evaluation. The proposed evaluation will assess the degree to which the Program has succeeded in meeting its objectives. It is designed to determine how effective the program is and how effective it is perceived to be by the people affected by it. The former evaluation will be based on quantitative data compiled by the trial coordinator and the clerk, and the latter will be based on interviews with judges, Crown attorneys and defense counsel who have been involved in the program.

A Proposal to develop an irradiated fuel verifier

by K.B. Woodall, W.K. Chan and E.G. De Buda. Toronto : Ontario Hydro, Research Division, 1988. 10 p. (Report ; no. 88-119-K)

MICROLOG 89-02555 1 fiche

Nearly 20 years ago, Canada made a commitment to the International Atomic Energy Agency that it would verify that the fuel stored in our irradiated fuel storage bays was indeed irradiated fuel and not dummy bundles. The Atomic Energy Control Board is now pressing Ontario Hydro to make good on this commitment. This proposal describes a multi-part program to develop a sensor which can detect irradiated fuel in the environment of the irradiated fuel bay and to develop a delivery system that can bring the detector to the fuel in the narrow confines of the Bruce Nuclear Generating Station irradiated fuel storage bays.

A Proposed evaluation system for wildlife habitat reclamation in the mountains and foothills biomes of Alberta : proposed methodology and assessment handbook

by T.R. Eccles, R.E. Salter and J.E. Green ; prepared for the Mountain Foothills Reclamation Research Program and the Coal Association of Canada. Edmonton : Alberta Land Conservation and Reclamation Council, Reclamation Research Technical Advisory Committee, 1988. xx, 198 p. : ill. Bibliogr. (Report ; RRTAC 88-1)

MICROLOG 89-02240 3 fiche

The Mountain Foothills Reclamation Research Program is a joint government/industry program initiated in 1984 and consisting of representatives from the Coal Association of Canada, Alberta Environment and Alberta Forestry, Lands and Wildlife. A two phase study on wildlife habitat reclamation was begun in 1984 to delineate appropriate operational techniques (Phase I) and assessment methodology (Phase II). Phase II was begun in June 1986 ; it includes a technical report with a discussion of reclamation planning, a listing of reclamation habitats and associated key wildlife species, conditions required for development, recommended revegetation species, suitable reclamation techniques, a description of the recommended assessment techniques and a glossary of basic terminology. The assessment handbook contains basic information necessary for evaluating wildlife habitat reclamation, including assessment scoresheets for 15 different reclamation habitats, standard methodologies for measuring habitat variables used as assessment criteria, and minimum requirements for certification.

Prospecting in glaciated terrain : an approach based on geobotany, biogeochemistry, and remote sensing

by J.R. Bélanger. Ottawa : Energy, Mines and Resources Canada. Geological Survey of Canada, 1988. 38 p. : ill., maps. Bibliogr. (Bulletin ; 387)
MICROLOG 89-00312 1 fiche

Mineral exploration in large parts of Canada is difficult because the bedrock is blanketed by thick layers of glacially derived sediments and vegetation. Prospecting based on geobotany, biogeochemistry, and remote sensing was tested in a glaciated terrain environment near Thetford Mines, Quebec. The geobotanical study, carried out between 1979 and 1985, involved visual examination, inventory, and spatial distribution of plant species. The biogeochemical study consisted of chemical and chlorophyll analysis of leaf tissues. The remote sensing study was based on the analysis of multisatellite Landsat imagery.

Psychromechanical process for mine tailings wastewater : final report

Delta Engineering. S.I. : Delta Engineering, 1989. 54 p. : ill. CANMET contract: 89204-01-SQ.
MICROLOG 89-04496 1 fiche

A pilot-scale experiment was conducted in February/March 1989 to investigate a psychromechanical process for treating effluent from mine tailings to verify separation of contaminants from the liquid effluent of mine tailings by freeze crystallization, and to investigate the degree of reduction in acidity of the effluent from acid mine drainage (AMD) ponds by freeze crystallization. AMD liquid effluent was obtained from the Inco mine tailings treatment ponds in Sudbury, Ont. Machine snowmaking equipment was used for the crystallization freezing of the effluent. Simple trays of effluent, exposed to ambient freezing temperatures, were also used to produce bulk ice samples to compare with the freeze crystallization process.

The Pt/Au thermocouple, part I : essential performance

by E.H. McLaren and E.G. Murdock. Ottawa :

National Research Council Canada, Physics Division, 1987. i, 114 p. : ill. Bibliogr. MICROLOG 89-03296 2 fiche (Available on fiche only)

Studies of the Pt/Au thermocouple were undertaken to find a superior and practical sensor as an alternative to the standard Pt/Pt10Rh thermocouple for temperature measurements from 0-1000C. This Part I examines the essential thermoelectric performance, following a recommended preparatory heat treatment, of the Pt/Au thermocouple at the ice point and at the freezing and melting temperatures of high purity metals including the In, Sn, Zn, Sb and Ag points. Direct comparisons at high precision of the immersion-TEMF characteristics of the Pt/Au and the Pt/Pt10Rh thermocouples at the metal fixed points are presented and critical assessments of the merits of these thermocouples are drawn.

Public participation in environmental decision-making

by R. Parenteau. Ottawa : Federal Environmental Assessment Review Office, 1988. x, 71, x, 73 p. Bibliogr. *Bilingual* (La Participation du public...). ISBN 0-662-56191-0
MICROLOG 89-02057 2 fiche

Since the mid-70s, the Canadian, and most provincial governments, have passed measures subjecting certain types of development and construction projects to environmental impact assessment procedures, including also public participation in the evaluation. This report analyses such participation to identify who participates, why they do, and what effect their actions have on approval decisions. All proposals reviewed under federal, Ontario, and Quebec procedures in which the public participated were identified and the framework described; those participating were categorized by nature, independence, geographic base, and fields of activity; presentations were identified by subjects and their frequency; public concerns relating to waterfront development were described; and responses to citizen's requests were categorized by type of conditions requested and the results of requesting such conditions. An overview and summary of the participation process, including its global importance, is also given.

Quality and applications of asphalt derived from upgraded heavy crude : final report

Esso Petroleum Canada (Firm). Research Division. Sarnia, Ont. : The Division, 1986. i, 40 p. : ill. CANMET contract: OSQ85-00216. MICROLOG 89-02177 1 fiche

Most of the conventional asphalts produced by refineries are obtained from straight run distillation of crude oil. Refiners are now looking to upgrade heavy crudes or distillation residues to produce more transportation fuels. Presently, refiners who have upgraders dispose of residual material as fuel; however, incorporation into asphalt would realize a higher market value for these residues. In this study, 85/100 penetration residues from Visbreaking and Residfining Cold Lake bottoms and blended asphalts obtained by mixing virgin Cold Lake asphalt with them were examined to prepare 85/100 penetration asphalts which would meet Canadian specifications.

Quality evaluation of data derived from administrative records : the personal income tax records

by J. Leyes and L. Robinson. Ottawa : Statistics Canada, Administrative Data Development Division, 1985. 22 p. Bibliogr. MICROLOG 89-03849 1 fiche

Administrative records contain bias since data are only available for those who participate, or qualify. In this sense, administrative records tend to cover sub-populations. This paper selects data from alternative sources for the purpose of making comparisons and drawing inferences about the quality of administrative data derived from the personal income tax records.

Quantitative assessment of long waves in economic development

by Y. Gervais. Ottawa : Statistics Canada, Econometric Analysis Division, 1985. 28 p. : ill. Bibliogr. Presented at the Atlantic Canada Economics Association Conference. MICROLOG 89-03712 1 fiche

Spectral analysis and a new filtering technique are used to determine the existence of Kondratieff's cycles. This new methodology is briefly explained and should solve statistical problems related to the study of economic fluctuations and particularly those related to the study of long cycles. The index of Industrial

Production and the G.N.P. of the major industrialized countries are analyzed, as are other international series. The results support the empirical existence of the Kondratieff's cycle.

Quantitative mineralogy of chromite ore from Bird River, Manitoba

by J.M.D. Wilson, W. Petruk and R. Pinard. Ottawa : Canada Centre for Mineral and Energy Technology, Mineral Sciences Laboratories, 1988. ii, 12 p. : ill. Bibliogr. (Report : MSL 88-14(IR)) Project 30.05.01 mineralogical evaluation of ores. MICROLOG 89-00483 1 fiche

A sample of the Bird River deposit, from the Chrome property, was investigated to produce (by gravity, magnetic and flotation methods) a chromite concentrate suitable for metallurgical end-use. The 1st 2 phases of the investigations consisted of mineralogical and pilot plant testwork. A subsequent feasibility study indicated that the Bird River product may be used on-site to make stainless steel. The present study conducted a thorough quantitative mineralogical investigation on a representative sample of the Chrome ore to help elucidate chromite recovery problems.

A Quantitative study of epiphytic lichen vegetation in relation to SO₂ pollution in western Alberta

by A.C. Skorepa and D.H. Vitt. Edmonton : Government of Canada, Canadian Forestry Service, Northern Forestry Centre, 1976. 26 p. : ill. Bibliogr. (Information report : NOR-X-161) ISSN 0704-7673 MICROLOG 89-00185 1 fiche

During recent years, botanists have attempted to analyze lichen populations around major sources of pollution to find out how they are affected, and they have explored the possibility of using lichens as biological indicators of air pollution. Lichens were studied around two recent sources of SO₂ pollution in the Rocky Mountain House area of west-central Alberta. The project was undertaken to determine if the Index of Atmospheric Purity method could be used effectively in an area where a central lichen desert had not yet formed; to determine if alternative methods such as ordination and cluster analysis could be used in lichen biomonitoring problems; to design sampling techniques which could be effectively utilized for sampling epiphytes in coniferous forests; and to determine the extent of damage to epiphytic lichen flora around the Aquitaine Ram River and Gulf-Strachan gas plants.

Quantitative thermal characterization of carbon-epoxy composites using differential scanning calorimetry and thermogravimetric analysis

by D. Noel...et al. Boucherville, Que. : National Research Council Canada, Industrial Materials Research Institute, 1988. 36 p. : ill. Bibliogr. MICROLOG 89-00558 1 fiche (Available on fiche only)

Description of the use of differential scanning calorimetry (DSC) and thermogravimetric analysis applied to the Narmco Rigidite 5208/WC3000 system. These thermal analysis methods involve a slow transfer of heat to the sample (5-10°C/min) and also give information on the composition, structure, and physicochemical behaviour of epoxy-based prepreg. The paper compares the DSC method to other methods, and examines its advantages and disadvantages as a quality control method.

Queen Charlotte Islands coastal zone : digital mapping and linked data base system

by S. Groves, W.G. Green and J.R. Harper.
 Ottawa : Environmental Studies Research Funds, 1988. vii, 115 p. ill., maps. Bibliogr. (Environmental Studies Research Funds report ; no. 085) *Fold. maps not filmed.* ISBN 0-920783-84-8
 MICROLOG 89-02438 2 fiche

The possibility of future oil exploration in Dixon Entrance, Hecate Strait, and Queen Charlotte Sound is now under review. A decision to proceed with oil exploration in northern coastal British Columbia will require detailed information on resources for use in coastal zone planning and in preparing oil spill contingency plans. This report describes the digital mapping and linked data base system developed. The system contains data on coastal geomorphology and processes; biological resources; resource harvesting; areas of special cultural, historical, archaeological, aesthetic, recreational and scientific significance; and sociopolitical features and coastal facilities. Information was compiled between September 1984 and January 1986 from such existing sources as technical reports, aerial photographs and videotapes, maps, unpublished data, data archives, fisheries data, government departments, museums, and individuals who were interviewed on non-commercial resource harvesting and areas of special significance.

R.H. Saunders GS : bedrock study geochemical investigations

by Z. Zhou and R. Dayal. Toronto : Ontario Hydro, Research Division, 1988. ii, 16 p. : ill. Bibliogr. (Report ; no. 88-323-K)
 MICROLOG 89-04587 1 fiche

During the 1987 dam safety investigations at R.H. Saunders Generating Station, an open cavernous feature was encountered in borehole

SM-6 at 190 ft. below the tunnel level. A solid gypsum bed was intercepted 110 ft. downstream from borehole SM-6. Although these open features are not immediately of concern for the overall structural stability of the dam, it is important to consider the effect of gypsum dissolution and possible enlargement of existing solution voids in the foundation rock. This report presents a brief review of the literature on gypsum dissolution, particularly the basic parameters controlling gypsum dissolution and the relevant geochemical approaches used to evaluate the stability of dams on gypsiferous rock foundations.

R.H. Saunders GS : bedrock void investigation

by R. Koopmans and R. Hughes. Toronto : Ontario Hydro, Research Division, 1989. ii, 34 p. : ill. (Report ; no. 88-318-K)
 MICROLOG 89-04573 1 fiche

A field investigation was undertaken to assess bedrock conditions within the dam foundation of R.H. Saunders Generating Station. The feature of most interest was located at the 191 foot level in borehole SM-6. An additional borehole was drilled approximately 103 feet away to provide further information on bedrock conditions. The field investigation involved examining the two boreholes with a borehole television camera, determining the lateral extent of the "void" in borehole SM-6 with sonar equipment and determining the flow rate at various water inflow zones in both boreholes with the aid of packers and a flowmeter. The field work was mainly conducted during October 1988.

Results of a radionuclide study conducted as part of the 1987 Pickering Nuclear Generating Station post-operational studies to determine whether there were areas of increased accumulation of cesium 134, cesium 137 and cobalt 60 in the sediment around Pickering. The levels of these radionuclides were also measured in smallmouth bass (whole) collected from the study area. EN ON PR SC

Radionuclide uptake by beaver and ruffed grouse in the Serpent River basin

by F.V. Clulow. Ottawa : Atomic Energy Control Board, 1988. ix, 63 p. Bibliogr. (Research report ; INFO-0292) MICROLOG 89-05136 1 fiche

Radionuclides were studied in components of the Serpent River drainage basin ecosystem which contains tailings deposits of the uranium extraction operations at Elliot Lake, Ontario. Ra226 levels were measured in bone, muscle, liver and kidney tissues of beaver and ruffed grouse taken in the Serpent River basin, and from control sites; from vegetation items consumed by the animals, and whenever possible, their gut contents; water used by the animals for drinking and, by beaver, as their living medium; and fetal tissue of beaver and muskrat from contaminated areas. Other radionuclides (U238, Th232, Th230, Th228, Pb210, and Po210) were measured in tissues of 2 beaver and 2 grouse with the highest tissue levels of Ra226 observed. The levels of Ra226 obtained in the study were used to calculate concentration ratios from plant and water to animal tissues, and to estimate annual radionuclide intake by human consumers of these animals. Rapid assessment of community nutrition problems : a case study of Parbhani, India

by P. Kashyap and R.H. Young. Ottawa : International Development Research Centre, 1989. viii, 59 p. : ill. Bibliogr. ISBN 0-88936-551-2 MICROLOG 89-04757 1 fiche (Available on fiche only)

This study assesses community nutrition problems and formulates recommendations for nutritional improvement. It presents information on agricultural patterns, food habits, food storage and marketing practices, infant feeding practices, and cultural beliefs and taboos. It also provides data on health facilities, food distribution systems, and nutrient supplementation programs, and includes 4 major recommendations for nutritional improvement in the community.

Rapport à l'Assemblée nationale, 1987-88

Québec (Province). Bureau du Vérificateur général. Québec : le Bureau, 1988. 303 p. : ill. CSI 67253.001. ISSN 0713-3944 ISBN 2-551-08320-6 MICROLOG 89-01834 4 fiche

Ce Rapport démontre l'importance de la reddition de comptes, à l'interne et à l'externe, dans l'administration publique. Il aborde ensuite une question reliée à l'environnement de la gestion moderne dans le secteur privé et le secteur public, à savoir l'évaluation du risque de fraude. Ensuite, il expose les résultats de la vérification puis donne les résultats de cinq missions de vérification intégrée, de deux études d'envergure gouvernementale et d'une vérification sur l'allocation des subventions par le ministère de la Santé et des Services sociaux.

Rapport annuel national sur les drogues, 1987-88 et indicateurs de tendances d'ici 1990

Ottawa : Gendarmerie royale du Canada, Direction de la police des drogues, 1989. x, 118, ix, 110 p. : ill. Bilingue (National drug intelligence...). CSI 22279.002. ISSN 0820-6228 ISBN 0-662-56131-7 MICROLOG 89-03992 3 fiche

Ce rapport a pour objet de présenter une analyse détaillée de l'origine, de la quantité, des voies d'acheminement, des modes de transports et des méthodes de contrebande des drogues du marché illicite canadien, de même que des opérations financières associées à cette activité. Il vise principalement à coordonner le rassemblement, la collation, l'analyse et la diffusion des renseignements nationaux et étrangers sur les drogues pouvant intéresser les législateurs, ainsi que les organismes et les personnes chargés de la lutte anti-drogue. Le rapport débute par le sommaire des activités de 1987/88 et présente les tendances d'ici 1990. Il analyse ensuite chacun des grands groupes de drogues : l'héroïne, la cocaïne, les drogues chimiques et le cannabis. Finalement, le rapport fournit la liste des principales saisies de drogues au Canada ou en route vers le Canada en 1987.

Rat River Wetland Development Task Force report

Rat River Wetland Development Task Force (Man.). Winnipeg : The Task Force. 1988. iii, 100 p. : ill., maps. Bibliogr. *Fold. maps not filmed.*
MICROLOG 89-03339 2 fiche

The Rat River Wetland area has historically been subject to flooding, which reduced the agricultural potential for the area. In 1984, a water control project was established. In this report, the Task Force assesses the impact of the wetland project. It determines benefits and disbenefits of a water control project. For the purpose of benefit cost analysis the benefits are calculated over a 30-year and a 50-year period.

Rationale document supporting revisions to Manitoba surface water quality objectives

by D.A. Williamson. Winnipeg : Manitoba Environment and Workplace Safety and Health, 1988. iii, 94 p. (Water Standards and Studies report ; no. 88-5)
MICROLOG 89-00774 2 fiche

Surface water quality objectives were developed for application within Manitoba in 1976, underwent minor revisions in 1979, then a number of major revisions were proposed in 1983. The proposed revisions were widely circulated, with a public hearing in 1984. A report was submitted in September 1985, which contained a number of recommendations, only one of which pertained directly to elements of possible technical deficiency within the proposed revisions. This report discusses the areas of contention in the 1985 report, including mixing zones; minimum flow; high quality and exceptional value water designations; domestic consumption objectives for fecal coliform bacteria; the definition of toxic substances and nutrients; differences between U.S EPA and the CCREM methods of deriving criteria for the protection of aquatic life; and revisions to specific numerical objectives of un-ionized ammonia, arsenic, cadmium, chlorine, chromium, copper, cyanide, lead, and mercury.

A Re-survey of migrant waterfowl use of the Ontario St-Lawrence River and northeastern Lake Ontario

by R.K. Ross. Ottawa : Environment Canada, Canadian Wildlife Service, Ontario Region, 1989. iv, 25 p. : ill. Bibliogr. (Technical

report series ; no. 52) CSI 22210.203
ISSN 0831-6481 ISBN 0-662-16691-4
MICROLOG 89-04544 1 fiche

In 1985 and 1986, a repeat survey of migrant waterfowl use was undertaken along the Ontario section of the St. Lawrence River and northeastern Lake Ontario to supplement and update the finds of the original 1976-7 survey. The birds were counted from a small fixed-wing aircraft flying a standardized route divided into 12 zones. The results were summarized as waterfowl days for geese, large and small dabblers, bay ducks, goldeneye, sea ducks, and mergansers. Comments are made on individual species where possible.

The Reality gap : closing the gap between women's needs and available programs and services

by S. Torjman. Ottawa : Canadian Advisory Council on the Status of Women, 1988. ii, 59 p. Bibliogr. (Background paper)
MICROLOG 89-04121 1 fiche

This background paper is about the distance between women's real-life needs and the social welfare programs and services that currently

exist to meet those needs. It describes some of the major reasons for the reality gap, discusses means of addressing the problem, and suggests 4 major kinds of action to help bridge the reality gap. These actions include articulating need, challenging inappropriate policies, changing institutions, and becoming more involved in decision-making processes. CA CI SA

Reappraisal of the seismotectonics of southern Ontario, task 1 : relocation of earthquakes and seismicity pattern

by A.A. Mohajer : prepared for the Atomic Energy Control Board, Energy, Mines and Resources and Ontario Hydro. Ottawa : Atomic Energy Control Board, 1987. iv. 73 p. : ill. Bibliogr. (Research report ; INFO-0293) MICROLOG 89-05135 1 fiche

A realistic assessment of seismic risk is important in design, construction and operation of critical or strategic facilities. This study reviews and improves the seismological data base as an aid in more realistic evaluation of seismic hazards in southern Ontario. The types of errors in earthquake location are identified, sources of uncertainties are discussed, and a sensitivity analysis of the errors to different parameters is presented, using recorded data from the 1982 Cocrust seismic experiment explosions at Marmora, Ontario and Bristol Mines, Quebec and blasts from the Ogden Point Quarry at Lake Ontario. A group location technique (Joint Hypocenter Determination) was used to improve the locations of a group of 67 well-recorded events, mostly from the more active region near the Ottawa River and in western Quebec. Smaller and less reliably detected events in southern Ontario were relocated using the new algorithm Hypocenter. CA NR ON SC

Le Reboisement au Québec : choix des essences résineuses

par M. Cauboue...et al. Québec : Gouvernement du Québec, Ministère de l'énergie et des ressources, 1988. 38 p. : ill. Bibliogr. ISBN 2-55108290-0 MICROLOG 89-01813 1 fiche

Ce guide contient une revue de la littérature traitant des exigences écologiques des onze essences résineuses utilisées à des fins de reboisement au Québec et présente leur synthèse. Puis, il recommande un choix d'essences par ordre de priorité en fonction de critères tels que le type de dépôts, les besoins de l'industrie, la rupture de stock et les orientations futures, pour chaque région écologique où les travaux de reboisement sont prévus.
